

# A4 MFPs and Printers Range Brochure

Document Solutions

[www.sharp.eu](http://www.sharp.eu)

**SHARP**  
Be Original.

# Simply smarter and more secure.

Easily and safely create, access and share business information – wherever you are and whatever your needs.

Sharp's expanded range of colour and black and white A4 Multi-Functional Printers (MFPs) and Printers offers intuitive ease-of-use, intelligent connectivity and effortless mobility. They act as a reliable, high-speed, high-quality and secure information hub that can grow with your business.

Designed to make life easier, every model features an enhanced feature set and smart functionality, including touchscreens\* and Sharp's award-winning Easy User Interface (UI)\*. So you save time and effort when completing tasks and work more flexibly and productively. And where space is an issue, whether you're working from home or the office, our ultra-compact business entry-level range deliver speed, efficiency and essential document functionality with no compromise on quality.

In addition, you can quickly access and share documents anytime and anywhere, as our MFPs and Printers easily integrate with existing network applications and public cloud services, including box and Dropbox. Your valuable information is always robustly protected by military-grade security that ensures compliance with latest data management and security regulations, such as General Data Protection Regulation (GDPR).

A variety of high-efficiency features also help you reduce running costs and protect the environment. For example, you can save paper and toner with double-sided printing. Automatic, configurable power settings ensure that they only switch on during set hours. Our low-melt\* toner reduces the energy consumption on every print or copy run. And you can choose the most environmentally friendly settings – such as Eco Scan, which prevents unnecessary functions from powering up.

\* Not available on all models, please see individual product specification for details.

# Keeping your data safer.

To ensure that your sensitive information is always secure, all of our MFPs and Printers include the most stringent protection as standard.

## Proactive access control

To prevent any unauthorised use, these devices automatically monitor access attempts and only grant access to applications and operating firmware that are on an approved whitelist. Any other external applications are instantly blocked, logged and reported. Digital signatures on firmware updates also help to keep hackers at bay.

## Automatic validation

Information that is exchanged between an MFP/Printer and another application or email system can be intercepted or compromised. So these devices provide the same high-level protection used by many government organisations. Their SSL Certificate Validation automatically checks that all third-party servers communicating with your device are safe, in order to prevent any unauthorised or malicious attempts to access your information.

## Safer email communication

Any documents you email directly from the MFP/Printer are encrypted using the S/MIME standard. It ensures they can't be intercepted during transmission and are validated as authentic using advanced electronic signatures.

## User authentication

Users of your devices can be authenticated using a variety of methods, including card readers, PINs or passwords, to suit your preferred security protocols. Once users are authenticated, the connection to your network is fully secure.

## Powerful encryption

Any print job data that is temporarily stored on a device's hard disk\* is automatically encrypted and then wiped to prevent any unauthorised access.

## Serverless print release

Selected MFPs/Printers come with serverless print release technology as standard. With this function, IT administrators can designate a primary device that works as a print server enabling users to securely print a job and release it at any of the five supported MFPs/Printers on the network. Users can simply walk up to the most convenient device and quickly release their print jobs.

## Always on guard

The system at the heart of your MFP/Printer can become corrupted if an update fails or if it's the target of a malicious attack. However, our MFPs include an innovative Self-Healing System\*. A master copy of the device's settings is backed up and can be used to safely recover the device if there is ever a problem. It also avoids any disruption to your business and ensures that valuable information and intellectual property is robustly protected.

\* Not available on all models, please see individual product specification for details.

# Work smarter, not harder.

Simply get more done in less time with effortless ease-of-use, performance enhancing functionality and a host of time-saving features.

## A touch simpler

Our devices feature an LCD touchscreen control panel with Sharp's award-winning Easy UI\*, which provides an intuitive display and easy access to commonly used functions. Or you can customise it to suit your own way of working simply by dragging and dropping the menu icons.

Sharp's award-winning user interface - designed to make life easier.

## The perfect finish

Give your documents a truly professional look with a range of finishing and preview functions.

You can flexibly handle a variety of media, including cardstock, small media and envelopes, from the main tray or the multi-bypass tray. And you can choose from a compact in-line staple finisher or a professional finisher with multi-position stapling and hole punch.

If you are directly printing Microsoft® Office (docx, xlsx, pptx) files, the preview function\* also lets you to check the finish quality of each document before they are actually printed.

\* Not available on all models, please see individual product specification for details.

### Flexibility as standard

With speeds ranging from 30 up to 66ppm and the ability to handle weights up to 300gsm, as well as a range of paper handling and finishing options, there's an MFP or Printer to suit your needs.

In addition, on selected models, Sharp's Application Portal allows administrators to easily add new applications and update existing ones directly from the touchscreen. The models are also equipped with enhanced productivity features, such as the ability to feed multiple envelopes from the standard or bypass paper drawer.

### Quick printing and scanning

What could be easier than walking up to your device and printing whatever you want without even logging into your PC? Simply insert a USB memory stick in the MFP/Printer and immediately access and print images and Microsoft® Office files. You can also scan and save documents straight to the USB stick.

### Easy document capture

Rather than having to retype documents when you only have a hard copy, you can use Optical Character Recognition (OCR)\* to scan and capture them in various digital formats, including fully searchable PDFs and editable Microsoft® Office files.

### Consistently high quality

Our MFPs and Printers can produce up to 1200 x 1200dpi quality documents with accurate colours and fine text definition.

Text and graphics on documents from any application are accurately reproduced using Adobe PostScript® 3™\*, while an image density sensor maintains a consistent image quality from first page to the last. Our colour devices also use PANTONE®\* technology to ensure precision reproduction of colours. So you can produce professional looking documents in-house without paying a premium.

And when you are scanning, the Auto Set function\* automatically adjusts the settings to optimise the resolution, page size and orientation.

\*Not available on all models, please see individual product specification for details.

# Connections made easy.

Effortless connectivity means you can print, copy, scan and share the information you need quickly and efficiently wherever you're working.

For even greater flexibility, any WiFi enabled laptop, tablet or smartphone can directly connect to the device without the need to set up a wireless LAN. It allows you to print from a much broader range of devices and in a wider variety of business environments.

And if you operate separate networks in the same workplace, which might have different security or usage restrictions, everyone can still share the same MFP/Printer. The devices that support dual LANs<sup>\*1</sup> can be connected to two different networks, one of which could be wireless.

## One simple sign on

There's no need to remember additional usernames and passwords. Instead, you can quickly access public cloud services using Single Sign On (SSO). It lets you securely print and store information using Google Drive™, OneDrive® for Business, SharePoint® Online, box, Dropbox with just one log in from the control panel. There's also a Gmail connector for scanning to email and Exchange Online (MS 365 email)<sup>\*1</sup>.

## Made for mobility

You'll love how fast and hassle-free printing from a mobile device is. You can link to the MFP/Printer in seconds by simply holding it over the Near Field Communication (NFC) card reader<sup>\*1\*2</sup> or by scanning the device's QR code<sup>\*1\*3</sup>. Either way, it configures everything for you.

You can then print from and scan to mobiles and tablets over your wireless network or print from any app that supports Google Cloud Print™, AirPrint or any Android device with the Sharp Print Service Plugin.

## Simpler to manage

Printing or receiving information directly from your business systems and cloud-based applications is made much simpler with Sharp OSA® (Open Systems Architecture). And Sharp's Application Portal<sup>\*1</sup> makes the device more adaptable by providing software updates and cloud connector apps that enable agile updating.

<sup>\*1</sup> Not available on all models, please see individual product specification for details.

<sup>\*2</sup> For Android devices.

<sup>\*3</sup> For both iOS and Android devices.

# Transforming the way you work.

Our range of A4 colour and black & white MFPs and Printers are designed to improve the productivity and efficiency of businesses of all sizes.

From desktop size to floor-standing workgroup size, our full range of models can satisfy the needs of almost any business and any budget:

- Business Entry Level:** Compact and affordable MFPs and Printers with a range of advanced performance and security features.
- Business Workgroup:** Scalable MFPs and Printers offering the functionality and flexibility to maximise efficiency and productivity.
- Business Professional:** Fast, reliable and powerful network MFPs and Printers that are feature rich and easy to use and access, anytime and anywhere.

## Essential features – at a glance

# Business Entry Level.

These compact MFPs and Printers deliver all the speed and efficiency benefits you'd expect from a larger device, but are small enough to be used wherever you need. As well as their modern design and space-efficient modular configuration, we've also included robust security features that keep your documents and devices secure. These devices will suit any work environment, whether you need a desktop or a floor-standing configuration or want to create colour or black & white documents.

## MX-C358F

A colour LCD touchscreen that can tilt for easy viewing and the intuitive Easy UI ensures that everything, from everyday functions to the most complex processes, is made much simpler. And you can send scanned documents to a cloud repository of your choice and retrieve them whenever you want. In addition, robust security features ensure that your data is secure and compliant at all times.

Featuring ethernet, USB, mobile or wireless connectivity, this colour MFP will fit perfectly into any modern business environment, and its small footprint means you can place it almost anywhere in the office.

With a paper capacity that can grow to 2001 sheets you can produce professional colour output in-house on a flexible range of media, such as cardstock, small media and envelopes, from the main tray or a convenient single-sheet feeder. Plus the easy-to-install optional stapler\* lets you manually staple up to 20 sheets at the MFP without the need of a conventional stapler.

## MX-B427W/MX-B468F/MX-B468P/MX-B427PW

With built-in wireless connectivity\* you can unlock a whole new way of working that gets things done faster and with less wasted effort. These black & white MFPs and Printers give you the flexibility to work on mobile phones and tablets, as well as desktops and laptops, and place your device in the most useful locations.

They have a large maximum paper capacity and can accommodate a wide variety of paper sizes, including A6 and media up to 217gsm. So they can easily handle a variety of personal or workgroup needs, but require very little user intervention during the day. Features that save you even more time and money include a built-in duplex module for efficiently making two-sided printouts.

Whether you're working from home or the office, these ultra-compact space-saving devices offer speed and flexibility; providing you with essential document functionality, versatility, ease of use and smart built-in security features that keep your documents safe.

# Business Workgroup.

These space-saving, colour and black & white MFPs and Printers provide the high-speed, easy-to-use functionality and productivity-enhancing tools you need to do much more in much less time. Robust security ensures that your data is always safe, while expandable and flexible configurations mean that they can support the needs of even the most demanding of business environments.

## **MX-C528F/MX-C428F/MX-C428P**

These colour MFPs and Printers provide the speed to enhance productivity combined with the functionality and reliability you need to work more efficiently. With the ability to print a single colour page in as little as 6 seconds, you can power through complex print jobs, even with large, high-resolution photos and graphics. And convenient direct printing from USB drives, network drives or cloud repositories saves you even more time.

Digital workflows and paper documents won't slow you down either. The MFPs (MX-C528F/MX-C428F) can scan up to 98 ipm and feature a powerful quad-core processor, so your information is captured and made available to you and your network applications fast.

## **MX-C304WH/MX-C303WH**

With layers of the most advanced security and access controls, these colour MFPs keep your valuable business information secure. They also enable flexible workflows, providing exceptional ease-of-use, simple connectivity and effortless mobility to optimise workforce efficiency. Their intuitive operation means that even the most complex processes are made simple. You can scan and digitise documents in duplex at speeds of up to 110ipm.

This fast document digitisation is perfect for busy environments, like reception areas, where time is short. Their compact design and extensive feature set also means that they combine the convenience of a desktop machine with the enterprise-class performance of a larger device.

## **MX-B456WH/MX-B356WH**

Enjoy fast and convenient printing, copying and scanning with output speeds of up to 45ppm in black & white and superfast scanning of documents in duplex at speeds of up to 110ipm. The advanced layers of security and access controls provide protection for both your network and your data. As a result, you can enjoy complete peace of mind knowing that your business and its data are proactively protected by the highest level of security.

They feature a 7" LCD touchscreen, which can be tilted and customised to suit your way of working. And you can also produce high-volume, high-quality documents thanks to their standard 550 sheet paper capacity (expandable to 2,350 sheets) and professional finishing capabilities.

# Business Professional.

These professional colour and black & white MFPs and Printers are feature rich, secure, high-performance, reliable devices for the most demanding of office environments. They will seamlessly fit into any busy workflow, so you can quickly boost your productivity and efficiency.

## **MX-C607F/MX-C557F**

With print speeds of up to 57ppm and scan speeds of 114ipm these colour MFPs are perfect for the most demanding of workgroups, ensuring that your data is printed or captured and shared to your network applications fast.

Their true 1200 x 1200dpi colour print quality delivers outstanding professional results. You can print on different media types up to 300gsm, enabling you to produce a wide variety of high-quality documents in-house – especially if you attach one of the finishers with stapling and hole punch capabilities. And a 10” LCD touchscreen with the Sharp Easy UI makes them really easy-to-use for everyone, while also giving secure and easy access to workflow applications.

## **MX-C607P**

Fast and flexible, this colour printer delivers top quality output. You can choose from a range of configurations designed to suit any workgroup, and print and connect from anywhere on any kind of device using the optional wireless or NFC interface. With robust security features you can be sure your data is always secure. And long-life consumables and a huge paper capacity of up to 4,500 sheets mean that user interventions are kept to a minimum.

## **MX-B707F/MX-B557F**

With superfast printing of up to 66ppm and high-speed scanning of up to 144ipm, these A4 MFPs deliver every time. Multiple expandable configuration options with stapling, hole punching and stacking, combined with the need for minimal user interventions make them ideal for the most demanding of environments. A 10” LCD touchscreen with the Sharp Easy UI also ensures ease-of-use and effortless connectivity to workflow applications. With their robust security you can also rest assured that your data is safe.

## **MX-B707P/MX-B557P**

Get the documents you need when you need them with print speeds of up to 66ppm and a powerful and reliable performance. These black & white printers also have a paper capacity of up to 4,400 sheets and options such as stacking, hole punching and stapling. So they need little user intervention but will significantly boost the productivity of large workgroups, while also keeping your data safe with robust security.

## Welcome to Sharp

Sharp Information Systems Europe (SISE), a division of Sharp Electronics Europe, offers a comprehensive portfolio of award-winning document management and display solutions to help organisations transform the way they engage with information. Sharp's industry-leading MFPs and high-volume systems sit at the heart of integrated applications for digital transformation.

Sharp's proprietary Open Systems Architecture (OSA) technology transforms MFPs into powerful information portals, seamlessly integrating to the cloud and third-party business applications.

By facilitating the transition to new equipment, methods and processes, Sharp Managed Services help improve how businesses interact with information through enhanced digital workflows and more collaborative working.

Sharp also offer a range of display solutions that include video walls for immersive entertainment, digital signage and innovative interactive touchscreens for engaging presentations.

Our mission is to develop new products that support individual expression; creating life enhancing experiences that let you be original.
