TO FIND YOUR LOCAL GASKET GUY VISIT WWW.GASKETGUY.COM/LOCATOR/

HOW TO ORDER

Call (877) 442-7538

Monday – Friday • 8:30AM – 5:30PM EST

Email Us! orders@gasketguy.com

Order Online www.gasketguy.com

Save Time Order Online!

Place orders online via our website www.GasketGuy.com.
Contact us if you need your login credentials.

Prices 40-60% Below OEM

Our gaskets are OEM Quality, but not OEM price! Start saving now by calling us to place an order or set up your online account.

Same Day Shipping

Orders placed by 2PM EST ship same day. We have three easy ways to order - call 877.442.7538, email orders@gasketguy.com, or order online at www.GasketGuy.com.

Chat With Us Online!

Have a question? Our online chat feature is great for quick answers to your questions. Log in to our website www.GasketGuy.com and look at the lower left of your screen. We are ready to help Monday through Friday 8:30AM - 5:00PM EST.

QUICK CATALOG REFERENCE

We want to make using our catalog easy! Review this catalog guide with example pages for help on how to use it and find the gasket for your equipment easily!

HARDWARE
pgs. 2-56

Need any additional hardware for your refrigeration equipment? Check here for walk-in and reach-in door handles, latches, hinges, door releases, strip curtains, and door sweeps. Don't see what you need? Give us a call!

**HELPFUL
HARDWARE TIPS**
pgs. 58-61

Not sure if you need a hinge or latch with an offset? Look here to double check! We also walk you through reversing different types of hinges.

GASKET GUIDE
pgs. 62-64

All of our measurements are done from outside edge to opposite outside edge. We make measuring a gasket easy with this simple how-to guide.

CUSTOM GASKETS
pgs. 66-74

Not sure of the make and model of your equipment? Don't worry! Use this section to match up the correct gasket profile. You can call us to place your order or use the custom gasket order form in the back!

**CUSTOM
CUTTING BOARDS**
pgs. 75-79

Can't find a cutting board that matches your make and model? We make it easy! We'll custom make any board to your dimensions!

**GASKETS BY
MANUFACTURER**
pgs. 80-289

This section contains a list of manufacturers in alphabetical order. It is a reference guide for gaskets made to the manufacturer's specifications. You can check by dimensions, model number, and OEM #. You can also give us a call with your model and serial number to verify the correct gasket - Let us do the leg work!

HEATER WIRE INFORMATION

What is a Door Heater?

A door heater is a 120v braided wire placed around the outside of the door frame that prevents doors from freezing closed.

4 Sided

3 Sided - Double Loop

To Order Please Provide the Following:

1. Length of heater wire not including leads
2. If not available, we will need to know the door opening and if the heater wire is 3 or 4 sided

STRIP CURTAIN ORDERING GUIDE

Ordering Guide for strip curtains

1. Is your walk in a freezer or cooler? Use medium temp curtains for a cooler and low temp curtains for a freezer.

2. How much overlap do you want for the curtains? 33% is typical for coolers and 50% for freezers.

3. Allow for 1 inch on either side when calculating width for the mounting bracket. Example: 36" door will use a 38" bracket. This allows for coverage for any gaps on either side of the outside strips.

4. Add 3 inches for the height of the opening to allow for mounting the bracket above the top of the opening. Ex: If your opening is 84" make the strips 87" long.

5. Do you need reinforced curtains? These are used in freezer and high traffic environments to help reduce replacement.

PRO Tip

Strip curtains reduce energy costs! Completely customizable, in stock, and can ship today!

PRO Tip

When ordering strip curtains please note the strip width, height, and overlap needed.

HINGE INSTALLATION

What is Offset?

Offset on refrigerator doors is the difference, in inches, between the outside surface of the frame or cabinet to which the door seals and the face of the door. Shown below are different ways to measure the offset:

Determining the Offset of Existing Edgemount Hinges

The offset of an edgemount hinge is determined by one of two different methods based on the manufacturer. See examples below:

- A.** Offset measured to centerline of hole.
- B.** Offset measured to edge of hinge (Kason mostly)

Distance inbetween arrows is equal to offset of hinge.

Determining the Offset of Facemount or Strap-Type Hinges

Measure from the hinge base to level position of the strap. Manufacturer will stamp offset on hinge butt or on hinge blade. If conflicting information is given on both butt and blade, figure shown on blade will be the correct offset.

Measuring the Offset of a Door

Measure distance from the surrounding cabinet surface to the door face. The measurement will be the "offset" of the door.

HOW TO REVERSE HINGES

Edgemount Hinge

Reversing CAM-LIFT Hinge Direction (Edgemount Door Hinges)

Pry cam upward with screw driver

Rotate cam 180° and reset

Facemount Hinge

Hinge Direction Left or Right?

Hinge set for left-hand operation

Hinge set for right-hand operation

Walk-In Hinge

Reversing Hinge Direction

A. Remove pin

B. Rotate the hinge butt and blade. You will need to restack any bearings or washers. The hinge blade should turn on top of the bearings.

C. Replace the hinge pin to complete reversing hinge. Hinge pin should always be inserted from top side of hinge.

Reversing CAM-LIFT Hinge Direction (Strap-type door hinges)

1. Hinge set for left hand door

2. Separate door wing from hinge wing

3. Remove cap
4. Remove cam

5. Replace cam
6. Replace cap

7. Reset hinge for right hand operation

GASKET REFERENCE GUIDE

We want to make finding the right gasket easy! Review our gasket guide with example pages for help on how to use this catalog and find the gasket for your equipment!

HOW-TO MEASURE A GASKET pg. 63

Not sure of the make and model of your equipment? Don't worry! Use this section to match up the correct gasket profile. You can use the How to Measure a Gasket Page to measure your old gasket and **we will custom make the gasket to your measurements!** You can call us to place your order or use the custom gasket order form in the back!

CUSTOM GASKETS pgs. 66-74

Measuring is the most important part of your order and we want to make sure it's done right the first time! All of the measurements in the catalog were done by measuring the outside edge to the opposite outside edge of the gasket. Accuracy is key. Measure twice and write down your measurements to the nearest 1/8".

GASKETS BY MANUFACTURER pgs. 80-296

This section contains a list of manufacturers in alphabetical order. This section is a reference guide for gaskets made to the manufacturer's specifications. You can check by dimensions, model number, and OEM #. You can also give us a call with your model and serial number to verify the correct gasket!

HOW TO MEASURE A GASKET

How to Measure Outside Edge to Outside Edge

All measurements are noted as outside edge to outside edge dimensions. Please follow the instructions below to properly measure your gasket:

Take a look at the gasket currently on the door and match the style up to one of the gasket profiles.

Using a tape measure, measure the outside edge of the gasket that is currently on the door. If the gasket seems to be stretched or warped a bit, don't worry, as long as you are within 1/8 inch, the replacement gasket should install properly.

Most refrigeration door gaskets are 4 sided, but when you are working with large walk in cooler doors, you will find many of those are 3 sided gaskets with no bottom. If the gasket is NOT 4 sided, then you will need to specify which sides you would like us to include. Typically on 3 sided gaskets the bottom is a door sweep.

How to Measure if the Gasket is Torn or Missing

Follow these instructions on how to measure if the original gasket is torn or missing.

Locate the model and serial number of your equipment. Usually they are located on a data plate similar to the one above. Give us a call and we will help locate the correct profile.

OPTION #1

Using a tape measure, measure from the center of the dart track to the center of the opposite dart track that is on the door.

OPTION #2

When placing your order note that the dimensions are **dart to dart** and we will convert your measurements to outside edge dimensions.

CUSTOM GASKET ORDER FORM

CUSTOM CUTTING BOARDS

CUSTOM POLY CUTTING BOARDS

Poly Cutting Boards

- Acid and Warp Resistant
- Moisture, Odor, and Bacteria Resistant
- 30-40% Cheaper Than OEM Cost

PRO Tip

Our poly cutting boards are made of High Density Polyethylene Plastic (HDPE).

- They are commercial dishwasher safe
- They are USDA, NSF, and FDA approved
- They are manufactured in the U.S.A.

Four Ways to Finish Your Board

CUSTOM CUTTING BOARDS

CUSTOM POLY CUTTING BOARDS

Prevent Cross Contamination with Color-Coded Cutting Boards

Why Should You Color-Code Your Cutting Boards?

Placing ready-to-eat food on a surface that held raw meat, poultry, seafood, or eggs can spread bacteria and make you sick.

- H.A.C.C.P. compliant and recommended
- USDA Approved
- NSF Certified
- Helps eliminate cross contamination
- Seven colors for main food groups

CUSTOM CUTTING BOARDS

CUSTOM HIGH TEMP CUTTING BOARDS

Hi Temp Richlite Cutting Boards

- Heat Resistant Up to 350°
- Bacteria Resistant
- 30-40% Cheaper Than OEM Cost

Lasts Up to 3 Times Longer Than Poly Cutting Boards

Tan High Temp

SKU	Width
97-0005	1/4"
97-0006	1/2"

CUSTOM CUTTING BOARDS

We own a state-of-the-art CNC machine allowing us to do much more than just square and rectangle cutting boards. If you can dream it, we can make it!

Juice Grooves

A simple routed trough around the perimeter of your board to catch drippings from carving meat. Standard Juice grooves are 1/2" thick and cut 1" off the edge of your cutting board.

Waste Holes

Boards with waste holes provide a quick and easy way to dispose of trash or inedible food. Some boards even have multiple holes for added convenience. Hole size and placement is completely up to you!

Puzzle Cuts

Puzzle cuts provide a convenient way for larger size boards to fit in a commercial dishwasher. The snug fit at the puzzle grooves ensures your board will not shift around while food is being prepared. When it's time for clean up, all you have to do is take apart the puzzle.

Custom Shapes

This is where it gets fun! We can make cutting boards to pretty much any shape imaginable. We never imagined that we would be making horse head shaped cutting boards, but when a customer came to us with her idea we jumped on it. We can also do state shapes, serving trays, and handles. No project is too big or small, give us a call for a quote today!

GASKET BY BRAND

Welcome to our manufacturer section. We are proud to offer OEM quality refrigeration gaskets and hardware. Please note that these products are **in stock**, unless otherwise noted and are made to brand-specific size. Additional sizes are available. If you do not see the size you need call us!

Measuring Instructions

All measurements are noted as outside edge to outside edge dimensions. Please follow the instructions below to properly measure your gasket:

1. Take a look at the gasket currently on the door and match the style up to one of the profiles in the catalog. If you do not see the exact style, call us and we'll help find the correct profile.
2. Using a tape measure, measure the outside edge width of the gasket that is currently on the door. Start by measuring from outside right side to outside left side of the gasket. Note the size to the closest 1/8". Now measure the height of the gasket from bottom to the top of the gasket and note the size. Measuring the outside edge dimension properly is critical for the replacement gasket to fit properly. If the gasket seems to be stretched or warped a bit, don't worry, as long as you are within 1/8 inch, the replacement gasket should install properly. Use your best judgment from looking at how the gasket is sitting on the door to understand if the measurement you made is going to be accurate.
3. Look at the entire perimeter of the gasket and determine if the gasket is a full 4 sided gasket, or if it only needs to have 2 or 3 sides. Most refrigeration door gaskets are 4 sided, but when you are working with large walk in cooler doors, you will find many of those are 3 sided gaskets with no bottom. Also, over time, you will end up doing estimates in kitchens with specialty equipment and you will come across situations where the gaskets are not 4 sided. If the gasket is NOT 4 sided, then you will need to specify which sides you would like us to include.

What is Offset?

Offset is the difference in inches between the outside surface of the door and the outside surface of the frame or cabinet to which the door seals. For help with offsets check out the guide on page 60.

Making a Custom Gasket?

Ask About Our Sample Gasket Rings!

PRO Tip

Install **Screw In Style Gaskets** by placing the gasket around the corners of the door. Next, screw in the gasket in the center of each section and move outwards.

PRO Tip

Our poly cutting boards are made of High Density Polyethylene Plastic (HDPE).

- They are commercial dishwasher safe
- They are USDA, NSF, and FDA approved
- They are manufactured in the U.S.A.

Upgrade your OEM board to our high temp material! The richlite material offers many benefits:

- Lasts 3 times longer than poly
- Withstands temps up to 350 degrees
- Dishwasher safe

TERMS AND CONDITIONS

Prices

Due to market fluctuations we reserve the right to change pricing without notice. Working on a job or need an official written quote? No problem! We can provide you a quote that is valid for 30 days. Prices do not include shipping charges.

No Minimum Orders!

There is never a minimum order requirement! Order only what you need, when you need it. Need a large quantity of a single item? Volume pricing may be available. Please call for details.

Special Orders

If an item is not shown in our catalog we will work hard to find it and order it for you. We may ask you to send a sample of the old gasket or part. Per your request we will return the sample upon request. Lead times will vary on special order items and they are non-returnable.

Quality Counts!

Our gaskets are made 100% in the USA! Not only is our gasket material from the USA, but our gaskets are also manufactured in the United States.

Products shown in our catalog may not be purchased directly from the Original Equipment Manufacturer (OEM). Gasket Guy knows our products meet or exceed the OEM standards. Please note the use of OEM part numbers are provided as reference only. They do not imply the item was purchased from a specific OEM. Our products are not endorsed, sponsored, approved, or authorized by the OEM. All OEM names in our catalog are registered trademarks.

Responsibility

Information in our catalog has been reviewed and we believe it to be generally correct. We do not guarantee it. All images, photos, notes, and illustrations are considered to be representations of the actual product and are only intended to give an idea of what the product looks like. In some cases, slight variations may apply and change over time.

Shipping

Most orders received by 2pm EST will ship the same business day. Special orders or out of stock items will ship as fast as possible. We ship most orders by UPS, however, some may ship via freight liner due to weight or size. We take extra time to make sure each product is packaged with care and attention. If your products are damaged in transit you are responsible for notifying the carrier ASAP and filing claim forms as per the carrier requirements. Please save all of your packaging exactly as it was received. We will work with you to get a replacement out ASAP.

Returns

When you purchase a gasket from [Gasket Guy](#) we want you to feel confident that your purchase is backed by our [Gasket Guy 30-Day 100% Guarantee](#). If you are not completely satisfied with the quality of the gaskets you purchased, contact our customer service department immediately and we will do everything in our power to correct the problem. If we cannot do this, we will authorize a 100% refund of the cost of your gasket or an exchange for another product. We'll make sure you have a gasket that works for your unit!

All of our OEM Quality gaskets are custom-made to order. Please follow our measuring instructions carefully before placing your order.

- We want to make sure you end up with the right gasket for your unit on your first try. If you made a measuring mistake or an incorrect profile choice on your gasket order, notify us within 30 days and we will offer 100% of your incorrect gasket's cost as in-store credit toward your correct gasket order! You only need to pay if there is a difference in price between your old and new gasket.
- On all other products in our catalog, you are allowed up to 30 days from date of shipment to request a return. Products must be returned in new condition. Shipping costs to return the items are the responsibility of the customer. Non-inventory, special order, and custom products are non-returnable.

Other Policies

Please notify us ASAP of any error in your order. We do our best to ensure accuracy, but we are not perfect. Please check your packing slips and call if you have any questions.

We reserve the right to correct any clerical errors or typos in quotes, invoices, statements, etc.

Neither we nor the manufacturer shall be liable for any injury, loss, or damage that arises from use or inability to use any product sold by us.

Open accounts may be arranged by contacting our customer service team. We reserve the right to cancel open accounts at any time for any reason. Open accounts are Net 30 terms. We charge a \$75 service fee for each NSF check. We gladly accept payment via major credit card and debit card (Visa, Mastercard, Discover, and American Express).
