10 years

**Non-Registered  
Limited Warranty:**  
5 years

Trane is excited to announce an upgrade to the XL824 smart connected control. The upgrade includes the following features:

- New paint color – Designer silver (same as the 1050)
- New Z-Wave Plus Bridge with improved range
- 4 Sided Color Retail Packaging Sleeve
- 14th character of model number changed to B
- All other features are the same as the current model

The 824 not only enables homeowners to remotely control and monitor their indoor comfort conditions, but simplifies the process to add over 200 Z-Wave products throughout their home and keep them connected to what matters most, their family and home.

By installing an 824 control a home becomes smart home ready. Homeowners may:

- Enroll over 200 Z-Wave devices to their 824 comfort control
- Begin building their network of Z-Wave home automation products at installation and add devices later
- Add Z-Wave appliance modules, dimmer modules, comfort controls, locks, window, door and motion sensors

All the above may be controlled through Nexia™ smart home system from any Internet-enabled smartphone, tablet or computer. Dealers may also enroll the 824 controls to Nexia Diagnostics after receiving homeowner approval to remotely monitor their customers HVAC system performance to help make sure the system is running as optimally as possible.

<b>824 Model Number</b>	TCONT824AS52DB
