

# 4 x 4 HDMI over Cat5/6 Matrix Splitter Switch, Box-Style Transmitter for Video/Audio, Up to 175 ft. (53 m), TAA

MODEL NUMBER: B126-4X4

Works with Tripp Lite's B126-Series receivers to share multiple HDMI sources between multiple monitors, each on a single Cat5e/6 cable, up to 175 ft. away. Ideal for digital signs, trade shows, retail and presentations.

## Description

The B126-4X4 4-port HDMI over Cat5/Cat6 Matrix Splitter Switch works with compatible remote receivers to share one or more HDMI sources between multiple projectors, monitors or televisions. It's ideal for digital signs, trade shows, presentations, retail and other applications where the video sources are located farther than conventional cables allow or that require multiple displays connected to one source. It uses HDMI cable (see the P568-Series) to connect to the sources and Cat5e/6 cable to transmit to the remote monitors (for best results, use 24 AWG solid-wire Cat5e/6 cable, such as the N202-Series). Any video source can be routed to any monitor, or you can send the same source to multiple monitors. Switch between inputs via push buttons, RS-232 serial or the included remote control. When used with a B126-1A0 or B126-1A0-WP-1 active remote receiver, the switch can extend a 1080i (60 Hz) signal up to 175 feet (53.3 meters) or a 1080p signal (60 Hz) up to 125 feet (38.1 meters). With a B126-1P0 or B126-1P0-WP-1 passive remote receiver, it can extend a 1080i (60 Hz) signal up to 75 feet (22.9 meters) and a 1080p (60 Hz) signal up to 50 feet (15.2 meters) Add up to three B126-110 remote repeaters to each channel to fully extend the signal range or add more displays. In addition to crystal-clear video, the B126-4X4 delivers full, rich stereo. Easy to set up with no software or
