

Troubleshooting steps

- To extend Tapo Camera battery life, please see FAQ guide on here: <https://www.tp-link.com/uk/support/faq/3598/>
- For tapo APP, it will be required to have an Android OS version of 5.0 or higher when installing TP-Link apps on Android devices. You will be unable to control your TP-Link devices with the TP-Link Apps if your Android device is currently running an OS version below 5.0.
- For better video quality recording, we suggest using 2K QHD resolution.
