Raspberry Pi 2 Model B Camera Kit

Get started capturing standard and high definition photos and video with this easy to use Camera Kit. The 5MP camera with night vision is perfect for time-lapse and slow-motion photography, home security applications, and wildlife monitoring. The included clear case accommodates mounting the camera board in several ways. Mount it inside for a tidy all-encompassing package, or route the camera's ribbon cable through a slot in the case to accommodate your project's needs. The included User Guide for Raspberry Pi will walk you through how to get up and running with your new board, but it doesn't stop there. Learn how to use your Raspberry Pi to set up Minecraft, a standalone media centre with RaspBMC, or interact with a camera, lights and sensors.

Kit Includes:

- Raspberry Pi Model B Single Board Computer
- Raspberry Pi NoIR 5MP Camera Board
- SD Card with operating systems
- 5V 1.8A Power supply
- Clear case which accommodates the Pi Camera

Raspberry Pi 7" Touchscreen Display

Model: RASPBERRYPI-DISPLAY

The 7" Touchscreen Monitor for Raspberry Pi gives users the ability to create all-in-one, integrated projects such as tablets, infotainment systems and embedded projects. The 800x480 display connects via an adapter board which handles power and signal conversion. A range of display frames are available separately to support and protect your Touchscreen while maintaining all the functionality.

Features:

- 10 finger capacitive touch
- Screen Resolution: 800 x 480 pixels
- Screen Dimensions: 194mm x 110mm x 20mm
- Viewable screen size: 155mm x 86mm

Contents:

- 7" Touchscreen display
- Adapter board
- DSI ribbon cable
- 4x stand-offs and screws
- 4x jumper wires

Raspberry Pi HAT

Model: RASPBERRYPI-SENSEHAT

The Raspberry Pi Sense HAT is attached on top of the Raspberry Pi via the 40 GPIO pins. The Sense HAT has several sensors that can be used for many different types of experiments (measurement of pitch, roll and yaw, barometric pressure, temperature and humidity), applications and even games.

- Accelerometer sensor: $\pm 2/4/8/16g$
- Gyroscope sensor: $\pm 245/500/2000dps$
- Magnetometer sensor: $\pm 4/8/12/16$ gauss
- Pressure sensor: 260-1260hPa absolute range
- Temperature sensor: accurate to $\pm 2^{\circ}C$ ($0-65^{\circ}C$)
- Humidity sensor
- 8x8 LED matrix display
- Small 5 button joystick

Mounting kit:

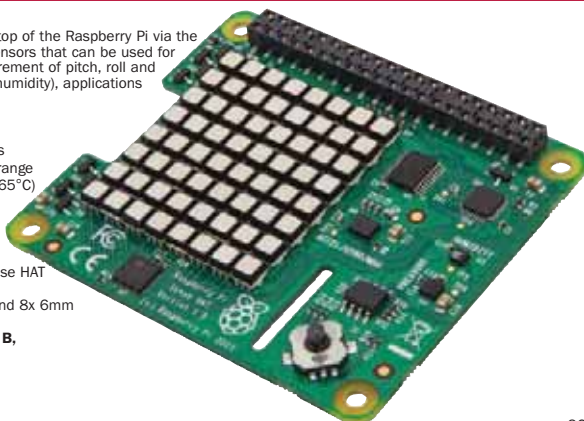

- The kit is used to securely mount the Sense HAT to the Raspberry Pi

Kit includes: 4x 11mm M2.5 Hex Spacers and 8x 6mm M2.5 Screws

Electric Paint

Draw circuits on a range of surfaces, solder components and repair devices and PCBs with electrically conductive paint. Electric Paint provides a great platform for discovering, playing, repairing and designing with electronics.

- Can be used as both a liquid wire and a conductive adhesive
- Nontoxic, solvent free and water soluble
- Works great on many materials including paper, plastic, textiles and conventional electronics
- Once applied the paint dries quickly at room temperature, and can be removed with soap and water

MK0005112	50ml Jar	£13.99

10ml Pen

This handy pen allows you to draw circuits and attach small components to your projects. The pen is a great prototyping tool for makers of all ages.

50ml Jar

Can be applied with a brush or roller. Allows you to paint and screen print capacitive surfaces.

Glowing House Set

Create your own voltage village with all the materials you need to make two glowing paper houses using Electric Paint. This fun activity is great for makers of all ages. Easy step-by-step instructions will show you how to decorate and assemble each house, draw a circuit with Electric Paint and attach components. As the light fades your houses will start to glow! Assemble the scenery and create your very own Voltage Village. Use your Glowing House Set to create a window display or night-light and get creative with electronics!

Each set contains:

- 2x Pre-cut Paper Houses
- 1x Electric Paint Pen
- 4x LEDs and 2x LDRs
- 2x Resistors

- 2x Transistors
- 2x Battery Clips
- 2x 9V Batteries
- Sticky Dots and Stickers (no glue required!)

Self-Setting Rubber

Form & Fix the stuff you love

Sugru is the exciting new self-setting rubber that can be formed by hand. It moulds like play-dough, bonds to almost anything and turns into a strong, flexible silicone rubber overnight. Developed by a team of product designers and material scientists, sugru's patented technology is unique in its combination of hand-formability, self-adhesion and flexibility when cured. It feels like modelling clay, and it's that easy to use too. Once cured, its durable properties mean it's comfortable in extreme environments from the dishwasher to the ocean in Antarctica.

Features:

- **Hand formable** - Can be shaped by hand for up to 30 minutes
- **Sticks to almost anything** - Forms strong bonds with aluminium steel, ceramics, glass, wood and other materials including plastics and silicone
- **Air cures at room temperature** - Cures to a tough flexible silicone overnight using the moisture in the air.
- **Strong & Durable** - Sugru can withstand up to anything the weather throws at it both wet or dry, hot or cold
- **Flexible** - When Sugru cures it becomes a flexible rubber which means you can repair things that need to move such as cables and textiles

- **Soft & grippy** - As a silicone rubber it feels soft to touch but also very grippy, perfect for making comfortable handles
- **Temperature resistant** - Sugru is resistant from -50°C to 180°C and does not get softer or harder
- **Waterproof** - Being the nature of silicone rubber it is completely waterproof and easy to clean.
- **Removable** - Once cured Sugru can easily be removed by cutting it off with a sharp knife and removing the residue with fingers or tissue

Make: Learn to Solder

Learn the fundamentals of soldering and pick up an essential skill for building electronic gadgets. You'll discover how to preheat and tin your iron, make a good solder joint, desolder cleanly (when things don't quite go right), and how to use helping hands to hold components in place.

This concise book is part of MAKE's Getting Started with Soldering Kit. Using the tools in the kit and some electronic components, you can practice soldering while making fun blinky objects. Then show the world you just learned a new skill by wearing the Learn to Solder Skill Badge.

- Learn how to prepare your workspace
- Get to know the components you'll work with
- Use the best methods for soldering components in place
- Experience the perfect solder joint
- Know how to desolder when things don't work the first time

Arduino Robot Kit

There are a number of ways to build an Arduino robot, the assembly of this robot is already done, so this means you can start with the programming immediately. The AREXX Arduino robot is an autonomous, multiple sensor robot. Besides two Odometer sensors and an optical unit to track a line it has several LED indicators, and free programmable I/Os. With the integrated USB programmer it is comfortable programming via PC, there is also an ISP connector for bootloader programming. The programming is done in an Arduino open-source development environment that is based on a simplified C-dialect. This Arduino robot is simplified by the C programming language dialect and very well suited for school and education. With the many expansion kits there is still a complete world to discover and to experiment with your own ideas and developments.

K8200 3D Printer Kit

It's a build it yourself 3D printer kit to print objects of maximum 20x20x20cm using PLA or ABS filament (3mm plastic wire). It is an extremely fast, reliable and precise printer even when printing at higher speeds. The K8200 is compatible with all free RepRap software and firmware. It is made out of aluminum profiles and is easy to assemble, it leaves room to the user to freely alter the machine and modify it to their liking. The print bed is heated.

Features:

- Linear ball bearings: 8 and 10mm
- Technology: FFF (Fused Filament Fabrication) for PLA and ABS
- Power supply: 12V/3A max.
- FTDI USB 2.0 to Serial
- Dimensions of printable area: 20x20x20cm
- Typical printing speed: 120mm/s
- Maximum print speed: 150 to 300mm/s
- Extrusion nozzle: 0.5mm
- Extrusion thermistor: NTC 100K
- Extruded aluminum profiles: 27.5mm/1.08" wide
