Subject: Class II Permissive Change for Class B Computing Device Peripheral  
FCC ID: A3KM090 / 17" Monitor, Philips Model 107B20

Gentlemen:

Enclosed, please find Philips Electronics Industries (Taiwan) Ltd.'s application for equipment authorization, dated September 18, 2000. The subject FCC ID was originally granted on September 27, 1999 in compliance with Part 15, Subpart B of the FCC Rules.

This device was originally reported as a 17" Flat Square Color Monitor with digital controlled auto-scan that supported 30-92 kHz horizontal, 56-160 Hz vertical sync frequencies with maximum resolution up to 1280x1024, Non-Interlaced. Also, this monitor was provided with such features as: (1) detachable non-shielded power supply cord; (2) undetachable shielded 15-Pin D-Sub connector signal cable with two external bonded ferrite cores; and (3) optional USB Hub with USB interface port. The optional multimedia base was not yet available and not part of this filing.

This Class II Change is to report: (1) remove the USB interface port from the base pedestal; (2) new cabinet style for model 107B20; and (3) re-layout main chassis printed wiring board.

This changed monitor was system tested in accordance with C63.4-1992 to show compliance to FCC Part 15 Class B limits. Compliance tests were performed in representative worst-case video modes 1280x960 @ 86.0 kHz and 1280x1024 @ 91.1 kHz.

Should you have any questions or comments, please contact the undersigned. Thank you for your attention and cooperation in this matter.

Sincerely yours,

Richard Mullen
