ThinkAgile MX3530 and MX3531 2U Appliances and Certified Nodes (Intel Xeon SP Gen 3)
Product Guide

The Lenovo ThinkAgile MX3530 and MX3531 2U Appliances & Certified Nodes are 2-socket 2U systems that are designed for deploying highly available, highly scalable hyper-converged infrastructure (HCI) and software-defined storage (SDS) from Microsoft on Lenovo enterprise platforms that feature the 3rd Gen Intel Xeon Scalable processors. The MX systems deliver fully validated and integrated Lenovo hardware and firmware that is certified for Microsoft Azure Stack HCI solutions.

The MX 2U systems are available either as an Appliance (MXnnn0) or Certified Node (MXnnn1):

- MX3530-H and MX3531-H with hybrid storage
- MX3530-F and MX3531-F with all-flash storage

MX Appliances deliver fully validated and integrated Lenovo hardware and firmware, certified and preloaded with licensed Microsoft Azure software. They also include ThinkAgile Advantage support with one single point of contact for support of the hardware and software.

MX Certified Nodes deliver fully validated Lenovo hardware and firmware, certified and can be preloaded with Microsoft Azure software. Certified Nodes do not include licenses to Microsoft Azure software and enhanced software support.

Figure 1. Lenovo ThinkAgile MX3530 and MX3531 2U Appliances & Certified Nodes with 2.5-inch drive bays

Did you know?

The ThinkAgile MX3530 and MX3531 2U Appliances & Certified Nodes are built on industry-leading Lenovo ThinkSystem servers that feature enterprise-class reliability, management, and security. They deliver fully validated and integrated hardware and firmware that is certified for Microsoft Azure Stack HCI solutions.

The MX3530-F and MX3530-H appliances offer ThinkAgile Advantage Single Point of Support for quick 24/7 problem reporting and resolution.

Key features

Combining performance and flexibility, the MX 2U systems systems are a great choice for enterprises of all sizes. The systems offer a broad selection of processors, memory and drives, and offers high performance features that industries such as finance, healthcare and telco need. Outstanding reliability, availability, and serviceability (RAS) and high-efficiency design can improve your business environment and can help save operational costs.

ThinkAgile MX Series platforms offer the choice of Azure Stack HCI Appliance (Integrated System) or Azure Stack HCI Certified Node. These validated platforms help modernize on-premises infrastructure with pre-tested, pre-configured, and easy-to-order configurations, with seamless Azure integration. As a new direct and indirect Microsoft Cloud Solution Provider, Lenovo offers cloud services and subscriptions through the Lenovo Cloud Marketplace, which enable HCI use cases with the ThinkAgile MX platforms.

- The appliances include the Azure Stack HCI operating system, which is delivered as an Azure subscription service via the Microsoft CSP program. It also includes ThinkAgile Advantage support with one single point of contact for support of the hardware and warm-case transfer for software. Deployment and Update features in Windows Admin Center and tight integration with Lenovo XClarity make cluster management, hardware and software update management & enforcing site-wide policies easy for administrators. Azure hybrid by design, native integration with Azure services makes it easy for customers to adopt a hybrid cloud strategy for their workloads and use cases.
- The certified nodes deliver fully validated and integrated Lenovo hardware and firmware that is certified for Microsoft Azure Stack HCI solutions. These HCI Certified Nodes have the option of Windows Server 2019 Datacenter Edition for HCI functionality, and guest licenses are included.

Appliance features

The ThinkAgile MX Appliances offers the following key features:

- Quick and convenient path to implement a hyperconverged solution powered by the new Azure Stack HCI OS with Hyper-V virtualization, Microsoft Storage Spaces Direct (S2D), Software Defined Storage (SDS), and Software Defined Networking (SDN) network virtualization.
- Streamlined management of Azure Stack HCI with unified single-pane-of-glass for creating and managing VMs, S2D volumes, and virtual networks through Windows Admin Center.
- Consistent, low latency performance with hypervisor-embedded architecture, built-in read and write cache, and support for NVMe PCIe drives.
- Provides per-VM storage performance management with policy-driven Quality of Service (QoS) and continuous built-in monitoring and alerting with cluster-wide performance and capacity metrics.
- Can sustain drive, server, or component failures with built-in resiliency for continuous availability.
- GPU support to enable AI training, inferencing and data visualization scenarios, HPC workloads, virtual desktops and graphics intensive applications.
- Built on proven and reliable Lenovo ThinkSystem servers that provide compute power and space efficiency for a variety of edge workloads and applications.
- Provides comprehensive hardware management with advanced systems management capabilities with XClarity
- Delivers fully validated and integrated hardware and firmware that is certified for Microsoft Azure Stack HCI solutions.
- Ready for out-of-box deployment with the mandatory Azure Stack HCI OS preloaded, with the option to purchase a Windows Server 2019 Datacenter or Windows Server 2022 Datacenter license if unlimited guest OS VMs are desired.
- Includes Lenovo ThinkAgile Advantage Single Point of Support for quick 24/7 problem reporting and resolution.
- Optional Lenovo deployment services to get customers up and running quickly.

Certified Node features

The ThinkAgile MX Certified Node offers the following key features:

- Quick and convenient path to implement a hyperconverged solution powered by Windows Server 2019 Datacenter or Windows Server 2022 Datacenter with Hyper-V virtualization, Microsoft Storage Spaces Direct (S2D), Software Defined Storage (SDS), and Software Defined Networking (SDN) network virtualization.
- Streamlined management of Azure Stack HCI with unified single-pane-of-glass for creating and managing VMs, S2D volumes, and virtual networks through Windows Admin Center.
- Consistent, low latency performance with hypervisor-embedded architecture, built-in read and write cache, and support for NVMe PCIe drives.
- Provides per-VM storage performance management with policy-driven Quality of Service (QoS) and continuous built-in monitoring and alerting with cluster-wide performance and capacity metrics.
- Can sustain drive, server, or component failures with built-in resiliency for continuous availability.
- GPU support to enable AI training, inferencing and data visualization scenarios, HPC workloads, virtual desktops and graphics intensive applications.
- Built on proven and reliable Lenovo ThinkSystem servers that provide compute power and space efficiency for a variety of edge workloads and applications.
- Provides comprehensive hardware management with advanced systems management capabilities.
- Delivers fully validated and integrated hardware and firmware that is certified for Microsoft Azure Stack HCI solutions.
- Ready for out-of-box deployment with the optional Windows Server 2019 Datacenter, Windows Server 2022 Datacenter, or Azure Stack HCI OS preload.
- Provide flexibility in using the existing Microsoft Windows Server 2019 or 2022 enterprise license agreements or purchasing new software licenses from Microsoft or Lenovo.
- Optional Lenovo deployment services to get customers up and running quickly.

Hardware features

The MX 2U systems are based on the SR650 V2 and have the following hardware features:

Scalability and performance

The MX 2U systems offer numerous features to boost performance, improve scalability and reduce costs:

- Supports two third-generation Intel Xeon Processor Scalable processors
  - Up to 40 cores and 80 threads
  - Core speeds of up to 3.6 GHz
  - TDP ratings of up to 270W
- Support for up to 32 TruDDR4 memory DIMMs operating at up to 3200 MHz means you have the fastest available memory subsystem.
- Supports configurations of 2 DIMMs per channel to operate at the 3200 MHz rated speed of the memory DIMMs.
- Using 128GB 3DS RDIMMs, the server supports up to 4TB of system memory.
- Supports single-width GPUs or double-wide GPUs, for substantial processing power in a 2U system.
- Configurations with 2.5-inch drives support up to 28x hot-swap drives, all front or rear accessible
- Configurations with 3.5-inch drives support up to 12x 3.5-inch hot-swap front-accessible drives plus either 4x 3.5-inch or 4x 2.5-inch hot-swap rear-accessible drives
- Supports 24x NVMe drives without oversubscription of PCIe lanes (1:1 connectivity). The use of NVMe drives maximizes drive I/O performance, in terms of throughput and latency.

- Supports high-speed HBA controllers providing 12 Gb SAS connectivity to the drive backplanes.

- Supports up to two externally accessible 7mm hot-swap drives with RAID functionality for operating system boot functions.

- Supports M.2 drives for convenient operating system boot functions. Available M.2 adapters support either one M.2 drive or two M.2 drives in a RAID 1 configuration for performance and reliability.

- The server has a dedicated industry-standard OCP 3.0 small form factor (SFF) slot, with a PCIe 4.0 x16 interface, supporting a variety of Ethernet network adapters. A simple-swap mechanism with a thumbscrew and pull-tab enables tool-less installation and removal of the adapter. The adapter supports shared BMC network sideband connectivity to enable out-of-band systems management.

- The server offers PCI Express 4.0 I/O expansion capabilities that doubles the theoretical maximum bandwidth of PCIe 3.0 (16GT/s in each direction for PCIe 4.0, compared to 8 GT/s with PCIe 3.0). A PCIe 4.0 x16 slot provides 64 GB/s bandwidth, enough to support a 200GbE network connection.

- The server offers up to eight PCIe 4.0 slots, all with rear access, plus an internal bay for a cabled HBA, plus a slot dedicated to the OCP adapter.

Availability and serviceability

The MX 2U systems provide many features to simplify serviceability and increase system uptime:

- The server offers Single Device Data Correction (SDDC, also known as Chipkill), Adaptive Double-Device Data Correction (ADDDC, also known as Redundant Bit Steering or RBS), and memory mirroring for redundancy in the event of a non-correctable memory failure.

- The server offers hot-swap drives, providing greater system uptime.

- Available internal M.2 RAID Boot Adapters support RAID-1 which can enable two SATA or two NVMe M.2 drives to be configured as a redundant pair.

- A pair of rear-accessible 7mm hot-swap boot drives can be accessed without removing the cover or powering down the server.

- The server has up to two hot-swap redundant power supplies and up to six hot-swap redundant fans to provide availability for business-critical applications.

- The light path diagnostics feature uses LEDs to lead the technician to failed (or failing) components, which simplifies servicing, speeds up problem resolution, and helps improve system availability.

- Solid-state drives (SSDs) offer more reliability and performance than traditional mechanical HDDs for greater uptime.

- Proactive Platform Alerts (including PFA and SMART alerts): Processors, voltage regulators, memory, internal storage (SAS/SATA HDDs and SSDs, NVMe SSDs, M.2 storage, flash storage adapters), fans, power supplies, server ambient and subcomponent temperatures. Alerts can be surfaced through the XClarity Controller to managers such as Lenovo XClarity Administrator, VMware vCenter, and Microsoft System Center. These proactive alerts let you take appropriate actions in advance of possible failure, thereby increasing server uptime and application availability.

- The built-in XClarity Controller continuously monitors system parameters, triggers alerts, and performs recovery actions in case of failures to minimize downtime.

- Built-in diagnostics in UEFI, using Lenovo XClarity Provisioning Manager, speed up troubleshooting tasks to reduce service time.

- Lenovo XClarity Provisioning Manager supports diagnostics and can save service data to a USB key drive or remote CIFS share folder for troubleshooting and reduce service time.

- Auto restart in the event of a momentary loss of AC power (based on power policy setting in the XClarity Controller service processor)

- Offers a diagnostics port on the front of the server to allow you to attach an external diagnostics handset for enhanced systems management capabilities.

- Support for the XClarity Administrator Mobile app running on a supported smartphone or tablet and

connected to the server through the service-enabled USB port, enables additional local systems management functions.

- Three-year or one-year customer-replaceable unit and onsite limited warranty (varies by geography), 9 x 5 next business day. Optional service upgrades are available.

Manageability and security

Systems management features simplify local and remote management of the MX 2U systems:

- The server includes an XClarity Controller (XCC) to monitor server availability. Optional upgrade to XCC Advanced to provide remote control (keyboard video mouse) functions. Optional upgrade to XCC Enterprise enables the additional support for the mounting of remote media files (ISO and IMG image files), boot capture, and power capping.
- Lenovo XClarity Administrator offers comprehensive hardware management tools that help to increase uptime, reduce costs and improve productivity through advanced server management capabilities.
- UEFI-based Lenovo XClarity Provisioning Manager, accessible from F1 during boot, provides system inventory information, graphical UEFI Setup, platform update function, operating system installation function, and diagnostic functions.
- Support for Lenovo XClarity Energy Manager, which captures real-time power and temperature data from the server and provides automated controls to lower energy costs.
- An integrated industry-standard Unified Extensible Firmware Interface (UEFI) enables improved setup, configuration, and updates, and simplifies error handling.
- Support for industry standard management protocols, IPMI 2.0, SNMP 3.0, Redfish REST API, serial console via IPMI
- An integrated hardware Trusted Platform Module (TPM) supporting TPM 2.0 enables advanced cryptographic functionality, such as digital signatures and remote attestation.
- Administrator and power-on passwords help protect from unauthorized access to the server.
- Supports Secure Boot to ensure only a digitally signed operating system can be used. Supported with HDDs and SSDs, as well as 7mm and M.2 drives.
- Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.
- Intel Execute Disable Bit functionality can prevent certain classes of malicious buffer overflow attacks when combined with a supported operating system.
- Intel Trusted Execution Technology provides enhanced security through hardware-based resistance to malicious software attacks, allowing an application to run in its own isolated space, protected from all other software running on a system.
- Additional physical security features are an available chassis intrusion switch and available lockable front bezel.

Energy efficiency

The MX 2U systems offer the following energy-efficiency features to save energy, reduce operational costs, and increase energy availability:

- Energy-efficient system board components help lower operational costs.
- High-efficiency power supplies with 80 PLUS Platinum and Titanium certifications
- Solid-state drives (SSDs) consume as much as 80% less power than traditional spinning 2.5-inch HDDs.
- The server uses hexagonal ventilation holes, which can be grouped more densely than round holes, providing more efficient airflow through the system and thus keeping your system cooler.
- Optional Lenovo XClarity Energy Manager provides advanced data center power notification, analysis, and policy-based management to help achieve lower heat output and reduced cooling

needs.

Components and connectors

The ThinkAgile MX3530 and MX3531 2U Appliances & Certified Nodes are based on the ThinkSystem SR650 V2 server.

The following figure shows the front of the MX 2U systems with 2.5-inch drives.
Figure 2. Front view of the MX 2U systems with 2.5-inch drives

The following figure shows the front of the MX 2U systems with 3.5-inch drives.
Figure 3. Front view of the MX 2U systems with 3.5-inch drives

The following figure shows the components visible from the rear of the system. The figure shows one configuration, with eight PCIe slots, however there are additional rear configurations which include 3.5-inch drive bays, 2.5-inch drive bays, or 7mm drive bays.
Figure 4. Rear view of the MX 2U systems (configuration with eight PCIe slots)

The following figure shows the locations of key components inside the systems.

Figure 5. Internal view of the MX 2U systems

Standard specifications

The ThinkAgile MX3530 and MX3531 2U Appliances & Certified Nodes are based on the ThinkSystem SR650 V2 server.

The following table provides an overview comparison between the MX systems.

Table 1. Comparison of features

|	MX3530-H Appliance MX3531-H Certified Node	MX3530-F Appliance MX3531-F Certified Node
MX offering type	Appliance Certified Node	Appliance Certified Node
Target workloads	Database, VDI	Database, VDI, stretched cluster, AI/ML
Base MTM	7D6BCTO1WW (Appliance) 7D66CTO1WW (Certified Node)	7D6BCTO2WW (Appliance) 7D66CTO2WW (Certified Node)
Form Factor	2U	2U
Base platform	SR650 V2	SR650 V2
CPU	2x Intel Xeon SP Gen 3	2x Intel Xeon SP Gen 3
Memory	32x DDR4 3200 MHz (4TB maximum)	32x DDR4 3200 MHz (4TB maximum)

Drive Bays	• Front bay choices:
	  ○ 12x 3.5" SAS/SATA
	  ○ 12x 3.5" AnyBay
	• Rear bay choices
	  ○ 2x 3.5" SAS/SATA
	  ○ 4x 3.5" SAS/SATA
	  ○ 4x 2.5" SAS/SATA
		• Front bay choices:
		  ○ 24x 2.5" SAS/SATA
		  ○ 16x 2.5" NVMe
		  ○ 24x 2.5" NVMe
		  ○ 16x 2.5" SAS/SATA + 8x 2.5" AnyBay
		• Rear bay choices
		  ○ 4x 2.5" SAS/SATA

Drive configurations	Hybrid storage:
	• Drive choices:
	  ○ HDDs for capacity
	  ○ SAS or NVMe SSDs for cache
	• Minimum 2, maximum 6 cache drives
	• Minimum 4 capacity drives
	• For configs with 4x 2.5" rear drives, rear drives are for cache
	• Minimum of 1:10 Cache:Capacity required
		All Flash storage:
		• Drive choices:
		  ○ All SAS/SATA for cache & capacity
		  ○ All NVMe for cache & capacity
		  ○ NVMe cache with SAS/SATA capacity
		• For configs with 1 type of SSD installed: minimum 4 drives
		• For configs with different cache and capacity drives: minimum 2 for cache, minimum 4 for capacity
		• Minimum of 1:10 Cache:Capacity required

HBA	• 430-16i HBA	• 430-8i HBA • 430-16i HBA • 440-16i Internal HBA
Boot drives	• 2x M.2 non-hot-swap SATA • 2x 7mm hot-swap drives	• 2x M.2 non-hot-swap SATA • 2x 7mm hot-swap drives
OCP networking	1x OCP 3.0 adapter: 1Gb, 10Gb, 25Gb	1x OCP 3.0 adapter: 1Gb, 10Gb, 25Gb
PCIe networking	Up to 8x adapters: 1Gb, 10Gb, 25Gb, 100Gb	Up to 8x adapters: 1Gb, 10Gb, 25Gb, 100Gb
GPUs	• 3x DW GPU 300W each • 8x SW GPU 75W each • 4x SW GPU 150W each	• 3x DW GPU 300W each • 8x SW GPU 75W each • 4x SW GPU 150W each

The following table lists the standard specifications.

Table 2. Standard specifications

Components	Specification
Machine types	7D6B - 2U Appliance - 3 year warranty 7D66 - 2U Certified Node - 3 year warranty
Form factor	2U rack
Processor	One or two third-generation Intel Xeon Scalable processor (formerly codenamed "Ice Lake"). Supports processors up to 40 cores, core speeds of up to 3.6 GHz, and TDP ratings of up to 270W.
Chipset	Intel C621A "Lewisburg" chipset, part of the platform codenamed "Whitley"
Memory	32 DIMM slots with two processors (16 DIMM slots per processor). Each processor has 8 memory channels, with 2 DIMMs per channel (DPC). Lenovo TruDDR4 RDIMMs and 3DS RDIMMs are supported. DIMMs operate at up to 3200 MHz at 2 DPC.
Persistent memory	Supports up to 16x Intel Optane Persistent Memory 200 Series modules (8 per processor) installed in the DIMM slots. Persistent memory (Pmem) is installed in combination with system memory DIMMs.
Memory maximum	With RDIMMs: Up to 4TB by using 32x 128GB 3DS RDIMMs With Persistent Memory: Up to 6TB by using 16x 128GB 3DS RDIMMs and 16x 256GB Pmem modules
Memory protection	ECC, SDDC (for x4-based memory DIMMs), ADDDC (for x4-based memory DIMMs, requires Platinum or Gold processors), and memory mirroring.
Disk drive bays	- MX3530-H Appliance and MX3531-H Certified Node: - Front drive bays: 12x 3.5" SAS/SATA or 12x 3.5" AnyBay - Rear drive bays: 2x or 4x 3.5" SAS/SATA or 4x 2.5" SAS/SATA - MX3530-F Appliance and MX3531-F Certified Node - Front drive bays: 24x 2.5" SAS/SATA or 24x 2.5" NVMe or 16x 2.5" SAS/SATA + 8x AnyBay - Rear bay choices: 4x 2.5" SAS/SATA - OS boot support: - Internal M.2 module supporting up to two M.2 SATA drives - Rear accessible 2x 7mm hot-swap drives, SATA or NVMe

Components	Specification

Storage controller	• Onboard NVMe ports (RAID not supported)
	• 12 Gb SAS/SATA non-RAID:
	    ○ 430-8i HBA
	    ○ 430-16i HBA
	    ○ 440-16i Internal HBA

Network interfaces	Dedicated OCP 3.0 SFF slot with PCIe 4.0 x16 host interface. Supports 10GbE and 25GbE network connectivity. One port can optionally be shared with the XClarity Controller (XCC) management processor for Wake-on-LAN and NC-SI support.
PCIe slots	Up to 8x PCIe 4.0 slots, all full height slots and with rear access, plus a slot dedicated to the OCP adapter. Slot availability is based on riser selection and rear drive bay selection. Slots 4-8 require two processors. Slots are configured using three riser cards. Riser 1 (slots 1-3) and Riser 2 (slots 4-6) are installed in slots in the system board, Riser 3 (slots 7-8) is cabled to ports on the system board. For 2.5-inch front drive configurations, the server supports the installation of an HBA in a dedicated area that does not consume any of the PCIe slots.
GPU support	Supports up to 8x single-wide GPUs or up to 3x double-wide GPUs
Ports	Front: 1x USB 3.1 G1 (5 Gb/s) port, 1x USB 2.0 port (also for XCC local management), External diagnostics port, optional VGA port. Rear: 3x USB 3.1 G1 (5 Gb/s) ports, 1x VGA video port, 1x RJ-45 1GbE systems management port for XCC remote management. Optional DB-9 COM serial port (installs in slot 3). Internal: 1x USB 3.1 G1 connector for operating system or license key purposes
Cooling	6x (with two processors installed) or 5x (with one processor installed) dual-rotor hot swap 60 mm fans, configuration dependent. Fans are N+1 redundant, tolerating a single-rotor failure. One fan integrated in each power supply.
Power supply	Up to two hot-swap redundant AC power supplies, 80 PLUS Platinum or 80 PLUS Titanium certification. 500 W, 750 W, 1100 W and 1800 W AC options, supporting 220 V AC. 500 W, 750 W and 1100 W options also support 110V input supply. In China only, all power supply options support 240 V DC. Also available is a 1100W power supply with a -48V DC input.
Video	G200 graphics with 16 MB memory with 2D hardware accelerator, integrated into the XClarity Controller. Maximum resolution is 1920x1200 32bpp at 60Hz.
Hot-swap parts	Drives, power supplies, and fans.
Systems management	Operator panel with status LEDs. Optional External Diagnostics Handset with LCD display. Models with 8x or 16x 2.5-inch front drive bays can optionally support an Integrated Diagnostics Panel. XClarity Controller (XCC) embedded management, XClarity Administrator centralized infrastructure delivery, XClarity Integrator plugins, and XClarity Energy Manager centralized server power management. Optional XClarity Controller Advanced and Enterprise to enable remote control functions.
Security features	Chassis intrusion switch, Power-on password, administrator's password, Trusted Platform Module (TPM), supporting TPM 2.0. In China only, optional Nationz TPM 2.0. Optional lockable front security bezel.
Software	• Appliances: Azure Stack HCI OS preloaded • Certified Nodes: Windows Server 2019 Datacenter, Windows Server 2022 Datacenter, Azure Stack HCI OS (all optional)

Components	Specification
Hardware warranty	• Appliances: Three-, four-, or five-year customer-replaceable unit and onsite limited hardware warranty with ThinkAgile Advantage Support and selectable service levels: 9x5 next business day (NBD) parts delivered, 9x5 NBD onsite response, 24x7 coverage with 2-hour or 4-hour onsite response, or 6-hour or 24-hour committed repair (select areas). Also available are YourDrive YourData, Premier Support, and Enterprise Software Support. • Certified Nodes: Three, four, or five-year customer-replaceable unit and onsite limited warranty with selectable service levels: 9x5 coverage with next business day (NBD) parts delivered (base warranty), 9x5 coverage with NBD onsite response (Foundation Service), 24x7 coverage with 4-hour onsite response or 24-hour committed repair (select areas) (Essential Service), or 24x7 coverage with 2-hour onsite response or 6-hour committed repair (select areas) (Advanced Service). Also available are 1-year and 2-year post-warranty extensions, YourDrive YourData, and Enterprise Software Support.
Software maintenance	Three-, four-, or five-year software support and subscription (matches the duration of the selected warranty period).
Dimensions	Width: 445 mm (17.5 in.), height: 87 mm (3.4 in.), depth: 764 mm (30.1 in.)
Weight	Maximum: 38.8 kg (85.5 lb)

Models

Factory-integrated models of the appliances and certified nodes are configured by using the Lenovo Data Center Solution Configurator (DCSC), http://dcsc.lenovo.com

During the configuration process, you are selecting the base Configure-to-Order (CTO) model first, and then you are selecting components (processors, memory, drives, network adapters, and software) for that model.

The following table lists the base CTO models.

Table 3. CTO base models

Machine Type/Model	Description
7D6BCTO1WW	ThinkAgile MX3530-H Hybrid Appliance
7D66CTO1WW	ThinkAgile MX3531-H Hybrid Certified Node
7D6BCTO2WW	ThinkAgile MX3530-F All Flash Appliance
7D66CTO2WW	ThinkAgile MX3531-F All Flash Certified Node

Comparison with the ThinkSystem SR650 V2

The ThinkAgile MX3530 and MX3531 2U Appliances & Certified Nodes are based on the ThinkSystem SR650 V2 server, however there are key differences:

- No persistent memory support
- No onboard SATA controller support
- No RAID adapter support for data drives
- No VROC RAID support
- No mid-chassis drive bay support
- No SED drive support
- No Fibre Channel support
- No InfiniBand support

For details about the ThinkSystem SR650 V2, see the SR650 V2 product guide:
https://lenovopress.com/lp1392-thinksystem-sr650-v2-server

To verify what specific hardware components are supported with the MX 2U systems, see the DCSC configurator:
https://dcsc.lenovo.com

Processors

The MX 2U systems systems support the following processors.

For details about these options, including configuration rules, see the SR650 V2 product guide:
https://lenovopress.com/lp1392-thinksystem-sr650-v2-server#processors

Table 4. Processor choices

Part number	Feature	Description	Maximum supported			
			MX3530-H	MX3531-H	MX3530-F	MX3531-F

Memory

The MX 2U systems systems support the following memory options.

For details about these options, including configuration rules, see the SR650 V2 product guide:
https://lenovopress.com/lp1392-thinksystem-sr650-v2-server#memory-options

Table 5. Memory options

Part number	Feature	Description	Maximum supported			
			MX3530-H	MX3531-H	MX3530-F	MX3531-F
RDIMMs						
4X77A08632	B963	ThinkSystem 16GB TruDDR4 3200 MHz (2Rx8 1.2V) RDIMM	32	32	32	32

4X77A08636	BA62	ThinkSystem 128GB TruDDR4 3200 MHz (4Rx4 1.2V) 3DS RDIMM	32	32	32	32

Persistent memory

The MX 2U systems support the following persistent memory (PMem) options. PMem is only supported in Memory Mode.

For details about these options, see the SR650 V2 product guide:
https://lenovopress.com/lp1392-thinksystem-sr650-v2-server#persistent-memory

Table 6. Persistent memory

Part number	Feature	Description	Maximum supported			
			MX3530-H	MX3531-H	MX3530-F	MX3531-F

Internal storage

Internal storage configurations of the MX 2U systems are as follows.

In this section:

- MX3530-H and MX3531-H Hybrid systems
- MX3530-F and MX3531-F All-flash systems
- Backplanes
- Boot drive enablement

MX3530-H and MX3531-H Hybrid systems

Drive bay configurations are as follows:

- Front drive bays - choice of:
  - 12x 3.5" SAS/SATA hot-swap drive bays
  - 12x 3.5" SAS/SATA hot-swap drive bays

- Rear drive bays - choice of:
  - 2x 3.5" SAS/SATA hot-swap drive bays
  - 4x 3.5" SAS/SATA hot-swap drive bays
  - 4x 2.5" SAS/SATA hot-swap drive bays

- Mid-chassis drive bays are not supported

These configurations are shown in the following figure.

Figure 6. MX3530-H and MX3531-H drive bays

For OS boot functionality, the server supports either:

- One or two M.2 SATA drives, installed in an M.2 adapter internal to the server.
- One or two 7mm hot-swap SATA or NVMe drives, accessible from the rear of the server.

Configuration rules are as follows:

- All Hybrid storage configurations are two-tier, cache tier and capacity tier
- Drive type choices are as follows:
    - HDDs for capacity
    - SAS/SATA or NVMe SSDs for cache
- For cache drives, a minimum of 2 and maximum of 6 drives is required
- For capacity drives, a minimum of 4 drives is required
- For configurations with 2.5-inch rear drives, the rear drives are for cache and the front drives are for capacity
- The total Cache storage must be a minimum of 10% of the total Capacity storage

MX3530-F and MX3531-F All-flash systems

Drive bay configurations are as follows:

- Front drive bays - choice of:
    - 24x 2.5" SAS/SATA hot-swap drive bays
    - 16x 2.5" NVMe hot-swap drive bays
    - 24x 2.5" NVMe hot-swap drive bays
    - 16x 2.5" SAS/SATA + 8x 2.5" AnyBay hot-swap drive bays
- Rear drive bays:
    - 4x 2.5-inch SAS/SATA hot-swap drive bays
- Mid-chassis drive bays are not supported

These configurations are shown in the following figure.
Figure 7. MX3530-F and MX3531-F drive bays

For OS boot functionality, the server supports either:

- One or two M.2 SATA drives, installed in an M.2 adapter internal to the server.
- One or two 7mm hot-swap SATA or NVMe drives, accessible from the rear of the server

Configuration rules are as follows:

- All-flash configurations can be single-tier or two-tier storage:
  - To select a single-tier configuration in DCSC, select the drive you wish to use (from either the capacity or cache lists) and ensure that all other drive selections are set to None
  - To select a two-tier configuration in DCSC, select a quantity of cache drives and a quantity of capacity drives

- Drive choices for a single-tier configuration are as follows:
  - Drives can be either SAS SSDs, SATA SDDs or NVMe SSDs
  - All drives must be the same feature code
  - A minimum of 4 drives is required

- Drive choices for a two-tier configuration are as follows:
  - The following combinations are supported:
    - SAS SSD for cache and SAS/SATA SSD for capacity
    - NVMe SSD for both cache & capacity
    - NVMe SSD for cache and SAS/SATA SSD for capacity
  - All cache drives must be the same feature code and all capacity drives must be the same feature code
  - A minimum of 2 cache drives and a minimum of 4 capacity drives is required
  - The total cache storage must be a minimum of 10% of the total capacity storage

Backplanes

The choice of backplanes supported varies by system, as listed in the following table.

For details about these options, including configuration rules, see the SR650 V2 product guide:
https://lenovopress.com/lp1392-thinksystem-sr650-v2-server#internal-storage

Table 7. Drive backplanes

Feature	Description	Maximum supported			
		MX3530-H	MX3531-H	MX3530-F	MX3531-F
Front 3.5-inch drive backplanes					
B8LT	ThinkSystem 2U 12x3.5" SAS/SATA Backplane	1	1	No	No
BH8C	ThinkSystem 2U 12x3.5" AnyBay Backplane	1	1	No	No
Front 2.5-inch drive backplanes					
B8LU	ThinkSystem 2U 8x2.5" SAS/SATA Backplane	No	No	3	3
BH8B	ThinkSystem 2U/4U 8x2.5" AnyBay Backplane	No	No	1	1
BH8D	ThinkSystem 2U/4U 8x2.5" NVMe Backplane	No	No	3	3
Rear 3.5-inch drive backplanes					
BAG7	ThinkSystem 2U 2x3.5" SAS/SATA Rear Backplane	1	1	No	No
B8L3	ThinkSystem 1U/2U 4x3.5" SAS/SATA Backplane	1	1	No	No
Rear 2.5-inch drive backplanes					
B8LV	ThinkSystem 2U 4x2.5" SAS/SATA Backplane	1	1	1	1

Boot drive enablement

For OS boot functions, the systems also support one or two 7mm hot-swap drives at the rear of the server, or one or two M.2 drives installed on an adapter internal to the server. The following table lists the supported controllers/enablement kits for M.2 and 7mm boot drives.

For details about these options, including configuration rules, see the SR650 V2 product guide:
https://lenovopress.com/lp1392-thinksystem-sr650-v2-server#internal-storage

Table 8. Boot drive enablement

Part number	Feature	Description	Maximum supported			
			MX3531-H	MX3531-F	MX3530-H	MX3530-F
M.2 enablement kits						
4Y37A09739	B5XH	ThinkSystem M.2 SATA 2-Bay RAID Enablement Kit	1	1	1	1

4XH7A61058	B8P3	ThinkSystem 2U 7mm Drive Kit w/ NVMe RAID	1	1	1	1

Controllers for internal storage

The MX 2U systems support the following internal storage controllers.

For details about these options, see the SR650 V2 product guide:
https://lenovopress.com/lp1392-thinksystem-sr650-v2-server#controllers-for-internal-storage

Table 9. Controllers for internal storage

Part number	Feature	Description	Maximum supported			
			MX3530-F	MX3530-H	MX3531-F	MX3531-H
SAS/SATA HBA - PCIe 3.0

NVMe adapters						
4C57A65446	B98C	ThinkSystem 4-Port PCIe Gen4 NVMe Retimer Adapter	3	No	3	No

Internal drive options

This section lists the supported drives:

- Boot drives
- Internal drives for MX3530-H
- Internal drives for MX3531-H
- Internal drives for MX3530-F
- Internal drives for MX3531-F

Boot drives

The MX 2U systems systems support the following drive for boot functions.

Table 10. Boot drives

Part number	Feature	Description	Maximum supported			
			MX3530-H	MX3531-H	MX3530-F	MX3531-F
7mm 2.5-inch hot-swap 6 Gb SATA SSDs						
4XB7A38182	B8JT	ThinkSystem 7mm 5300 480GB Entry SATA 6Gb SSD	2	2	2	2

Internal drives for MX3530-F

The following table lists the drives support in the MX3530-F. The drives are classified as either Cache drives, Capacity drives, or both. The quantities listed in the table are the maximum supported for each drive option. For two-tier configurations, a minimum of 2 cache drives and a minimum of 4 capacity drives is required.

Table 13. Drives supported in the MX3530-F

Part number	Feature	Description	All Flash Storage	
			Cache	Capacity
2.5-inch hot-swap 12 Gb SAS SSDs				
4XB7A17062	B8HU	ThinkSystem 2.5" PM1645a 800GB Mainstream SAS 12Gb Hot Swap SSD	28	28

Network adapters

The MX 2U systems systems support the following networking options.

For details about these options, including configuration rules, see the SR650 V2 product guide:
https://lenovopress.com/lp1392-thinksystem-sr650-v2-server#i-o-expansion
https://lenovopress.com/lp1392-thinksystem-sr650-v2-server#network-adapters

Windows Server 2022 support: The Intel adapters listed in the table are currently not supported with Windows Server 2022 and Azure Stack HCI 21H2 OS. Support is planned for June 2022.

Table 15. OCP network adapters

Part number	Feature	Description	Maximum supported			
			MX3530-H	MX3531-H	MX3530-F	MX3531-F
Gigabit Ethernet

4X67A14926	B4YB	ThinkSystem NVIDIA T4 16GB PCIe Passive GPU	8	8	8	8

Software

The MX Appliances include the preloaded Azure Stack HCI operating system only and requires activation via a CSP such as Lenovo Cloud Marketplace, with the option to purchase a Windows Server 2019 Datacenter or Windows Server 2022 Datacenter license if unlimited guest OS VMs are desired.

The MX Certified Nodes can optionally have Windows Server 2019 Datacenter, Windows Server 2022 Datacenter, or Azure Stack HCI OS preinstalled. Customers can use existing Windows Server Datacenter software licenses, or they can purchase new software licenses from Lenovo or Microsoft. If the licenses are purchased from Lenovo, Windows Server can be factory-installed or shipped in the box with the Certified Node for the installation at the customer site.

The following table lists the Windows Server Datacenter software options that are available for selection from Lenovo for Certified Nodes.

Table 18. Windows Server Datacenter software selection options (Certified Nodes only)

Feature code	Description
Windows Server 2022 Datacenter (Factory installed)	
BPA7	Windows Server Datacenter 2022 for Microsoft Azure Stack HCI - English (factory installed)
Windows Server 2022 Datacenter (Not preinstalled)	
BPA3	Windows Server Datacenter 2022 for Microsoft Azure Stack HCI - Multilanguage (not pre-installed)
BPA4	Windows Server Datacenter 2022 for Microsoft Azure Stack HCI - Simplified Chinese (not pre-installed)
BPA5	Windows Server Datacenter 2022 for Microsoft Azure Stack HCI - Traditional Chinese (not pre-installed)
BPA6	Windows Server Datacenter 2022 for Microsoft Azure Stack HCI - Japanese (not pre-installed)
Windows Server 2019 Datacenter (Factory installed)	
B6P2	Windows Server Datacenter 2019 for Microsoft Azure Stack HCI - English (factory installed)
Windows Server 2019 Datacenter (Not preinstalled)	
B6NY	Windows Server Datacenter 2019 for Microsoft Azure Stack HCI - Multilanguage (not pre-installed)
B6P0	Windows Server Datacenter 2019 for Microsoft Azure Stack HCI - Simplified Chinese (not pre-installed)
B6P1	Windows Server Datacenter 2019 for Microsoft Azure Stack HCI - Traditional Chinese (not pre-installed)
B6NZ	Windows Server Datacenter 2019 for Microsoft Azure Stack HCI - Japanese (not pre-installed)

Configuration notes:

- The selection of Windows Server software licenses is optional.
- The quantity of core-based licenses should be sufficient to cover all processor cores in the system.

Warranty and Support

The ThinkAgile MX Appliances can be configured with a three-, four-, or five-year hardware warranty with 24x7 ThinkAgile Advantage Single Point of Support (Lenovo appliance hardware and Microsoft software) and various levels of coverage with a defined scope of services, including service hours, response time, term of service, and service agreement terms and conditions. For more information refer to the Lenovo Support Plan - MX Appliance support plan, available from https://support.lenovo.com/us/en/solutions/HT511522.

The ThinkAgile MX Certified Nodes can be configured with a three-, four-, or five-year hardware warranty and various levels of service coverage with a defined scope of services, including service hours, response time, term of service, and service agreement terms and conditions.

The ThinkAgile MX3530 and MX3531 2U Appliances & Certified Nodes have a 3-year base warranty:

- 7D6B - 2U Appliance - 3 year warranty
- 7D66 - 2U Certified Node - 3 year warranty

The standard warranty terms are customer-replaceable unit (CRU) and onsite (for field-replaceable units FRUs only) with standard call center support during normal business hours and 9x5 Next Business Day Parts Delivered.

Lenovo's additional support services provide a sophisticated, unified support structure for your data center, with an experience consistently ranked number one in customer satisfaction worldwide. Available offerings include:

- **Premier Support**

  Premier Support provides a Lenovo-owned customer experience and delivers direct access to technicians skilled in hardware, software, and advanced troubleshooting, in addition to the following:

    - Direct technician-to-technician access through a dedicated phone line

    - 24x7x365 remote support

    - Single point of contact service

    - End to end case management

    - Third-party collaborative software support

    - Online case tools and live chat support

    - On-demand remote system analysis

- **Warranty Upgrade (Preconfigured Support)**

  Services are available to meet the on-site response time targets that match the criticality of your systems.

    - 3, 4, or 5 years of service coverage

    - 1-year or 2-year post-warranty extensions

    - **Foundation Service**: 9x5 service coverage with next business day onsite response. YourDrive YourData is an optional extra (see below).

    - **Essential Service:** 24x7 service coverage with 4-hour onsite response or 24-hour committed repair (available only in select markets). Bundled with YourDrive YourData.

    - **Advanced Service:** 24x7 service coverage with 2-hour onsite response or 6-hour committed repair (available only in select markets). Bundled with YourDrive YourData.

- **Managed Services**

  Lenovo Managed Services provides continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of your data center using state-of-the-art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

  Quarterly reviews check error logs, verify firmware & OS device driver levels, and software as needed. We'll also maintain records of latest patches, critical updates, and firmware levels, to ensure you systems are providing business value through optimized performance.

- **Technical Account Management (TAM)**

  A Lenovo Technical Account Manager helps you optimize the operation of your data center based on a deep understanding of your business. You gain direct access to your Lenovo TAM, who serves as your single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time. In addition, your TAM will help proactively make service recommendations and manage your service relationship with Lenovo to make certain your needs are met.

- **Enterprise Server Software Support**

  Enterprise Software Support is an additional support service providing customers with software support on Microsoft, Red Hat, SUSE, and VMware applications and systems. Around the clock availability for critical problems plus unlimited calls and incidents helps customers address challenges fast, without incremental costs. Support staff can answer troubleshooting and diagnostic questions, address product comparability and interoperability issues, isolate causes of problems, report defects to software vendors, and more.

- **YourDrive YourData**

  Lenovo's YourDrive YourData is a multi-drive retention offering that ensures your data is always under your control, regardless of the number of drives that are installed in your Lenovo server. In the unlikely event of a drive failure, you retain possession of your drive while Lenovo replaces the failed drive part. Your data stays safely on your premises, in your hands. The YourDrive YourData service can be purchased in convenient bundles and is optional with Foundation Service. It is bundled with Essential Service and Advanced Service.

- **Health Check**

  Having a trusted partner who can perform regular and detailed health checks is central to maintaining efficiency and ensuring that your systems and business are always running at their best. Health Check supports Lenovo-branded server, storage, and networking devices, as well as select Lenovo-supported products from other vendors that are sold by Lenovo or a Lenovo-Authorized Reseller.

Examples of region-specific warranty terms are second or longer business day parts delivery or parts-only base warranty.

If warranty terms and conditions include onsite labor for repair or replacement of parts, Lenovo will dispatch a service technician to the customer site to perform the replacement. Onsite labor under base warranty is limited to labor for replacement of parts that have been determined to be field-replaceable units (FRUs). Parts that are determined to be customer-replaceable units (CRUs) do not include onsite labor under base warranty.

If warranty terms include parts-only base warranty, Lenovo is responsible for delivering only replacement parts that are under base warranty (including FRUs) that will be sent to a requested location for self-service. Parts-only service does not include a service technician being dispatched onsite. Parts must be changed at customer's own cost and labor and defective parts must be returned following the instructions supplied with the spare parts.

Lenovo Service offerings are region-specific. Not all preconfigured support and upgrade options are available in every region. For information about Lenovo service upgrade offerings that are available in your region, refer to the following resources:

- Service part numbers in Lenovo Data Center Solution Configurator (DCSC):
  http://dcsc.lenovo.com/#/services
- Lenovo Services Availability Locator
  http://lenovolocator.com/

For service definitions, region-specific details, and service limitations, please refer to the following documents:

- Lenovo Statement of Limited Warranty for Infrastructure Solutions Group (ISG) Servers and System Storage
  http://pcsupport.lenovo.com/us/en/solutions/ht503310
- Lenovo Data Center Services Agreement

Deployment services

The MX systems can optionally include Lenovo deployment services to get customers up and running quickly.

The following optional Lenovo custom installation services are available for both MX appliances and MX certified nodes:

- Unpacking and inspecting the systems
- Mounting the systems (rack cabinet, desktop, stack, bookshelf, wall or ceiling, or rack installation)
- Connecting the systems to electrical power and network
- Checking and updating firmware to the latest levels
- Verifying operations
- Disposal of the packaging materials (within the customer site)

The following Lenovo deployment services are available, mandatory for MX appliances and optional for MX certified nodes:

- Conducting remote preparation and planning
- Verifying firmware versions and performing firmware updates, if needed
- Configuring XCC management settings
- Configuring Storage Spaces Direct
- Configuring Microsoft System Center and discovering hosts and storage (if System Center is used)
- Configuring Lenovo XClarity network settings and performing discovery and inventory (if XClarity is selected)
- Transferring knowledge
- Developing post-installation documentation

The following table lists ThinkAgile Health Check & Deployment offerings are available for ThinkAgile MX customers. These offerings are performed by Lenovo Professional Services.

- **Onsite Deployment**: Install, configure, and validate solution on-site, and conduct knowledge transfer.
- **Remote Deployment**: Install, configure, and validate solution remotely, and conduct knowledge transfer.
- **Remote Health Check**: Report & remediation of hardware and cluster health issues, including firmware and software updates.

Table 19. ThinkAgile Health Check & Deployment offerings

Part number	Description
Onsite deployment services	
5MS7B00037	ThinkAgile MX Onsite Deployment (2 node switchless)
5MS7B00038	ThinkAgile MX Onsite Deployment (4 node)
5MS7B00039	ThinkAgile MX Onsite Deployment (additional node)
5MS7B07826	ThinkAgile MX Onsite Deploy Addl Switchless Node
Remote deployment services	
5MS7B00040	ThinkAgile MX Remote Deployment (2 node switchless)
5MS7B00041	ThinkAgile MX Remote Deployment (4 node)
5MS7B00042	ThinkAgile MX Remote Deployment (additional node)
5MS7B07827	ThinkAgile MX Remote Deploy Addl Switchless Node
Annual Remote Health Check	
5MS7B00049	ThinkAgile MX 1X Annual Remote Health Check (per 2-4 node cluster)
5MS7B00050	ThinkAgile MX 1X Annual Remote Health Check (additional node)
5MS7B00051	ThinkAgile MX 1X Annual Remote Health Check & Update (per 2-4 node cluster)
5MS7B00052	ThinkAgile MX 1X Annual Remote Health Check & Update (additional node)

Lenovo Financial Services

Lenovo Financial Services reinforces Lenovo's commitment to deliver pioneering products and services that are recognized for their quality, excellence, and trustworthiness. Lenovo Financial Services offers financing solutions and services that complement your technology solution anywhere in the world.

We are dedicated to delivering a positive finance experience for customers like you who want to maximize your purchase power by obtaining the technology you need today, protect against technology obsolescence, and preserve your capital for other uses.

We work with businesses, non-profit organizations, governments and educational institutions to finance their entire technology solution. We focus on making it easy to do business with us. Our highly experienced team of finance professionals operates in a work culture that emphasizes the importance of providing outstanding customer service. Our systems, processes and flexible policies support our goal of providing customers with a positive experience.

We finance your entire solution. Unlike others, we allow you to bundle everything you need from hardware and software to service contracts, installation costs, training fees, and sales tax. If you decide weeks or months later to add to your solution, we can consolidate everything into a single invoice.

Our Premier Client services provide large accounts with special handling services to ensure these complex transactions are serviced properly. As a premier client, you have a dedicated finance specialist who manages your account through its life, from first invoice through asset return or purchase. This specialist develops an in-depth understanding of your invoice and payment requirements. For you, this dedication provides a high-quality, easy, and positive financing experience.

For your region-specific offers, please ask your Lenovo sales representative or your technology provider about the use of Lenovo Financial Services. For more information, see the following Lenovo website:
