Which product do I need?

Application:

- Pergola
- Protected alfresco
- Difficult to heat indoor areas
- Cafe, Garage/shed

Mounting Heights:

Ideal mounting height:
2.1m - 2.3m

Maximum mounting height: 2.5m

Electric heater

RH180

Application:

- Pergola
- Protected alfresco
- Cafe
- Difficult to heat indoor areas

Mounting Heights:

Ideal mounting height:
2.1m - 2.5m

Maximum mounting height: 2.7m

Electric heater

Classic with remote

Application:

- Protected alfresco
- Difficult to heat indoor areas

Mounting Heights:

Ideal mounting height:
2.1m - 2.5m

Maximum mounting height: 2.7m

Electric heater

Elegance with remote & App control

Application:

- Undercover protected and semi-exposed outdoor locations

Mounting Heights:

Ideal mounting height:
2.1m - 2.5m

Maximum mounting height: 2.8m

Electric heater

Intense "Black"

Application:

- Undercover protected and semi-exposed outdoor locations

Mounting Heights:

Ideal mounting height:
2.1m - 2.5m

Maximum mounting height: 2.8m

Electric heater

Intense "Off-white"

Application:

- High ceilings
- Exposed alfresco
- Balconies

Mounting Heights:

Ideal mounting height:
2.2m - 2.8m

Maximum mounting height: 3m

Electric heater

Max DC with remote

Application:

- Portable spot heating
- Dining/Entertaining
- Work stations
- Suitable for Indoor and outdoor areas

Indoor heating area:

9sqm²

Outdoor heating area:

5sqm²

Electric heater

Portable Intense

Application:

- Portable spot heating
- Outdoor dining/kitchen
- Patios & courtyard
- Balconies & Verandas
- Hospitality

Heating area:

16sqm²

Gas heater

Portable LPG heater

Application:

- Alfresco areas
- Outdoor dining/kitchen
- Patios & courtyard
- Balconies & Verandas
- Hospitality

Mounting Heights:

Ideal mounting height:
2m - 2.7m

Maximum mounting height: 3.5m
