Attention: Authorization and Evaluation Division

Subject: RFI related modifications incorporated into unit with
17" COLOR MONITOR -- FCC ID: ARSCM791H
(Class II Permissive Change)

Dear Sirs:

This unit was granted on June 19, 2001. The Class II Permissive Change is due to the addition of one D-Sub input function.

This letter serves as our declaration that all modifications listed below were implemented in the sample submitted for testing. We further declare that the same modifications will be implemented into all production units to enhance compliance of the units to FCC limits.

The modifications include the following:

- 1) Added a ferrite core on the degaussing wires connected to main board with 2 turns. (see photo 9)
- 2) Added a ferrite core on the wires connecting main board and control board. (see photo 9)
- 3) Added two capacitors on the solder side of main board for electrical improvement only, not for EMI. They will be built into component side after circuit re-layout. (see photo 12)

If you have any further questions or comments regarding the above, please don't hesitate to contact Mr. Jonson Lee of ADT Lab. at fax No.:886-2-2602-2943 or E-mail: jonson_lee@mail.adt.com.tw

Sincerely yours,

Frank Yang / R&D Project Manager
