Subject: Class II Change Application for Class B Computing Device Peripheral
FCC ID: A3KM089 / 17" Monitor, Dell Model E770p

Gentlemen:

Enclosed, please find Philips Electronics Industries (Taiwan) Ltd.'s application for equipment authorization dated October 13, 1999. The subject device was originally granted on August 23, 1999 in compliance with Part 15, Subpart B of the FCC Rules.

The original application reported a 17" Flat Square Color Monitor with digital controlled auto-scan that supported 30-70 kHz horizontal, 50-160 Hz vertical sync frequencies with maximum resolution up to 1280x1024, Non-Interlaced. Also, it was reported this monitor would be provided with such features as: (1) detachable non-shielded power supply cord; (2) undetachable shielded signal cable with one external bonded ferrite core located near D-Sub connector; and (3) multimedia base with AC Adaptor and audio input, headphone output and microphone input/output jacks.

This Class II Change is to report: (1) new cabinet; (2) alternate CRT; (3) added two internal ferrite cores to the shielded video interface cable; and (4) delete the multimedia base and its associated AC Adaptor. This EUT was system tested in accordance with C63.4-1992 to show compliance to FCC Part 15 Class B limits. Compliance tests were performed in representative worst-case video modes 1024x768 @ 68.7 kHz and 1280x1024 @ 64 kHz.

Should you have any questions or comments, please contact the undersigned. Thank you for your attention and cooperation in this matter.

Sincerely yours,

Richard Mullen
