Secure

CORPORATE PROFILE

Founded in 1996, TP-Link is a global provider of reliable networking devices and accessories, involved in all aspects of everyday life. The company is consistently ranked by analyst firm IDC as the No.1 provider of Wi-Fi devices,* supplying distribution to more than 170 countries and serving billions of people worldwide.

With a proven heritage of stability, performance, and value, TP-Link has created a portfolio of consumer and SMB networking products. Now, as the connected lifestyle continues to evolve, the company is expanding its business domain into Smart Home and IoT technologies in order to meet the demands of tomorrow.

TP-Link offers all kinds of business products for any situation, providing advanced indoor and outdoor, wireless and wired systems for service provider and enterprise customers. The business products of TP-Link include Omada SDN, Pharos Wireless Broadband, JetStream and LiteWave Switches, and SafeStream Business Routers—ideal for hospitality, education, retail, and more.

*According to the latest published IDC Worldwide Quarterly WLAN Tracker Report, Q1 2020 Final Release.

TP-Link Solution's Strengths

TP-Link aims to provide a One-Stop Solution—professional, reliable, and secure.

Comprehensive Products for Any Situation

TP-Link solutions are especially designed for small and medium enterprise networks, like hospitality, education, retail, and more. In order to meet the demands for stable connections, quick deployment, centralized management, ease of use, and reasonable cost, TP-Link offers all kinds of business products for any situation, including indoor and outdoor access points, controllers, wireless broadband, switches, and routers.

A Global Reputation

TP-Link is consistently ranked as the No. 1 provider of Wi-Fi products for more than nine consecutive years, according to analyst firm IDC.* More than one billion wireless users choose TP-Link products to connect to the world.

For decades, TP-Link has gained experience in network surveying, signal optimization, expanding complete Wi-Fi coverage, anti-interference design, network construction, and network deployment. Moreover, TP-Link's experienced technical support, reliable products, and powerful product warranty have earned the company a good reputation worldwide.

One-Stop Solution

TP-Link offers a one-stop solution: from preliminary surveys, product supply for any situation, network deployment, to technical support. TP-Link's 44 global subsidiaries provide fast technical support, product training, and marketing materials to partners worldwide. Technology accumulation and extensive practical experience over the past decades make the TP-Link Business Solution Team faster, more efficient, and more professional than ever. TP-Link customizes solutions for customers after professional and detailed surveys, following the principle of "3H1F": High-tech, High practicality, High reliability, and Fast implementation.

Reliable Product Quality and Vertical Integration

1. Advanced Technology and Continual Innovation

Independent research and development enable TP-Link to master all core technology and react rapidly to changes in the market. Mesh, cloud access, Wi-Fi 6 products, and SDN have all been launched successfully.

2. Vertical Integration

TP-Link is one of the few major wireless networking companies that operate in-house manufacturing facilities to maintain standards of every component. The control over components and supply chain is a key competitive differentiator.

3. High-Level Manufacturing

The combination of supporting facilities ensures complete quality control and high-level manufacturing, benefiting steady supply, cost control, and fast delivery.

4. Complete Quality Control

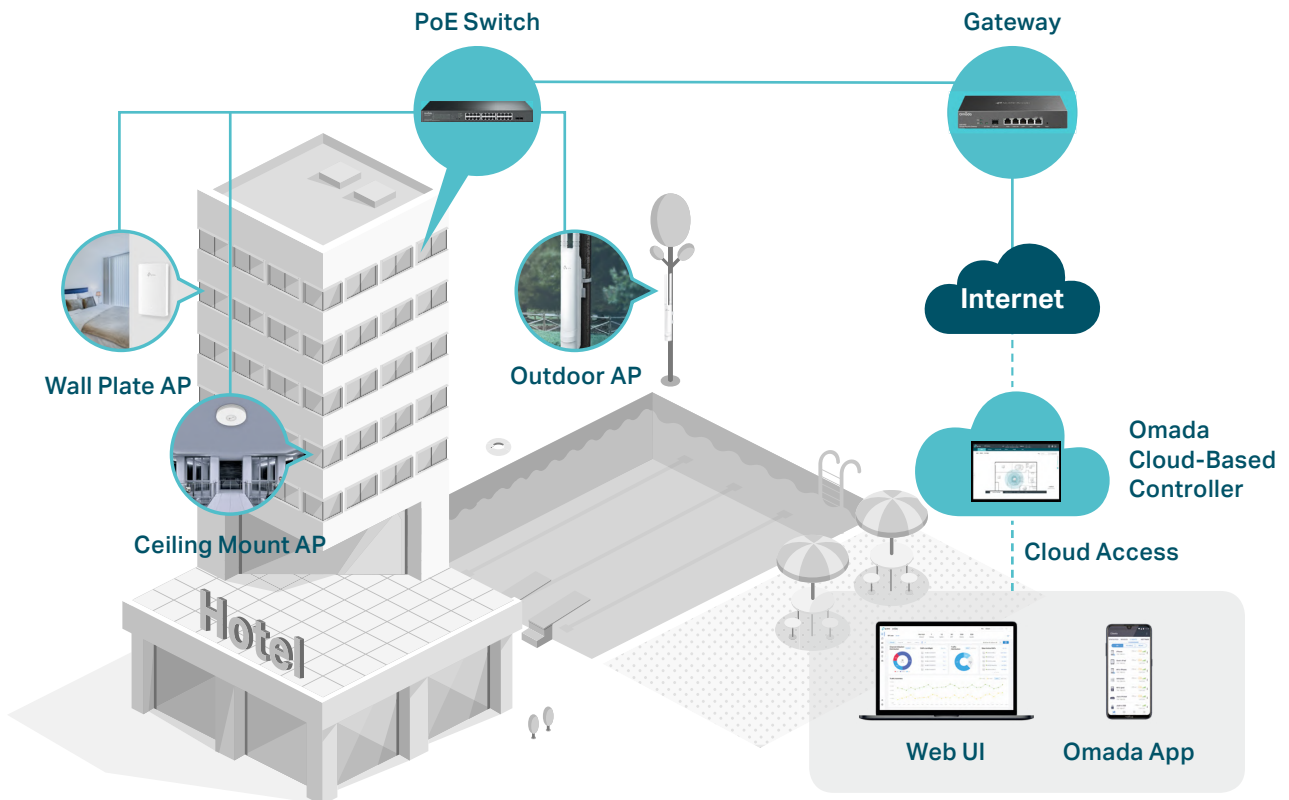

TP-Link develops, builds, and crafts products from start to finish. A TP-Link product must pass rigorous tests and whole-process quality control to guarantee performance throughout the life of the product, including UES to ensure stability, ORT to ensure reliability, and Beta tests to ensure usability.

*According to the latest published IDC Worldwide Quarterly WLAN Tracker Report, Q1 2020 Final Release.

Omada—The Smarter Cloud Solution for Business Networking

Omada Software Defined Networking (SDN) platform integrates network devices including access points, switches, and gateways, providing 100% centralized cloud management to create a highly scalable network—all controlled from a single interface. Seamless wireless and wired connections are provided, ideal for use in hospitality, education, retail, office, and more.

Software Defined Networking (SDN)

Omada is an SDN network with a controller as the core to realize automatic deployment of network services and automatic data distribution across gateways, switches, and access points.

 Higher Efficiency

 Higher Security

 Higher Reliability

Higher Efficiency

No more delegating staff to endlessly configure and manage devices on every site—improve your network efficiency and reduce the overall cost of deployment, operation, and maintenance.

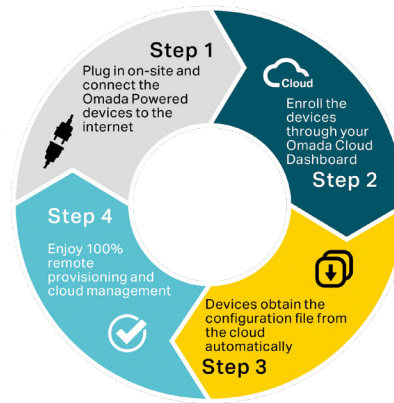

Hassle-Free Centralized Cloud Management

100% centralized cloud management of access points, switches, gateways, and more from different sites—all controlled from a single interface anywhere, anytime. Batch configuration and remote firmware updates greatly benefit maintenance.

Zero-Touch Provisioning*

There's no need to send out an engineer for on-site configuration with Omada Cloud, ensuring a more efficient deployment at a lower cost. Omada zero-touch provisioning allows you to remotely deploy and configure multi-site networks.

Easy and Intelligent Network Monitoring

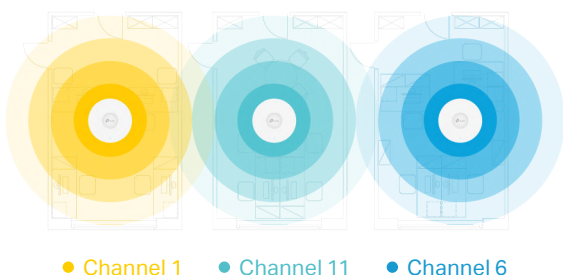

The easy-to-use dashboard, makes it easy to see your real-time network status, check network usage and traffic distribution, receive network condition logs and abnormal event warnings and notifications, or even track key data for better business results. Network topology helps IT admins quickly see and troubleshoot connections at a glance.

AI-Driven Technology for Stronger Performance and Easy Network Maintenance

Auto Channel Selection and Power Adjustment

Provide powerful wireless performance while greatly reducing Wi-Fi interference by automatically adjusting the channel settings and transmission power levels of neighboring APs in the same network.

Intelligent Network Analysis, Warning, and Optimization**

Analyze potential network problems and receive optimization suggestions for higher network efficiency. Locate network faults, warn and notify users, and generate solutions for lower network risk.

*Zero-Touch Provisioning requires the use of Omada Cloud-Based Controller

**Intelligent Network Analysis, Warning, and Optimization are being developed and are scheduled to be released in 2021

Higher Security

Better Protection for Users' Privacy

TP-Link Omada separates network management data from user data, with no user traffic passing through the cloud, ensuring better protection for users' privacy.

Abundant Security Functions

Powerful firewall and advanced security functions further protect the network and data.

					
High-Security VPN	Powerful Firewall	URL/IP/MAC Filtering	Access Control	Advanced WPA3 Encryption	Captive Portal

Higher Reliability

Cloud services are guaranteed with 99.99% SLA availability, 24/7 automated fault detection, geographically isolated back-up servers, and reliable product quality. Your network functions even if management traffic is interrupted.

Omada—Scenario-Based Design

TP-Link Omada is specially designed for hospitality, education, retail, office, and more. Scenario-based products and rich benefits satisfy different needs in various environments.

Hospitality

- ✓ Full Wi-Fi coverage and wired connections
- ✓ Flexible guest control
- ✓ Seamless roaming
- ✓ Easy management

Education

- ✓ Easy management
- ✓ High-density Wi-Fi
- ✓ Full Wi-Fi coverage and wired connections
- ✓ VPN and security

Retail

- ✓ Boost online business
- ✓ Flexible guest control
- ✓ Seamless roaming
- ✓ High-concurrent clients

Office

- ✓ Stable Wi-Fi coverage and wired connections
- ✓ VPN
- ✓ High security
- ✓ Easy management
- ✓ Content filter and monitoring

Wi-Fi 6

Unprecedented User Experience in High-Density Scenarios

Wi-Fi 6 is designed to improve overall spectral efficiency, especially in dense usage scenarios.

Wi-Fi 6 Access Points Improve Experiences in High-Density Environments

Omada Wi-Fi 6 access points optimize every detail of your network connection to significantly improve network efficiency and deliver blistering speeds. Buffering will no longer be a problem.

Faster Speeds

1024-QAM

Longer OFDM symbol

Larger Capacity

UL/DL MU-MIMO

OFDMA

Higher Efficiency

BSS Coloring

Target Wake Time

With 1024-QAM, each symbol carries 10 bits rather than 8 bits, improving raw speeds by 25% compared to 802.11ac 256-QAM. 4x longer OFDM symbol generates more subcarriers to grow coverage with 1.1x faster speed.

OFDMA and MU-MIMO provide up to 4x greater capacity in high-density scenarios compared to traditional Single-User MIMO, enabling more simultaneous device connections.

Target Wake Time schedules transmission time and conserves battery life of clients devices. BSS coloring improves efficiency by avoiding unnecessary slowdowns and minimizing Wi-Fi interference.

*These features can be supported by software updates.
Note: Please refer to page 33-34 for detailed products specifications

Omada Access Points

EAP265 HD

AC1750 Wireless MU-MIMO Gigabit Ceiling Mount Access Point
1300 Mbps + 450 Mbps

EAP110-Outdoor

300 Mbps Wireless N Outdoor Access Point

Omada Mesh

Omada Mesh technology enables wireless connectivity between access points for extended range, making wireless deployment more flexible and convenient.

Long-Range Coverage

Dedicated high-power amplifier and professional antennas ensure long-range coverage over 2.4 GHz and 5 GHz wireless bands.

MU-MIMO

Simultaneously sends data to multiple devices for higher throughput.

Band Steering

Pushes dual-band devices to the wider and faster 5 GHz band, improving overall network performance, especially in high-client density environments.

Seamless Roaming

802.11k and 802.11v seamless roaming provide seamless switching to the access point with the optimal signal when moving between APs.

Guest Network

Provides secure Wi-Fi access along with multiple authentication options (SMS/Facebook Wi-Fi/Voucher, etc.) and abundant wireless security features.

Airtime Fairness

Improves total Wi-Fi throughput by limiting access time for low-speed devices.

Load Balance

Improves overall network performance by limiting the number of users on each access point and removes devices with weak reception.

*The features listed on this page are supported by certain product models.

Omada SDN Controllers

OC300

Omada Hardware Controller

- 2× 10/100/1000 Mbps Ethernet Ports
- 1× USB 3.0 Port
- Centralized Management for APs, Switches, and Routers
- Cloud Access
- Up to 500 Devices

OC200

Omada Hardware Controller

- 2× 10/100 Mbps Ethernet Port
- 1× USB 2.0 Port + 1× Micro-USB Port
- Centralized Management for APs, Switches, and Routers
- Cloud Access
- Up to 100 Devices

Omada Cloud-Based Controller

- Centralized Cloud Management
- Existing Entirely in the Cloud
- Zero-Touch Provisioning
- No Additional Hardware Controller Investment
- No On-Premises Installation

Omada Software Controller

- Centralized Management for APs, Switches, and Routers
- Cloud Access
- Up to 1,500 Devices
- Real-Time Monitoring
- Easy-to-Use Dashboard

* Actual quantity of managed Devices and clients may vary according to network conditions.
Note: Please refer to page 32 for detailed products specifications.

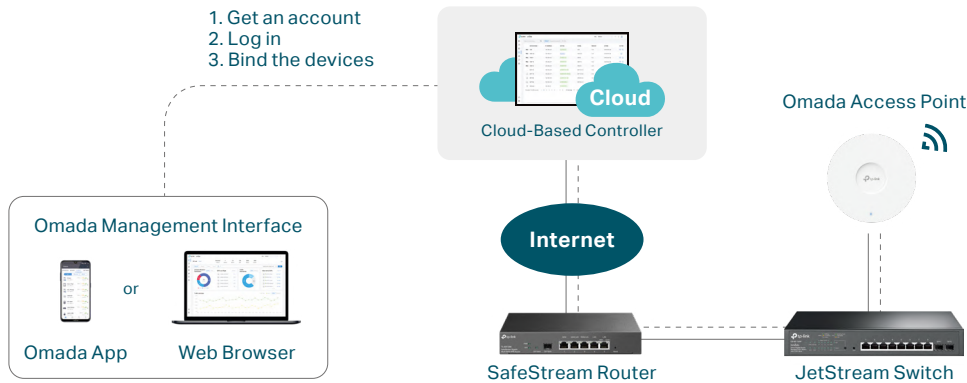

Flexible Options for Cloud Control

Omada SDN provides two kinds of SDN controllers—Cloud-Based Controller (completely in the cloud) and Hybrid-Cloud Controller (on-premises) with full cloud access—giving you maximum flexibility and full control of the whole network from the cloud to fit your business needs.

➤ Cloud-Based Controller for Easier Deployment

With the cloud-based controller existing entirely in the cloud, Omada SDN offers zero-touch provisioning for efficient and affordable deployment and provides centralized management of the network wherever you are. Cloud services are guaranteed with 99.99% SLA availability and 24/7 automated fault detection. There is no additional hardware controller investment and installation on customer premises.

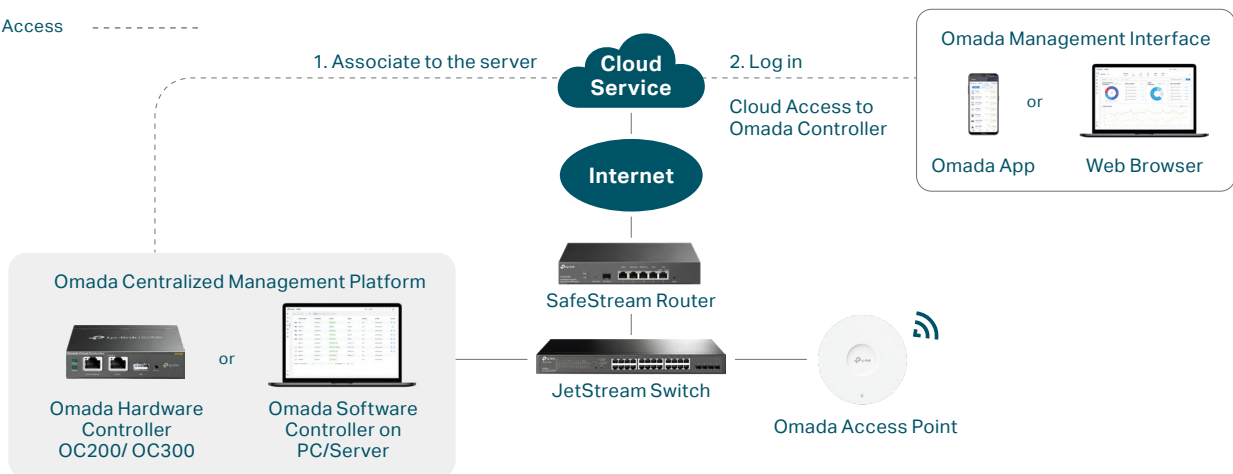

Cloud Access -----

➤ On-Premises Controller with Cloud Access

Omada offers cloud access to its on-premises centralized management platforms—Omada Software Controller or Omada Hardware Controller—to give you control of the whole network wherever you are through the Omada app or Web UI, without any additional service subscription fees.

Cloud Access -----

➤ Cloud Management with the Omada App

Follow the configuration instructions on the free Omada app to set up in minutes. The Omada app lets you configure settings, monitor network status, and manage clients—all from your phone or tablet.

Note: Please refer to page 32 for detailed products specifications.

Industry Solutions

Hospitality Networking Star Hotels | Budget Hotels | and More

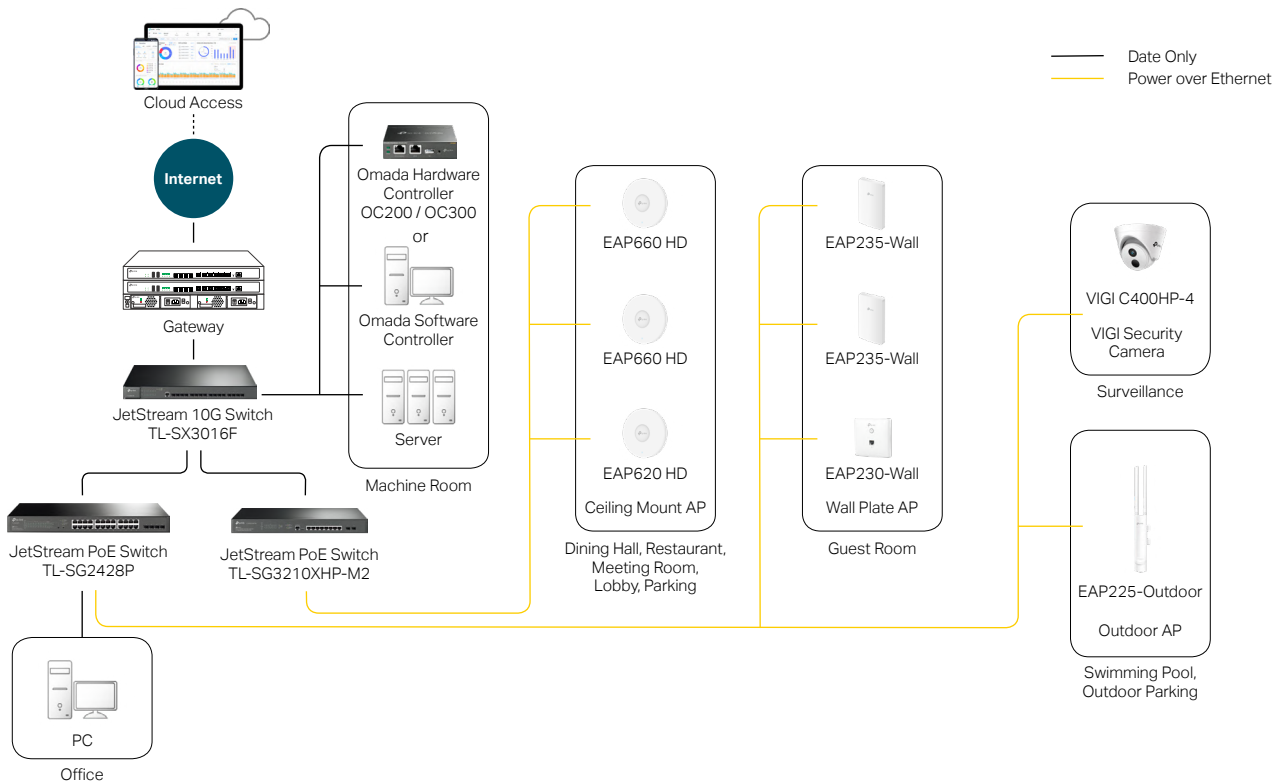

In any household, a strong, stable wireless network is simply an expectation. In fact, the ability to offer convenient connections makes a significant impact on overall customer satisfaction and ratings. Now, TP-Link Omada SDN allows hotels to build the reliable, cost-effective wireless networks that drive progress and keep guests happy and coming back for another stay.

▶ Network Requirements

- Provide powerful wired and wireless networks to both customers and employees.
- Complete Wi-Fi coverage in all areas of the hotel, including outdoor areas such as parking and swimming pools.
- High network stability and security to ensure uninterrupted business and guest data security.
- Offer advertising and promotional content to affiliate customers.
- Elegant appearance to blend with hotel decoration.
- Simple network management and convenient equipment maintenance.

▶ Typical Solution Topology

*Omada Hardware Controller and Omada Software Controller can also be replaced with the Omada Cloud-Based Controller

► Solution Benefits

Full Wireless Coverage

Ceiling mount, wall plate, and outdoor APs provide high-speed Wi-Fi for all indoor and outdoor places and scenarios.

Seamless Roaming for Uninterrupted Streaming

Ensure customers enjoy uninterrupted streaming when moving around by switching clients automatically to the access points with the optimal signal.

Easy Centralized Management

Centrally manage your access points, switches, routers, and more—all controlled from a single easy-to-use interface. Batch configuration and remote firmware updates greatly benefit maintenance.

High-Density Wi-Fi Deployment

Omada Wi-Fi 6 and Wi-Fi 5 APs improve efficiency and ensure top-tier performance for restaurants and meeting rooms with high-density clients.

Stable Wired Connections

High-speed wired connections are provided with 2.5 G or 1 G Ethernet ports (802.3af/at PoE).

Boost online business with Customized Page

Boost online business through guest Wi-Fi with Facebook and authentication pages, which display promotional or marketing content.

Remotely and Quickly Troubleshoot*

Remotely and quickly locate network faults, warn and notify users, and analyze potential network problems even when the IT manager is away with Omada's easy-to-use management interface and AI-Driven technology.

Easy Installation and Deployment

Easy mount construction; PoE support; and a refined, minimalist appearance allow for easy installation and deployment.

► Product Recommendations

High-Performance Solutions

Products	Models	Deployment	Features
Switches	TL-SX3016F	Machine room	Full 10 G Connections; 16× 10 G SFP+ Ports
	TL-SG3210XHP-M2		8× 2.5 G 802.3af/at PoE RJ45 ports; 2× 10 G SFP+ slots; 240 W PoE budget
	TL-SG3428XMP		24× Gigabit 802.3af/at PoE RJ45 ports; 4× 10 G SFP+ slots; 384 W PoE budget
	TL-SG3428X	Office area, meeting room	24× Gigabit RJ45 ports; 4× 10 G SFP slots
Ceiling Mount APs	EAP660 HD	High-density environment (restaurant, meeting room)	Wi-Fi 6 (11AX) improves efficiency in high-density environments; Up to 3,600 Mbps Wi-Fi; 1× 2.5 G RJ45 port; Seamless roaming; Captive portal; Supports 802.3at PoE
	EAP245	Lobby, parking	Long-range indoor coverage; Dual band 11AC Wi-Fi with speed of up to 1,750 Mbps; Seamless roaming; Captive portal; Supports 802.3af and Passive PoE
Wall Plate APs	EAP235-Wall	Guest room	Full in-room Wi-Fi coverage; Dual band 11AC Wi-Fi with speed of up to 1,200 Mbps; Thin design; Captive portal; 4× Gigabit RJ45 ports; Supports 802.3af/at PoE input and PoE passthrough
	EAP230-Wall		Full in-room Wi-Fi coverage; Dual band 11AC Wi-Fi with speed of up to 1,200 Mbps; Thin design; Captive portal; 2× Gigabit RJ45 ports; Supports 802.3af PoE input
Outdoor APs	EAP225-Outdoor	Swimming pool, outdoor parking	Long-range outdoor coverage; Dual band 11AC Wi-Fi with speed of up to 1,200 Mbps; 1× Gigabit RJ45 port; Supports 802.3af and Passive PoE; Mesh; Seamless roaming; IP65 weatherproof enclosure

Cost-Effective Solutions

Products	Models	Deployment	Features
Gateways	TL-ER7206	Machine room	5× GE RJ45 ports + 1× Gigabit SFP ports; Up to 4 WAN ports; Firewall; VPN
	TL-R605	Machine room	5× GE ports; Up to 4 WAN ports; Firewall; VPN
Switches	TL-SG3428X	Machine room	24× Gigabit RJ45 ports; 4× 10 G SFP slots
	TL-SG3428MP	Machine room	24× Gigabit 802.3af/at PoE RJ45 ports; 4× Gigabit SFP slots; 384 W PoE budget
	TL-SG2428P	Machine room	24× Gigabit 802.3af/at PoE RJ45 ports; 4× Gigabit SFP slots; 250 W PoE budget
	TL-SG2008	Office area, meeting room	8× Gigabit RJ45 ports
Ceiling Mount APs	EAP620 HD	High-density environment (restaurant, meeting room)	Wi-Fi 6 (11AX) improves efficiency in high-density environments; Up to 1,800 Mbps Wi-Fi; Seamless roaming; Captive portal; Supports 802.3at PoE
	EAP265 HD		Dedicated Wi-Fi 5 (11AC) AP for high-density environments; Up to 1,750 Mbps Wi-Fi; Seamless roaming; Captive portal; Supports 802.3af and Passive PoE
	EAP115	Lobby, parking	Long-range indoor coverage; 300 Mbps Wi-Fi; Captive portal; Supports 802.3af PoE
Wall Plate APs	EAP225-Wall	Guest room	Full in-room Wi-Fi coverage; Dual-band 11AC Wi-Fi with speeds of up to 1,200 Mbps; Thin design; Captive portal; 4× 10/100 Mbps ports; Supports 802.3af/at PoE input and PoE passthrough
	EAP115-Wall	Guest room	Full in-room Wi-Fi coverage; 300 Mbps Wi-Fi; Thin design; Captive portal; 2× 10/100 Mbps ports; Supports 802.3af PoE input
Outdoor APs	EAP110-Outdoor	Swimming pool, outdoor parking	Long-range outdoor coverage; 300 Mbps Wi-Fi; IP65 weatherproof enclosure; Supports Passive PoE

*Remote and quick troubleshooting is being developed and scheduled to be released in 2021.

Hotels in Bukit Bintang

Name: Hotels in Bukit Bintang

Location: Kuala Lumpur, Malaysia

Products: 1021× APs, 46× switches, 3× routers

Scan for more info

Benefits

Omada solutions provide stable Wi-Fi to empower Bukit Bintang hospitality. And the customers are definitely satisfied with the results.

Testimonials

"The Omada Solution has empowered my business. Customers from all over the world can now enjoy the free Wi-Fi, and I have no complaint since upgrading."

—Kenneth, owner of Anggun Boutique Hotel.

"We chose the TP-Link Omada solution for its extreme cost-efficiency and high stability, the whole solution simplified my work so much and increased our guests' overall experience."

—Chris, IT Manager of 5-star Hotel Istana

Mercure Hotel

Name: Mercure Hotel

Capacity: 136 rooms

Location: Bursa, Turkey

Products: 150× EAP115

Testimonial

"TP-Link has helped us provide an outstanding customer experience with an affordable and easy-to-maintain system. The high-performance Wi-Fi provided the level of service that we need to keep our customers completely satisfied. I look forward to continued cooperation with TP-Link's professional team on future projects."

—Nikolaos Poulou, Owner of Patmos Aktis Suites & Spa

Education Networking

Primary Education | Higher Education | Educational Institutions | and More

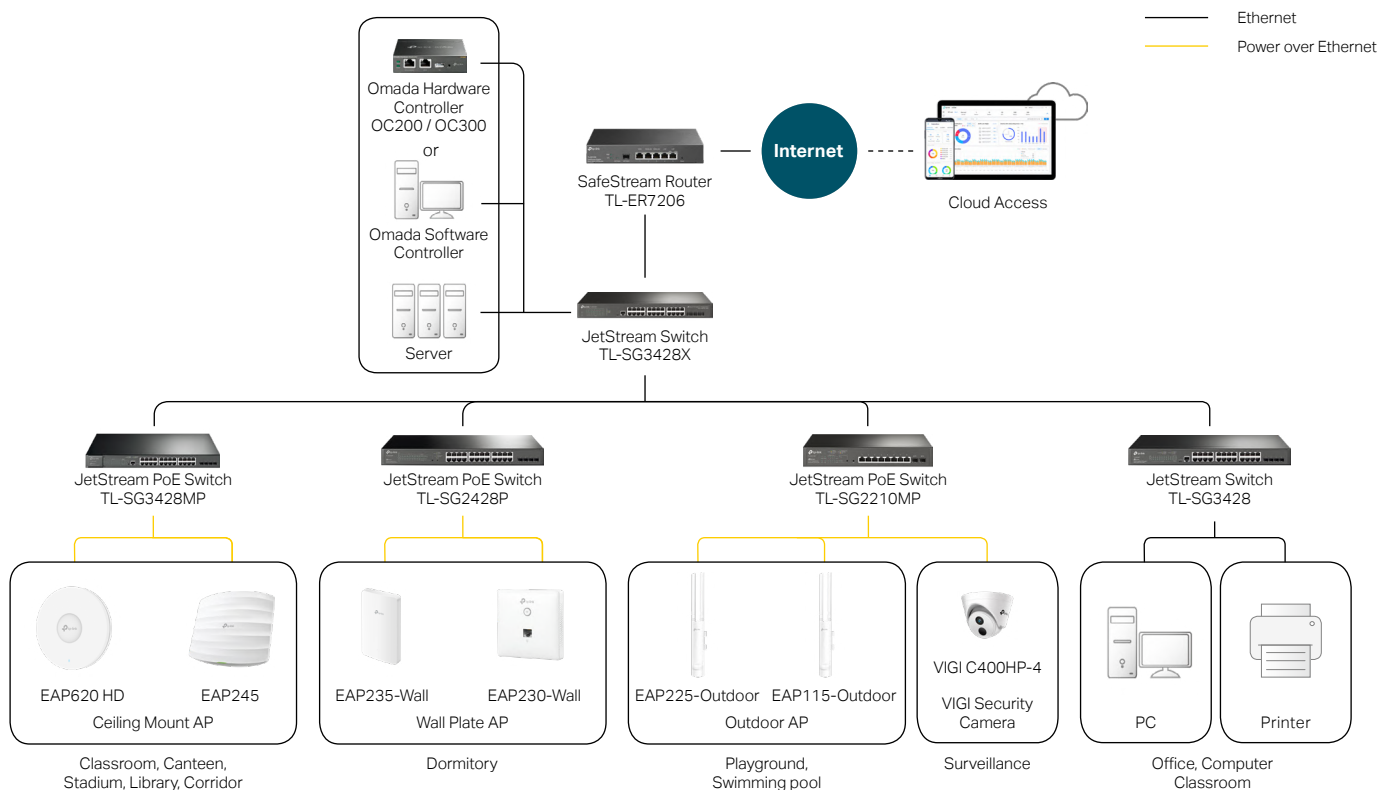

In modern educational institutions, wireless connectivity is as essential as pen and paper. Reliable, secure, and convenient Wi-Fi allows teachers to access a wider variety of resources that promote more effective learning and development. It also provides students with unlimited access to information to enrich their education. Moreover, teachers and students can access the campus network with high-security VPN to teach and learn anywhere.

Due to its reliable, scalable, and secure network solution, TP-Link has been widely acknowledged by global customers in the Education market ranging from infant schools with a few APs up to colleges and universities with hundreds of APs.

▶ Network Requirements

- High network security to ensure academic data security.
- High-density deployment in areas with numerous devices, such as classrooms and dormitories.
- Stable and high-speed network to ensure uninterrupted online classes and meetings.
- Easy-management authentication methods to authorize the access of teachers and students.
- Central network management and convenient equipment maintenance.

▶ Typical Solution Topology

▶ Solution Benefits

Easy Centralized Management

Centrally manage your access points, switches, routers, and more, anywhere, anytime—all controlled from a single easy-to-use interface.

Remotely and Quickly Troubleshoot**

Remotely and quickly locate network faults and analyze potential network problems with Omada's easy-to-use interface and AI-Driven technology.

*Omada Hardware Controller and Omada Software Controller can also be replaced with the Omada Cloud-Based Controller.
 **Remote and quick troubleshooting is being developed and scheduled to be released in 2021.

Full Wireless Coverage

Ceiling mount, wall plate, and outdoor APs provide high-speed Wi-Fi for indoor/outdoor places and scenarios.

High-Density Wi-Fi Deployment

Omada Wi-Fi 6 and Wi-Fi 5 APs improve efficiency and ensure top-tier performance for classrooms, canteens, stadiums, and libraries with high-density clients.

Protects Your Network from Threats

Utilize powerful firewalls, device security detection and protection, URL identification and filter, and more advanced security functions.

Flexible Criteria Management

Use different SSIDs, Access Control, and VLAN binding technologies to identify key network user profiles to deploy customized operating criteria.

Stable Wired Connections

High-speed wired connections are provided with 2.5 G or 1 G Ethernet ports (802.3af/at PoE).

Secure Network with Authentication

Provide secure Wi-Fi access to authorized users (students, teachers, etc.) with multiple authentications options (802.1X/Radius, etc.).

High-Security VPN

Allow students or teachers to visit the campus network even at home with a secure and enterprise-standard VPN.

Seamless Roaming for Uninterrupted Streaming

Ensure uninterrupted streaming when moving around by switching clients automatically to the access points with the optimal signal.

Product Recommendations

High-Performance Solutions

Products	Models	Deployment	Features
Switches	TL-SX3016F	Machine room	Full 10 G Connections; 16x 10 G SFP+ Ports
	TL-SG3210XHP-M2		8x 2.5 G 802.3af/at PoE RJ45 ports; 2x 10 G SFP+ slots; 240 W PoE budget
	TL-SG3428XMP		24x Gigabit 802.3af/at PoE RJ45 ports; 4x 10 G SFP+ slots; 384 W PoE budget
	TL-SG3428X	Office area, computer classroom	24x Gigabit RJ45 ports; 4x 10 G SFP+ slots
Ceiling Mount APs	EAP660 HD	High-density environments (classroom, canteen, stadium, library)	Wi-Fi 6 (11AX) improves efficiency in high-density environments; Up to 3,600 Mbps Wi-Fi; 1x 2.5 G RJ45 port; Seamless roaming; Captive portal; Supports 802.3at PoE
	EAP245	Corridor, digital classroom, other indoor areas	Long-range indoor coverage; Dual-band 11AC Wi-Fi with speeds of up to 1,750 Mbps; Seamless roaming; Captive portal; Supports 802.3af and Passive PoE
Wall Plate APs	EAP235-Wall	Dormitory	Full in-room Wi-Fi coverage; Dual-band 11AC Wi-Fi with speeds of up to 1,200 Mbps; Thin design; Captive portal; 4x Gigabit RJ45 ports; Supports 802.3af/at PoE input and PoE passthrough
	EAP230-Wall		Full in-room Wi-Fi coverage; Dual-band 11AC Wi-Fi with speed of up to 1,200 Mbps; Thin design; Captive portal; 2x Gigabit RJ45 ports; Supports 802.3af PoE input
Outdoor APs	EAP225-Outdoor	Playground, swimming pool	Long-range outdoor coverage; Dual-band 11AC Wi-Fi with speeds of up to 1,200 Mbps; 1x Gigabit RJ45 port; Supports 802.3af and Passive PoE; Mesh; Seamless roaming; IP65 weatherproof enclosure

Cost-Effective Solutions

Products	Models	Deployment	Features
Routers	TL-ER7206	Machine room	5x GE RJ45 ports + 1x Gigabit SFP ports; Up to 4 WAN ports; Firewall; VPN;
	TL-R605		5x GE RJ45 ports; Up to 4 WAN ports; Firewall; VPN
Switches	TL-SG3428X	Machine room	24x Gigabit RJ45 ports; 4x 10 G SFP slots
	TL-SG3428MP		24x Gigabit 802.3af/at PoE RJ45 ports; 4x Gigabit SFP slots; 384 W PoE budget
	TL-SG2210MP		8x Gigabit 802.3af/at PoE RJ45 ports; 2x Gigabit SFP slots; 150 W PoE budget
	TL-SG3428	Office area, computer classroom	24x Gigabit RJ45 ports; 4x Gigabit SFP slots
Ceiling Mount APs	EAP620 HD	High-density environments (classroom, canteen, stadium, library)	Wi-Fi 6 (11AX) improves efficiency in high-density environments; Up to 1,800 Mbps Wi-Fi; Seamless roaming; Captive portal; Supports 802.3at PoE
	EAP265 HD		Dedicated Wi-Fi 5 (11AC) AP for high-density environments; Up to 1,750 Mbps Wi-Fi; Seamless roaming; Captive portal; Supports 802.3af and Passive PoE
	EAP115	Corridor, digital classroom, other indoor areas	Long-range indoor coverage; 300 Mbps Wi-Fi; Captive portal; Supports 802.3af PoE
Wall Plate APs	EAP225-Wall	Dormitory	Full in-room Wi-Fi coverage; Dual-band 11AC Wi-Fi with speeds of up to 1,200 Mbps; Thin design; Captive portal; 4x 10/100 Mbps ports; Supports 802.3af/at PoE input and PoE passthrough
	EAP115-Wall		Full in-room Wi-Fi coverage; 300 Mbps Wi-Fi; Thin design; Captive portal; 2x 10/100 Mbps ports; Supports 802.3af PoE input
Outdoor APs	EAP110-Outdoor	Playground, swimming pool	Long-range outdoor coverage; 300 Mbps Wi-Fi; IP65 weatherproof enclosure; Supports Passive PoE

Typical Cases

Name	Location	Capacity
Habitat School	UAE	1,000 Clients
The King's Hospital School	Ireland	80-acre Campus, 300+ Students
Chase Grammar School	England	400+ Clients
Lytchett Minster School	England	14 individual buildings, 1,400+ students, 200 staff
Calasanz School	Colombia	1,290+ Students

Name	Location	Capacity
Carcavelos High School	Portugal	2,000 Daily Users
Air University	Pakistan	-
Sichuan University	China	All electronic classrooms of Jiangan Campus (300 acres), 10,000+ students
Army Military Medical University	China	Medical building
Tianli International School	China	Full wireless coverage (classrooms, dormitories, cafeterias, complexes)

The King's Hospital School

Name: The King's Hospital School

Capacity: 80-acre campus, 300+ students

Location: Ireland

Products: AP: 70× EAP220; Switch: 1× Core Switch T3700G-28TQ, 3× PoE Switches T2600G-28MPS, 6× TL-SG2210P

Benefits

• Flexible SSID Management

The school uses different SSIDs to identify key network user profiles, including students, visitors, and teaching and admin staff, to deploy different operating criteria. The software controller makes it easy for them to customize the network to the school's specific requirements.

• Student Security

The school uses MAC binding so only pre-approved devices can connect to the network. Deploying MAC binding enables the school to monitor individual devices and filter content, adding an extra layer of security.

• Outdoor Wi-Fi

TP-Link's outdoor access points extend Wi-Fi to the outdoor spaces within the campus, providing the same level of seamless roaming as the indoor versions and can be configured and managed by the same software controller.

Habitat School

Name: Habitat School

Capacity: 1,000 Clients

Location: Ajman, UAE

Products: EAP330

Benefits

Habitat Ajman schools has fulfilled its objectives of ensuring that the technological literacy of their students of all levels is enabled by offering the best performance network that's reliable and secure for students and teachers. The TP-Link Omada solution provides the school district with the technology, performance, flexibility, and cost-effectiveness needed to ensure the goals of online education are not just met, but exceeded.

Catering Networking

Restaurants | Cafés | Internet Cafés | Bars | and More

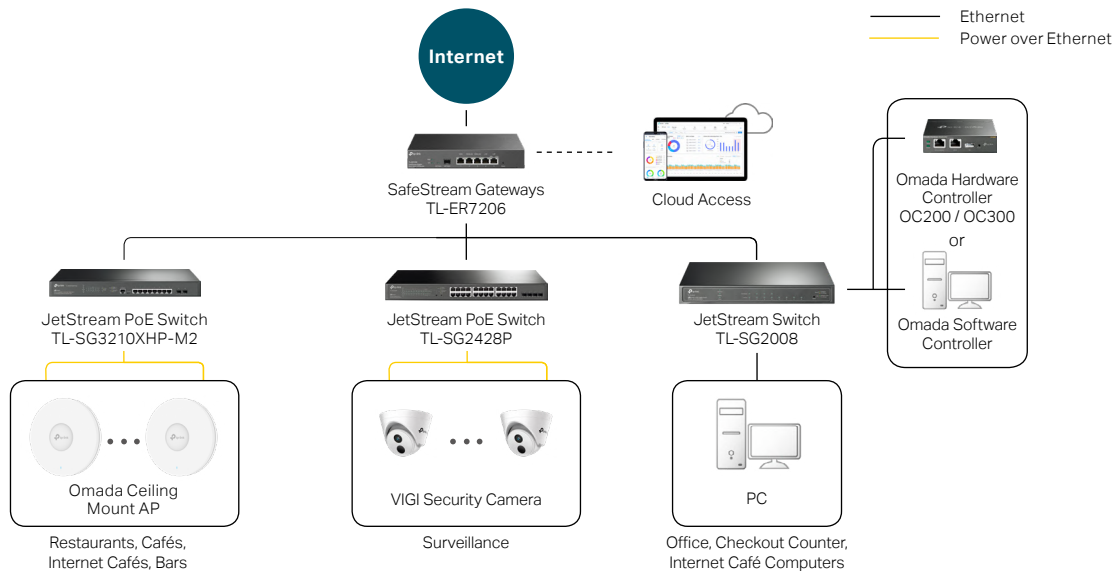

In the era of smart mobile devices, Wi-Fi has become a necessity for restaurants and cafes everywhere. Customers want to check out the news and send messages to friends, even while dining or lounging with a latte. When customers share their experiences online, businesses can also benefit from sharing promotional content and enhancing social media profiles. TP-Link Omada SDN solution empowers restaurant owners to create a modern and compelling in-store experience for every customer, while gaining acknowledgment from catering markets around the world.

▶ Network Requirements

- Provide powerful wired and wireless networks to both customers and employees, and offer stable Wi-Fi for the online food ordering system.
- Provide reliable wired networks for 24-hour surveillance in the restaurants, cafes, and more.
- Offer advertising and promotional content to customers connecting to the networks.
- Provide various authentication methods such as vouchers for different situations.
- Elegant appearance to blend with the indoor decor.
- Simple network management and convenient equipment maintenance.

▶ Typical Solution Topology

▶ Solution Benefits

Boost Business with a Customized Page

Captive Portal provides direct exposure to promotional information and other marketing content while securing network access for guests.

High-Density Wi-Fi Deployment

Omada Wi-Fi 6 and Wi-Fi 5 APs improve efficiency and ensure top-tier performance for your restaurant and café with high-density clients.

Know Customers with Easy Network Monitoring

See the real-time network status, or even track the key data of customers for better business results with an easy-to-use dashboard.

Stable High-Speed Wired Connections

2.5 G or 1 G Ethernet wired connections are provided for office computers, internet café computers, front desks, access points, and IP cameras.

Stable Wi-Fi Coverage

Keeps your wireless online ordering system available everywhere with high-speed full Wi-Fi coverage.

Seamless Roaming for Uninterrupted Streaming

Ensure your customers enjoy uninterrupted streaming when moving around by switching clients automatically to the access points with the optimal signal.

Easy Centralized Management

Centrally manage your access points, switches, routers, and more, anywhere, anytime—all controlled from a single easy-to-use interface.

Easy Installation and Deployment

Easy mount construction; PoE support; and a refined, minimalist appearance allow for easy installation and deployment.

	TL-SG2210P		8× Gigabit 802.3af/at PoE RJ45 ports; 2× Gigabit SFP slots; 61 W PoE budget
	TL-SG2008	Office area, meeting room	8× Gigabit RJ45 ports
Ceiling Mount APs	EAP620 HD	High-density environments (lobby, restaurant, café)	Wi-Fi 6 (11AX) improves efficiency in high-density environments; Up to 1,800 Mbps Wi-Fi; Seamless roaming; Captive portal; Supports 802.3at PoE
	EAP115	Other indoor areas	Long-range indoor coverage; 300 Mbps Wi-Fi; Captive portal; Supports 802.3af PoE

Typical Cases

Name	Location	Capacity
McDonald's	Ukraine	Multiple Restaurants
Tang Palace Restaurant	Dubai	600 Customers at Peak Time
Tim Hortons	KSA	15 Branches, 1000+ Clients,

Name	Location	Capacity
Tsui Wah Restaurant	Hong Kong, China	30 Restaurants
Texas Roadhouse Restaurant	USA	420 Restaurants

TSUI WAH Restaurant

Name: Tsui Wah Restaurant (Chain Restaurant)

Capacity: 30 restaurants

Location: Hong Kong, China

Products: AP: 80× EAP220 (two or three EAP220 for each restaurant); Switch: 30× TL-SG1008P PoE Switches

Benefits

- A stable wireless food ordering system for customers in each restaurant was established.
- An array of features provide better stability and faster speeds.
- The wider and interference-free 5 GHz band is supported to improve Wi-Fi speed and stability.
- Rate limits help ensure a better overall Wi-Fi experience even during the busy dinnertime rush.
- The Omada Software Controller with multi-site management is free of charge.

Testimonial

"TP-Link's solution provides the same Wi-Fi performance at a much better price, which works within our budget much better. TP-Link helps us provide much better Wi-Fi than before. This improves our service substantially and our reputation among customers."

—Mr. Ben Leung, IT Engineer of the restaurant.

Tang Palace Restaurant

Name: Tang Palace Restaurant

Capacity: 600 customers at peak time, 600+ square meters Wi-Fi coverage

Location: Dubai

Products: AP: 9× EAP220; Switch: 1× T1600G-28PS; Router: 1× TL-ER6120

Benefits

- Captive Portal with vouchers—Used as ads as well as authentication.
- Dual-band EAP220 provides connections for a large number of customers and prevents neighboring devices from interfering.
- The TP-Link solution offers the best value and cost-to-benefit ratio when compared to other brands.
- Reliable Wi-Fi connections made a measurable difference to customers' experience and led to an improvement in overall satisfaction.

Retail Networking Shopping Malls | Supermarkets | Department Stores | Shops | and More

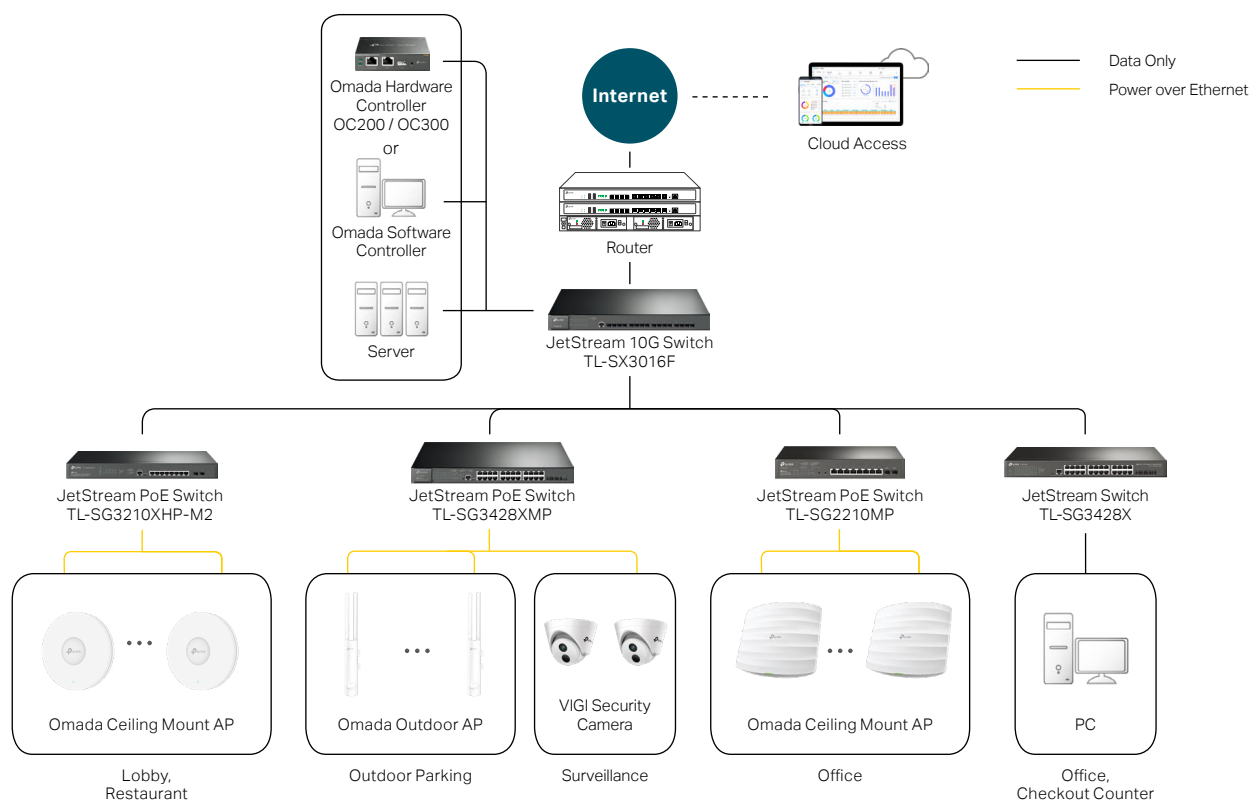

With the growing reliance on smartphones for everyday activities, Wi-Fi has the power to play an important role in the shopping experience. When a brick-and-mortar retailer offers free Wi-Fi, this incentivizes customers to extend their visit, providing the opportunities to explore, discover, and make a purchase. A good wireless network cannot only serve the network office system of the mall, but also bring a more comfortable shopping experience to customers. The TP-Link Omada SDN Solution empowers store owners to create a modern and compelling in-store experience for every customer.

➤ Network Requirements

- Provide secure wired and wireless networks to managerial staff of the mall and store owners and staff, and reliable wired networks for 24-hour surveillance in the mall.
- Provide high-density wireless connections to thousands of customers.
- Seamless Wi-Fi coverage in all areas of the mall decor, including outdoor areas such as parking lots.
- Offer online advertising and promotional content to increase the opportunity of boosting business.
- Elegant appearance to blend with the mall decoration.
- Easy centralized network management and convenient equipment maintenance.

➤ Typical Solution Topology

➤ Solution Benefits

High-Density Wi-Fi Deployment

Omada Wi-Fi 6 and Wi-Fi 5 APs improve efficiency and ensure top-tier performance for shopping malls, supermarkets, and restaurants with high-density clients.

Boost Business with a Customized Page

Captive Portal provides direct exposure to promotional information and other marketing content while securing network access for guests.

*Omada Hardware Controller and Omada Software Controller can also be replaced with the Omada Cloud-Based Controller

Seamless Roaming for Uninterrupted Streaming
Ensure customers enjoy uninterrupted streaming when moving around by switching clients automatically to the access points with the optimal signal.

Know Customers with Easy Network Monitoring
See the real-time network status or even track the key data of customers for better business results with an easy-to-use dashboard.

Stable High-Speed Wired Connections

Name	Location	Capacity
Changsha Bofu International Plaza	China	About 100,000 square meters
Wanxin Wuzhou Shopping Mall	China	150,000 square meters

Sim Lim Square

Name: Sim Lim Square
(Singapore's largest IT and electronics shopping mall)
Capacity: 500+ merchants, 10,000 daily visitors, up to 1,000 shoppers at one time
Location: Singapore
Products: AP: 45× EAP220; Switch: Multiple PoE Switch TL-SG3424P

Benefits

- High-density Wi-Fi connections are provided to thousands of customers.
- PoE switches make installing ceiling-mounted APs easy and flexible.
- Seamless Wi-Fi coverage is available throughout the mall.
- Easy centralized management of the whole network with the free Omada Software Controller, even when lacking technical IT staff.

Testimonial

"Our customer satisfaction levels have been greatly improved since we started offering free public Wi-Fi throughout the entire mall. For that alone, the solution TP-Link provided was the best choice."
—Sean Chia, Head of Advertising & Promotions, Sim Lim Square.

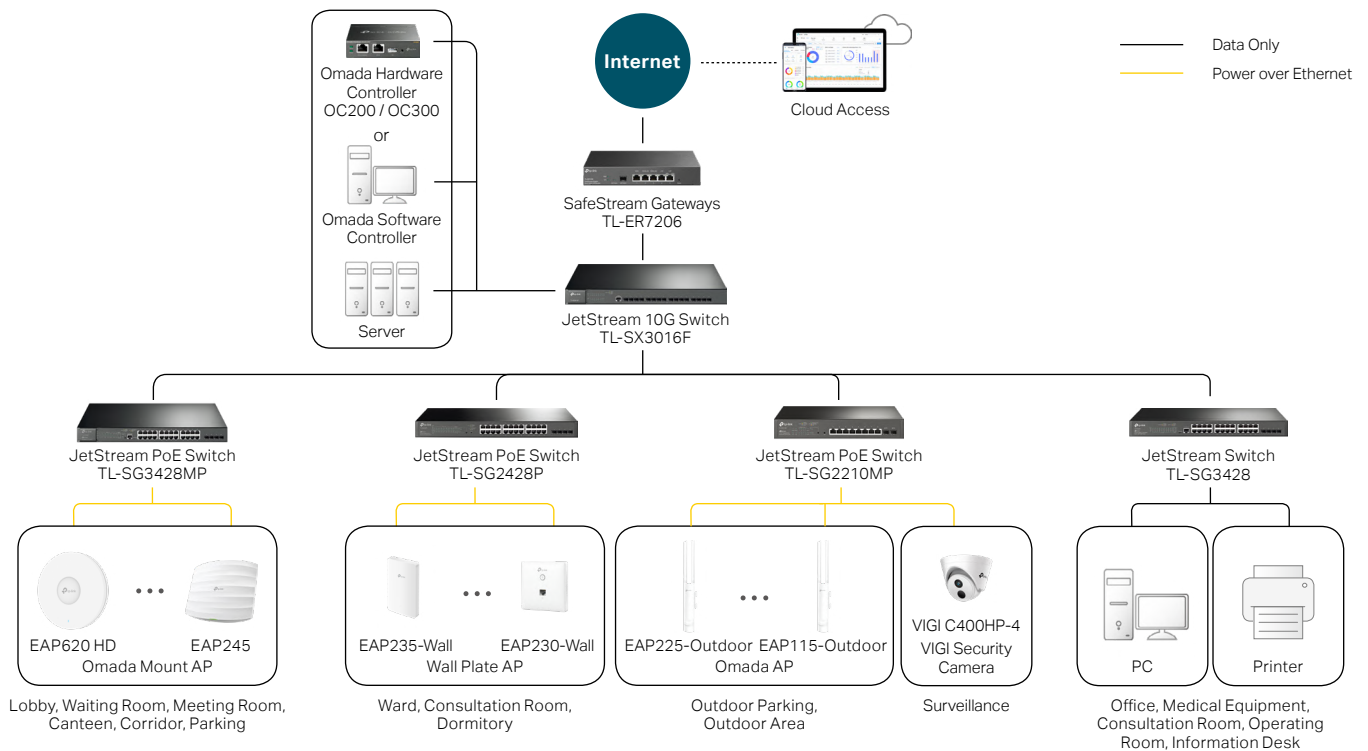

With the increasing maturity and popularity of wireless LAN technology, the application of wireless LAN in the healthcare industry worldwide has become a trend. WLAN effectively overcomes the drawbacks of wired networks, enabling the use of tablet computers and mobile carts to collect vital signs, patient identification, etc. The TP-Link Omada SDN solution helps hospitals build comprehensive medical information systems and highlight the technical advantages of digital hospitals.

► Network Requirements

- Provide a secure and stable network to protect privacy information.
- High-speed wireless signals covering each ward, office, and everywhere.
- Provide uninterrupted network service anywhere, including corridors and lifts.
- Flexible deployment and central management for quick and convenient usage.
- Simple-design appearance to blend with the decor.

► Typical Solution Topology

► Solution Benefits

- Full Wi-Fi Coverage**
Ceiling mount, wall plate, and outdoor APs provide high-speed Wi-Fi for all indoor and outdoor places and scenarios.
- Protects Your Network from Threats**
Utilize powerful firewalls, device security detection and protection, IP-MAC-Port-VLAN Binding, URL identification and filter, and more.

- Stable Wired Connections**
2.5 G or 1 G Ethernet wired connections are provided for the office computers, medical equipment, front desks, access points, and IP cameras.
- Seamless Roaming for Uninterrupted Streaming**
Ensure staff, patients, and guests enjoy uninterrupted streaming when moving around by switching clients automatically to the access points with the optimal signal.

*Omada Hardware Controller and Omada Software Controller can also be replaced with the Omada Cloud-Based Controller

Flexible Criteria Management

Use different SSIDs, Access Control, and VLAN binding to identify network user profiles, including staff, visitors, and patients, to deploy customized operating criteria.

Quickly Troubleshoot to Stabilize Your Network*

Remotely and quickly locate network faults and analyze potential network problems with Omada's easy-to-use management interface and AI-Driven technology.

High-Density Wi-Fi Deployment

Omada Wi-Fi 6 and Wi-Fi 5 APs improve efficiency and ensure top-tier performance for canteens and meeting rooms with high-density clients.

Secure Guest Network with Captive Portal

Provide secure guest Wi-Fi access along with multiple authentication options (SMS/Facebook Wi-Fi/Voucher, etc.).

Easy Centralized Management

Centrally manage your access points, switches, routers, and more, anywhere, anytime—all controlled from a single easy-to-use interface.

Easy Installation and Deployment

Easy mount construction; PoE support; and a refined, minimalist appearance allow for easy installation and deployment.

Scan for more info

Benefits

- Excellent Wi-Fi signal in the basement, office corridors, conference rooms, and everywhere else.
- The 802.11ac Wi-Fi, combined with advanced 3x3 MIMO technology, ensures superior Wi-Fi speeds and coverage over the 2.4 GHz and 5 GHz wireless bands.
- Each EAP245 supports around 80 clients, making it highly cost-effective.

Name	Location	Capacity
Dalian Children's Hospital	China	Over 30,000 square feet
Zhoukou Union Orthopaedics Hospital	China	Over 35,000 square feet

- The Omada Software Controller makes it easy for centralized management to manage and monitor hundreds of EAPs from a single location. It's also easy to set captive portal.
- The low-profile design, easy-mount chassis, and PoE support make deployment flexible, easily blending in with interior décor.

Enterprise Office Buildings | Warehouses | Factories | and More

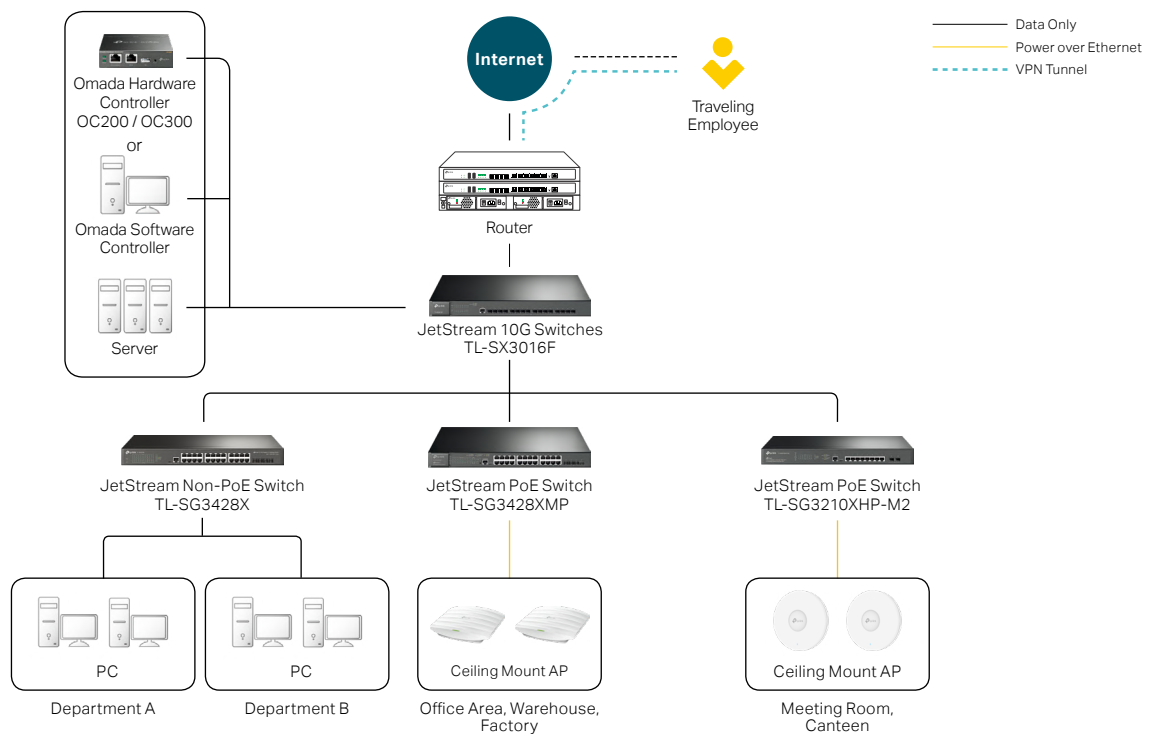

For small and medium-sized enterprises, business managers are constantly keeping IT management simple and effective, which is essential for today's dynamic and innovative enterprises. To drive business growth, enterprises have growing demands for reliable network systems involving more clients—both wired and wireless—more bandwidth-demanding applications, and more customized services like VPN.

A virtual private network (VPN) is a way for different branches to share resources and communicate with each other. It also provides a secure method by which employees can access internal network servers when out of the office. TP-Link Omada offers Site-to-Site and Client-to-Site VPN solutions to meet the requirements of today's enterprise networks.

Network Requirements

- Provide both wired and wireless clients with fast, secure, and reliable internet access.
- Manage and maintain diverse and complex networks in a time-saving and economical way.
- High network stability to ensure uninterrupted business.
- Security strategies that protect digital assets, including threat detection and remediation.
- Empower your workforce with secure VPN policies.

Typical Solution Topology

Solution Benefits

Stable Wired Connections

2.5 G or 1 G Ethernet wired connections are provided for office computers, front desks, access points, and IP cameras.

Stable and High-Speed Wi-Fi

Ceiling mount APs provide stable and high-speed Wi-Fi for meeting rooms, office areas, warehouses, and factories.

*Omada Hardware Controller and Omada Software Controller can also be replaced with the Omada Cloud-Based Controller

High-Security VPN

Allows staff to visit the company network even at home, on a business trip, or at branches with a secure VPN (IPSec/ OpenVPN/ PPTP/ L2TP).

Flexible Criteria Management

Use different SSIDs, Access Control, and VLAN binding technologies to identify key network user profiles, including staff and visitors, to deploy customized operating criteria.

Quickly Troubleshoot to Stabilize Your Network**

Remotely and quickly locate network faults and analyze potential network problems with Omada's easy-to-use management interface and AI-Driven technology.

Content Filtering and Monitoring

Standardize employees' online behavior via URL identification and filtering, real-time network status monitoring, and traffic statistics analysis.

Protects Your Network from Threats

Utilize powerful firewalls, device security detection and protection, Access Control, URL filter, and more.

Secure Guest Network with Captive Portal

Provide secure guest Wi-Fi access along with multiple authentication options (SMS/Facebook Wi-Fi/Voucher, etc.).

Easy Centralized Management

Centrally manage your access points, switches, routers, and more, anywhere, anytime—all controlled from a single easy-to-use interface.

Easy Installation and Deployment

Easy mount construction; PoE support; and a refined, minimalist appearance allow for easy installation and deployment.

Transportation Railway Stations | Airports | Bus Stations | Subway Stations | and More

- ✓ Full Wi-Fi coverage in large open spaces
- ✓ Seamless roaming
- ✓ High-concurrent clients
- ✓ Easy deployment in indoor and outdoor areas
- ✓ High network security in public areas

Railways, subways, airplanes, and other transportation systems have drawn an increasing interest on the use of wireless communications for critical and noncritical services to improve performance, reliability, and passenger experience. Such places provide internet to passengers not merely as a value added service but as an essential amenity. TP-Link Omada offers full Wi-Fi coverage in these large open spaces to meet the needs of high-concurrent passengers.

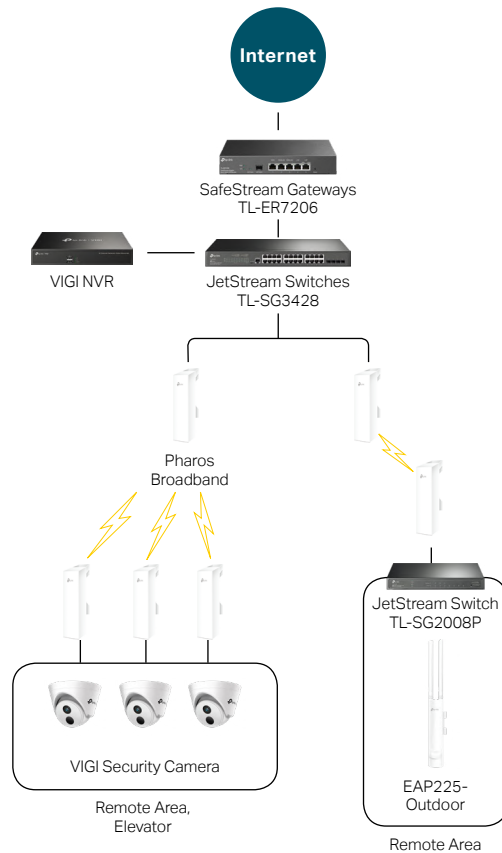

► Network Requirements

- Complete Wi-Fi coverage in large indoor or outdoor spaces.
- Provide fast, secure, and reliable wireless networks for high-density passengers.
- Captive portal with multiple authentication options to ensure secure and flexible Wi-Fi access.
- Easy installation and deployment to meet diverse requirements for indoor and outdoor environments.
- Easy centralized management and convenient equipment maintenance.
- Advanced security functions to protect the network from threats and ensure network stability.

► Typical Solution Topology

Indoor Wi-Fi Coverage and Surveillance

Outdoor Long-Distance and Elevator Wi-Fi Coverage and Surveillance

*Omada Hardware Controller and Omada Software Controller can also be replaced with the Omada Cloud-Based Controller.

► Solution Benefits

Full Wi-Fi Coverage in Large Open Spaces

Ceiling mount APs, outdoor APs, along with Pharos broadband, provide stable and high-speed Wi-Fi for railway stations, airports, bus stations, and subway stations.

Secure Guest Network with Captive Portal

Provide secure guest Wi-Fi access along with multiple authentication options (SMS/Facebook Wi-Fi/Voucher, etc.).

Easy Centralized Management

Centrally manage your access points, switches, routers, and more, anywhere, anytime—all controlled from a single easy-to-use interface.

Easy Installation and Deployment

Easy mount construction, PoE support, Mesh technology, and long-range transmissions from Pharos broadband allow for easy installation and deployment, even in remote indoor and outdoor areas.

High-Density Wi-Fi Deployment

Omada Wi-Fi 6 and Wi-Fi 5 APs improve efficiency and ensure top-tier performance for high-density passengers.

Seamless Roaming for Uninterrupted Streaming

Ensure passengers enjoy uninterrupted streaming when moving around by switching clients automatically to the access points with the optimal signal.

Near and Remote Network Connections

PoE switches and Pharos broadband provide short to long distance network connections for access points and surveillance cameras.

Protects Your Network from Threats

Utilize powerful firewalls, device security detection and protection, IP-MAC-Port-VLAN Binding, URL identification and filter, WPA3, and more advanced security functions.

Accommodation Residential Buildings | Villas | Dormitories | Apartments | Resorts | and More

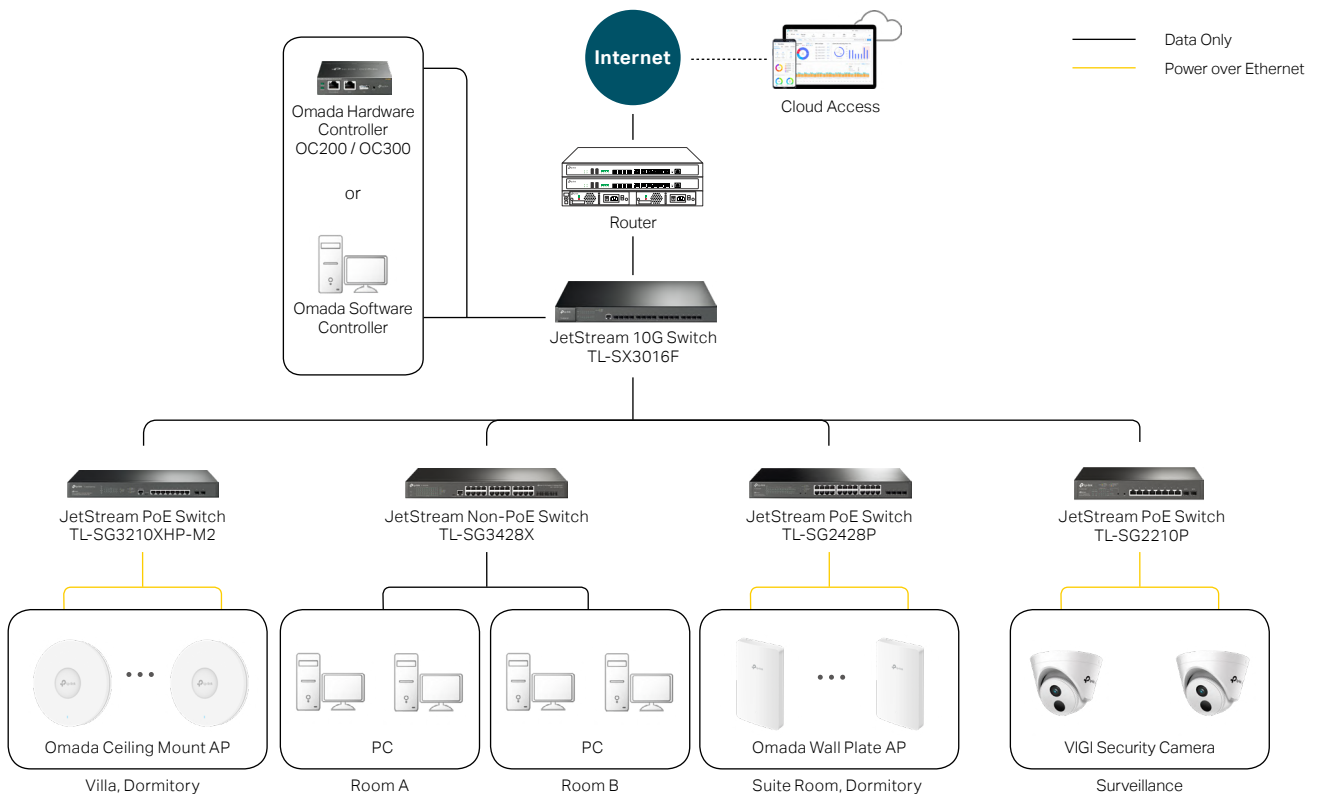

For people living in residential buildings, like villas, dormitories, and apartments, stable and high-speed Wi-Fi is necessary. People share resources and communicate with each other via wired and wireless connections safely. TP-Link Omada offers central management, real-time network monitoring, and quick network troubleshooting to meet the requirements of different people. It also allows every family to manage the network in his home separately with multi-tenant privilege assignment.

Network Requirements

- Provide stable wired and wireless networks to families and employees.
- Complete Wi-Fi coverage in all areas of every suite room, villa, dormitory, and outdoor area.
- Centrally manage your access points, switches, and routers.
- Provide secure Wi-Fi access along with multiple authentication options.
- Easy network management and convenient equipment maintenance.

Typical Solution Topology

Solution Benefits

Easy Centralized Management

Centrally manage your access points, switches, routers, and more, in every suite—all controlled from a single easy-to-use interface.

Full Wi-Fi Coverage

Wall plate, ceiling mount, and outdoor APs provide stable and high-speed Wi-Fi for every suite room, villa, and outdoor area.

*Omada Hardware Controller and Omada Software Controller can also be replaced with the Omada Cloud-Based Controller

Protects Your Network from Threats

Powerful firewall, device security detection and protection, IP-MAC-Port-VLAN Binding, URL identification and filter, WPA3, and more advanced security functions prevent the risk of attacks.

Secure Authentication with Captive Portal

Captive Portal (SMS/Facebook Wi-Fi/Voucher, etc.) provides secure access to every family or guest.

Know your Whole Network with Easy Monitoring

See your real-time network status and check the network traffic distribution in all suites with Omada's easy-to-use dashboard.

Reliable Wired Connections

The multiple Ethernet ports of thin wall plate APs provide further connections for wired devices and network expansion in every suite. The 2.5 G / 1 G wired connections of switches are also provided.

Assign Different Management Roles

Allow every family to manage the network in their home separately with multi-tenant privilege assignment.

Quickly Troubleshoot to Stabilize the Network*

Remotely and quickly locate network faults and analyze potential network problems with Omada's easy-to-use interface and AI-Driven technology.

HQ and Branch Locations

Hotel Chains | Retail Chains | Restaurant Chains | Company Branches | University Branches | School Branches | and More

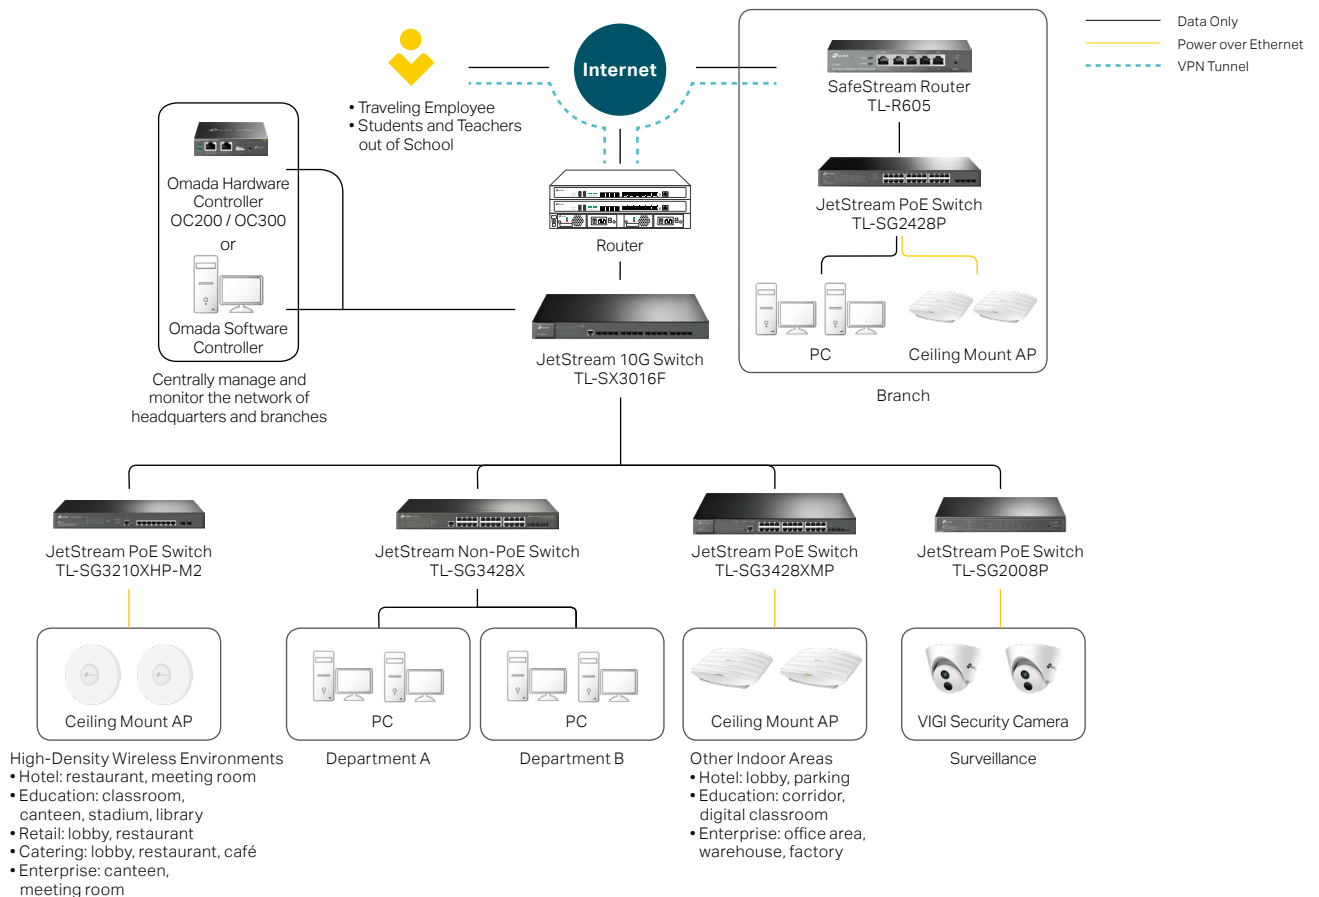

For many industries that have branches, like hotel chains, supermarket chains, restaurant chains, retail chains, company branches, university branches, and school branches, a virtual private network (VPN) is a way for different branches to share resources and communicate with each other. It also provides a secure method by which employees can access internal network servers when out of the office. IT managers at headquarters also need to manage and monitor the whole network and quickly find and repair network issues. TP-Link Omada offers enterprise-level VPN, real-time network monitoring, and quick network troubleshooting to meet the requirements of headquarters and branches.

▶ Network Requirements

- Provide both wired and wireless clients with fast, secure, and reliable internet access.
- Connect HQ and branches with secure VPN policies.
- Manage and maintain diverse and complex networks in a time-saving and economical way.
- High network stability to ensure uninterrupted business.
- Security strategies that protect digital assets, including threat detection and remediation.

▶ Typical Solution Topology

*Omada Hardware Controller and Omada Software Controller can also be replaced with the Omada Cloud-Based Controller

Benefits

High-Security VPN

Allow staff, teachers, and students to visit the internal network even at home, on a business trip, or at branches with a secure and enterprise-standard VPN.

Protect Your Network from Threats

Utilize powerful firewalls, device security detection and protection, IP-MAC-Port-VLAN Binding, URL identification and filter and more.

Easy Centralized Management

Centrally manage your access points, switches, routers, and more at different branches—all controlled from a single easy-to-use interface.

Know Your Whole Network with Easy Monitoring

See your real-time network status and check the network traffic distribution at all branches with Omada's easy-to-use dashboard.

Quickly Troubleshoot to Stabilize the Network*

Even when your IT manager is away or there's no IT manager at the branches, remotely and quickly locate network faults and analyze potential network issues with Omada's easy-to-use management interface and AI-Driven technology.

Testimonials

Scan for more info

"We are all thrilled with the Wi-Fi speed, coverage, and reliability of TP-Link's solution."

—Franco Lugani, Director of Communications at Torino FC.

Scan for more info

"The choice for the solution supplier was based on the requirement for urgent introduction of the Wi-Fi networks within the deadlines and limited budget in order to convene conferences, presentations and possibility for centralized monitoring in distant conference rooms of the customer. An additional goal, perfectly handled by the TP-Link equipment, has been the stable Wi-Fi coverage for a building with thick walls and floor slabs. We would like to express special gratitude to TP-Link for profound participation, assistance, and loyalty in this successful project. We are looking for further development of partnership."

—Arthur Kadyrov, Director for business development of INFOTAKTIKA

Omada Hardware Controller	•	
Cloud-Based Controller	•	
Zero-Touch Provisioning**	•	
Cloud Access	•	
Omada App	•	
Standalone Mode	•	

Certification and Training

Currently, TPNA for SMB, TPNP for SMB Routing & Switching, and TPNP for SMB Business Wi-Fi are provided. Access professional training to develop your skills and gain certification to enhance your career.

TP-Link Partner Program

<https://partner.tp-link.com/>

For Value-Added Resellers (VARs) and System Integrators (SIs) looking for access to even better deals and tailored support, TP-Link has designed the TP-Link Partner Program to reward loyalty and help grow business.

- Deal Registration
- Sales Tools
- Knowledge Base
- Marketing Materials
- Promotions
- Support
- Training & Certification

Join TP-Link Partner Program, Earn More Margin

Note: The Partner Program and benefits may vary according to your region. Please contact your local TP-Link representative for more information.

SMB Community

<https://community.tp-link.com/en/business/>

Technical support and case sharing.
Your direct dialogue with TP-Link.
When it comes to SMB, we know you want to learn more.

Knowledge Base

Excellent Pre- and After-Sales Services

TP-Link provides not only products with outstanding quality but also whole service for complete client satisfaction.

After-Sales Services

- Global Call Center Providing Hotline Support
- 24/7 Post-Sales Email Service
- Online SMB Community

Quality of Service

- Replacement and Warranty
- Constant Firmware Updates from the Cloud Service

Tech Solutions

- Online Training and Certifications—TPNA & TPNP
- Specialized Support Teams Local and Abroad
