Dimensions

Recommended minimum clearances

Please note: Doors are designed to sit proud of cabinetry (not flush).

If you have a cupboard above the refrigerator with a rear gap of less than 100mm (Y), recommended minimum clearance at the top of the refrigerator increases from 30mm to 70mm (X).

When positioned in a corner, the clearance must be at least 300mm on the hinge side to allow the door to open enough so that bins and shelves can be removed. For easy removal of crisper it is recommended to remove bottle door bin first if minimum clearance in the corner on hinge side is less than 350mm.
