SHARPER. EASIER. SMARTER.

The latest home entertainment products from Panasonic are perfectly designed to meet the needs of today's fast-paced, 'always on' lives.

Two key developments have revolutionised the home entertainment world over the past couple of years. First, the sort of TV sizes people are embracing in their living rooms have exploded, as they realise that bigger is better. Second, the Internet has essentially taken over the world. Both of these developments have had profound implications for the sort of products people want in their living rooms. With TVs the desire for bigger and bigger screens has been joined by a growing desire for better picture quality, so that images better survive the journey up to the 55-inch, 65-inch and even larger screens people increasingly want to buy.

The ultimate solution to this picture quality quest is 4K Ultra High Definition, with its four times Full HD resolution. Panasonic has developed a whole range of new 4K TVs for 2014 equipped with cutting-edge, 4K-friendly connectivity and exclusive Panasonic 4K video processing systems designed to deliver the better colours, better contrast, better gradation and better upscaling you need to get the most from your next-generation, higher-resolution display.

It's not just Panasonic TVs that care about 4K, though. Several of the latest Panasonic digital recorders and players carry 4K upscaling too, meaning, for instance, that even your home movies can benefit from the cinema-like quality 4K makes possible.

Such next-generation pictures deserve to be partnered with High Definition sound quality. So Panasonic is launching a whole range of powerful, feature-rich new soundbar and home cinema systems tastefully designed to integrate seamlessly into your living room.

Don't imagine that Panasonic is relying exclusively on the introduction of 4K Ultra HD products to improve picture quality. For its TVs it's also introducing new technologies like direct LED lighting with Local Dimming, advanced colour filters and enhanced video processing to take LCD to a whole new performance level.

Panasonic is also the only brand offering Blu-ray recorders so that as well as being able to time shift your TV viewing you can store forever favourite TV shows and home movies – all in glorious High Definition. The expansion of the Internet into almost every part of home life, meanwhile, has enabled Panasonic to think outside the box – literally – like never before, to deliver products that extend their functionality not just beyond their own forms but into other rooms and even outside your home.

Many of the 2014 Panasonic TVs, digital recorders and home audio products support content sharing with external devices like smart-phones, tablets and networked PCs, while some of the TVs and digital recorders also let you send instructions to them via a smart device even when you're not in your home! What's more, all this new communication between your home entertainment devices is achieved wirelessly, with no need for messy cable runs around the house.

Perhaps most importantly of all, though, Panasonic has made sure all the new Smart functionality now available in its products is easier to set up, faster to access and more personalised for the consumer than ever before, thanks to innovations like the latest my Home Screen interface, the new 'my Stream' TV recommendations system, a new range of wireless music products with Qualcomm® AllPlay™ compatibility, and the Panasonic Music Streaming App.

All these features and more are detailed in the following pages, so let's take a trip through a new product range that expands home entertainment technology in bold new directions while never forgetting to make sure you always feels in control.

YOUR SENSES UNLEASHED

Introducing a new level of detail. The highest contrast, the most vivid colours and innovative technology create an industry-leading picture quality.

4K
ULTRA HD TV

4K
ULTRA HD TV

ALL HAIL THE RESOLUTION REVOLUTION

2014 is going to be the year of the 4K resolution display. And Panasonic TVs are perfectly poised to make the most of this fantastic new, higher resolution world.

THE 4K UHD DIFFERENCE

Better sharpness: Since 4K images are made up of four times as many pixels as Full HD pictures, they look incredibly sharp, crisp and detailed. Many people describe 4K as like looking at real life rather than just watching a TV.

Better colour: The new generation of Panasonic 4K screens combine their extra resolution with improved colour filters to deliver more gradation steps and produce more natural colour tones.

Better depth: 4K's ability to resolve finer details means that 4K screens can portray a greater sense of depth when showing shots of large-scale views.

4K: THE PANASONIC 4K UHD DIFFERENCE

The latest 4K Panasonic TVs have a number of key benefits that help them get the very best from the new higher-resolution picture format.

HDMI 2.0 connections: Panasonic was the first brand to offer HDMI 2.0 connections on a 4K TV, in recognition of the fact that only HDMI 2.0 connections allow the delivery of 4K pictures with 50/60Hz refresh rates and full colour resolution. So important are HDMI 2.0 sockets to the 4K story that they're now an established industry standard.

DisplayPort connection: HDMI 2.0 ports aren't the only connections that can carry 4K signals at 50/60Hz without reducing colour and frame rate performance; DisplayPort terminals can do it too. So Panasonic will uniquely equip most of its 4K TVs with DisplayPort sockets for 2014.

Specialised 4K decoders: Panasonic has developed new chips specially designed to handle 4K datastreams more effectively, so that no picture quality is lost as the signals are transferred to the screen. The 2014 Panasonic 4K TVs can also handle the HEVC video format that's looking set to become the most common 4K delivery standard.

Quad Core Pro5 / Hexa-Processing: The latest Panasonic 4K TVs use new high-powered processing systems, advanced algorithms and the Panasonic Content Optimizer Pro noise reduction and remastering engines to deliver clearer, sharper upscaling of any source – be it normal HD, standard definition or even content sourced from the Web.

Enhanced motion resolution: The extreme sharpness of 4K pictures can be upset by the motion blur problem you can get with LCD TVs. So to combat this Panasonic 4K TVs use an up to 3000Hz Back Light Scanning (BLS) motion resolution system and a 4K 'Intelligent Frame Creation' engine. This adds in extra frames of picture information so that motion across the image becomes both smoother and clearer.

THX® CERTIFICATION

Don't just take our word for it that Panasonic TVs deliver outstanding picture quality. The high-end range has also passed the rigorous testing procedures of the independent THX quality assurance group, earning full THX Certification. This means in particular that the THX-certified Panasonic TVs can accurately reproduce the HD colour standard used by film-makers for broadcasts and Blu-ray movies, as well as improving deinterlacing to reduce jaggedness around curved edges and improve sharpness.

The THX-certified TVs additionally carry THX picture presets to give you a simple shortcut to pro-calibration picture quality.

The perfect partner

The new Panasonic BDT700 Blu-ray player is an ideal addition to the latest Panasonic TVs, thanks to the ultra-high quality of its playback and extensive multimedia tools.

(more information on page 70)

PICTURE QUALITY REMASTERED

The latest Panasonic TVs continue to deliver the industry-leading picture quality the brand is renowned for.

The local dimming difference

Being able to control clusters of LEDs independently dramatically improves contrast performance.

True colours shine through

A new wide-gamut panel and advanced colour processing deliver a hugely enhanced colour range.

PICTURE QUALITY: PRECISION THROUGH TECHNOLOGY

Studio Master Drive: High-end Panasonic 'Studio Master Drive' TVs in 2014 are equipped with two new picture-boosting drivers. The Super Chroma Drive combines a new wide-colour-gamut panel design with a 3D Colour Management System, while the Black Gradation Drive looks for and applies brightness compensation to low-brightness image elements. The result of all this is more accurate colour; richer, smoother gradation; and more shadow detail at virtually any brightness.

Local Dimming: Some high-end Panasonic TVs boost their contrast performance enormously by using Local Dimming, a system that enables separate clusters of LED lights to have their brightness levels adjusted individually. The Local Dimming Ultra system on the high-end model is particularly effective, as the light clusters controlled by Local Dimming are positioned directly behind the screen rather than around its edges, enabling the TV to be more precise with its local light adjustments to deliver even greater dynamism and more delicate gradation.

Studio Master Colour: The top Panasonic TVs for 2014 use LCD panels equipped with a newly developed, high-colour-space LED backlight able to deliver colours that are truly faithful to the original content being shown. In particular, the wider Studio Master Colour space enables Panasonic 4K LED TVs to reproduce colours accurately even at low saturation and brightness levels (something LCD TVs traditionally find difficult), greatly enhancing the picture quality of dark scenes.

Advanced Colour Spectrum: It's not just new Panasonic 4K TVs that benefit from an improved colour performance. The top-end Full HD models use Advanced Colour Spectrum panel technology to produce more vivid, nuanced and natural colours across a wider tonal range.

TAILORED TELEVISION

Why waste time hunting for TV shows you want to watch when the new Panasonic my Stream system can do it for you?

Streamlined content

my Stream is a beautifully presented shortcut to only the sort of content you like best.

Touchpad navigation

Favorite button

Streamlined control

The new Panasonic Smart remote keeps buttons to a minimum and lets you control everything with only your thumb.

MY STREAM: YOU'LL LOVE WHAT'S UP NEXT

You watch, your TV learns: Ever wish you could replace the usual over-crowded, on-screen TV listings with something more streamlined and personalised? Well now you can. The my Stream system in the latest Panasonic TVs can, if you want it to, monitor your viewing habits – as well as, separately, those of other members of your household – and use the information to build a profile of the sort of programmes you most like to watch, so that it can then recommend similar content you might be interested in.

Fast learner: To speed up the time it takes for my Stream to get to know what you like watching, the Panasonic TV remotes for 2014 have a Favorite button you can press whenever you want to give a 'thumbs up' to a programme you like.

Truly personalised: my Stream is all about you. It wants to give you fast and easy access to just the content you personally love. So to make this process as efficient and seamless as possible, the latest Panasonic TVs can use built-in cameras or new Voice Print recognition technology to identify which member of your household is using the TV and automatically call up their my Stream profile.

Visual feast: Not having to present as many programmes as a normal listings page has allowed Panasonic to dramatically enhance the appearance of the my Stream recommendations list. The selected shows appear in a large, scrolling series of tiled windows showing high-resolution thumbnails for the ultimate visual impact. The my Stream interface is highly dynamic too, with some TV models showing moving video in each highlight window while other models use transitional effects to switch between still images. The end result is a futuristic, engaging and incredibly easy-to-use interface perfectly suited to the smart age.

Wide view: The my Stream interface doesn't only populate itself with your broadcast TV recommendations. The same efficient and attractive interface can also be used to show your photos and recorded content.

Easy navigation: The fluid structure and large icons used by the my Stream interface are the perfect match for the newly designed touchpad remote control options supplied with many of the latest Panasonic TVs.

← WHAT TV ANYWHERE COULD DO FOR YOU

CASE STUDY 1: You're on a train or waiting at an airport and want to kill time watching live TV. So you open up the Panasonic TV Remote 2 App on your phone or tablet, access your TV back at home through the Internet, and stream live footage from your TV's tuners.

← **CASE STUDY 2:** You're watching TV at home, but feel like popping out for a coffee. So you set the TV to record what you're watching, and head out to the coffee shop. Once there you can access the shop's Wi-Fi network and stream to your smartphone the material your TV has recorded.

← **CASE STUDY 3:** You're on holiday when you realise that you've forgotten to set the TV to record your favourite programme. Thankfully, with TV Anywhere you can access your TV's listings and set the recording remotely using your smart device.

OUTSIDE BROADCASTS

With the latest Panasonic TVs, you're no longer restricted to watching your favourite TV shows in your home.

TV ANYWHERE: WATCH YOUR TV WHEREVER YOU ARE

Not just for the home: Last year Panasonic TVs escaped your living room by allowing you to share content and control throughout your home network. This year they go a big step further, travelling with you into the world outside. And when we say world, that's exactly what we mean. Thanks to the new TV Anywhere feature, you can now access your TV's content from anywhere on the planet.

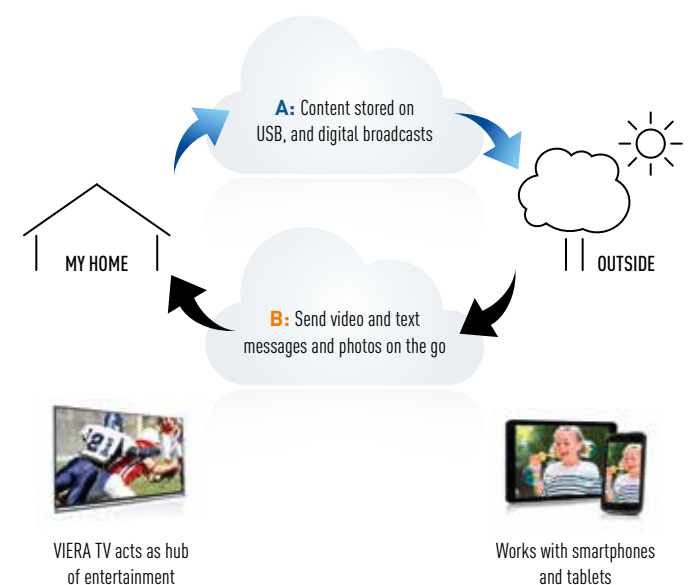

The Panasonic TV Remote 2 App

As well as providing an alternative way of controlling your TV, the TV Remote 2 App now effectively lets you take your TV with you.

How it works: All you need to enjoy TV Anywhere with a new Panasonic TV is a smartphone or tablet loaded with Panasonic's TV Remote 2 App and a broadband connection. You can then connect your smart device to your TV at home via the Internet and share the TV's content – including live broadcasts* and content you've recorded onto a connected USB drive – on the screen of your smart device.

*Broadcaster may limit this function

Two-way street: You're not restricted to just watching content from the TV on your smart device either [A]. You can also set timer recordings on the TV remotely, and even send personal information to the TV [B]. For more on this see page 18.

The great TV takeaway

Anyone with a Panasonic TV, an Internet connection and a smartphone or tablet can now access their TV's tuner and USB recordings.

LIFE IN AN INSTANT

Enjoy faster, easier access to the important things in life with the new Panasonic Info Bar.

INFO BAR: FOR THE THINGS THAT MATTER

No more fridge magnets: Traditionally families have used fridges and notice boards as their means of shared communication. Thanks to the new Panasonic Info Bar system, though, your TV can become the much tidier and more flexible heart of your family life. The Info Bar is a new stand-alone, on-screen display available on some new Panasonic TVs that gives you instant access to such life essentials as the current time, weather reports, updates and personal messages.

No interaction required: As well as collecting key life information in one place for you, the Info Bar is motion activated. So as soon as the TV detects you entering the room using its built-in motion detector, it emerges from intelligent standby mode and produces your Info Bar. The feature can also be used as a way of instantly turning the TV on without you even needing to pick up a remote.

It's all about you: The information shown on the Info Bar is tailored to where you live, showing only local time and weather reports. Plus, of course, all the personal messages the Info Bar shows are connected with members of your family, making it a flexible and comprehensive family hub perfectly suited to today's busy world.

Just for storing food!
Thanks to Info Bar the TV finally provides a modern digital replacement for the old fridge magnet family communication system ...

LIFE'S LITTLE ESSENTIALS

There's some information in life that you always need to know but often can't be bothered to track down. So the Info Bar does the hard work for you, calling up the following information at a moment's notice:

Video and text messages
Family members can leave video or text messages on the TV that the Info Bar makes instantly available to the recipient when they enter the room.

my Stream
See a couple of top highlights from your my Stream content for immediate access or as a reminder to see what else my Stream is recommending.

Time and calendar
Shows at a glance the current date and time of where you live.

Weather report
Find out instantly if you need to take an umbrella when you leave the house!

Face Recognition
Models with built-in or attached cameras can use those cameras to identify who's entered the room and call up the right my Stream and messages accordingly.

UNLOCK THE POWER OF THE CLOUD

The new Panasonic my Home Cloud remote storage system puts your TV at the heart of family life like never before.

MY HOME CLOUD: BRINGING PEOPLE TOGETHER

Remote sharing: The Panasonic TV Cloud-based storage service lets you leave a written message, a photo or even video memos for your family and friends accessible from any Panasonic TV you're logged into. What's more, since these messages are stored online you can send or view them from anywhere in the world via the Panasonic TV Remote 2 App on your smartphone or tablet computer.

Making a date: my Home Cloud lets your whole family synchronise their ever-busier lives with a shared calendar on the TV. You can even add or check dates and events to this calendar remotely via your tablet or smartphone.

THE PERSONAL TOUCH

More than just an app market: The my Home Cloud feature lets Panasonic create an easy-to-navigate, graphically-rich virtual marketplace from where you can download apps and even find and buy TV-related accessories.

Make it personal: my Home Screen has already received great praise for the way it lets you personalise your smart TV experience. Now, Screen Market takes this personalisation to another level by giving you access to an online library of pre-designed Home Screen layouts built around different themes, such as football clubs, Twitter, gaming, Facebook and YouTube. Just choose the one that best reflects your interests and/or personality.

ENJOY FREE ACCESS TO YOUR CLOUD

Most smart TV you buy from the Panasonic 2014 range gives you free access to storage space in the Panasonic Cloud and a my Home Cloud ID to keep your account secure. Into this online storage space you can upload text memos or videos and photos made using either a camera built into or attached to your TV or else the camera built into your smartphone or tablet. The new Panasonic TV Remote 2 App provides the portal for this.

Once you've uploaded your content it remains secured there in the cloud so that it can be accessed by any other my Home Cloud users who you allow to become part of your Home Cloud network.

A whole world of apps

The app store on the latest Panasonic TVs comes with a fresh user interface giving you access to a wide range of apps in a stunning, large-screen TV experience. Enjoy the most popular video and music streaming services, video on demand, sports and much more Internet-based content with just one click of a button. Perfect for everyone who wants to do more than just watch their TV!

Your content, your style

Panasonic provides a wide selection of different 'skins' for your my Home Screen experience, so there's sure to be one that suits you.

NO MORE ARGUMENTS!

Panasonic's twin HD tuners mean you no longer have to fight over who gets to watch what.

Getting the bigger picture

If you're fed up with squinting at photos you've taken on your smartphone on its tiny screen, you can 'throw' them to your much bigger Panasonic TV screen just by swiping forward on your phone.

MORE TUNERS EQUALS MORE FUN

The twin HD tuners in some Panasonic TVs open up a whole new world of viewing possibilities.

TWIN HD TUNER: TV WITHOUT LIMITS

Most TVs only have a single tuner, leaving you only able to watch or record one programme at a time – hardly a perfect scenario for a typical family. Which is why some Panasonic TVs include twin tuners, to introduce a range of extra viewing and convenience options:

Double Watching:

By combining twin tuners with picture and picture technology, Panasonic TVs let you watch two broadcast programmes simultaneously.

Watch & Record:

You can record two channels at the same time to a connected USB 3.0 storage device, or you can watch one programme on the TV at the same time you're recording another to a connected USB drive.

Watch & Share:

Combined with the network features available on 2014 Panasonic TVs, the twin tuners in some Panasonic TV models mean you can watch one programme on your TV while someone else watches a different programme on a smartphone or tablet.

Watch & Zap:

You can quickly browse what's showing on other channels via EPG listings and a small second screen picture while you continue to watch the main picture.

SWIPE & SHARE

Network-based features of the latest Panasonic TVs, like Watch & Share, have required the development of a new interface to streamline the content-sharing process. The result is Swipe & Share, which allows you to share content between your TV and your smartphone or tablet simply by swiping your finger on your smart device towards or away from the TV, depending on which direction you want your content to flow. You can even save content between devices if you swipe with two fingers rather than one. It really couldn't be easier.

One finger throws, two fingers save

Swipe your content to or from your smart device with one finger, and you simply share that content between your device and your TV. Use two fingers, though, and you can actually store the thrown content to the target device.

TECHNOLOGY AND DESIGN IN PERFECT HARMONY

The latest Panasonic TVs take their design inspiration from furniture, making them the perfect partners for your living room.

Elegance over exuberance

The beautifully understated, new stand design doesn't distract you when the TV's on, but looks lovely when it's off.

DESIGN: MADE FOR LIFE

Panasonic has radically shifted its TV design focus for 2014, reflecting the fact that as screen sizes get bigger TVs should integrate more subtly and harmoniously into people's living rooms.

It's all about the screen: The new Panasonic TV designs seek to focus your attention on their screens and the pictures they contain rather than the bodywork around them. Their screen borders are slim and angular, simply following the lines of the screens they hold, while their tabletop stands use subtle finishes and slender 'open' designs that minimise the TVs' physical impact and make them look like they fit seamlessly onto high-quality sideboards and AV furniture.

Authentic materials: To reinforce the new 'TV as furniture' approach, Panasonic builds its new Premium Design TVs using high-quality authentic materials: predominantly glass and metal.

Everything counts: Panasonic has designed its latest TVs to have zero redundancy. Every element of their form either provides functionality or works to harmonise the TV with your décor and furniture. There is no 'design for design's sake'.

A true 360-degree approach: The sleek new exteriors of the latest Panasonic TVs are designed to reflect the look of the user interface and all of its menus and sub-menus.

Flexible friend

The ALL3 speaker is so light you can move it to different locations in your house at will, you can stand it on end or lie it down, and you can use it as one half of a stereo speaker configuration.

In with the old

With the Panasonic ALL1C it's possible to add older audio devices to your new multi-room music network (image shows PMX5 with connector).

SPOTIFY UNLEASHED

Panasonic collaborated extensively with Spotify® while developing the ALL Series, resulting in a Spotify experience which is exceptionally rich among multi-room systems. For instance, with Spotify on the ALL Series you can access a full music browsing experience, complete with playlists compiled to fit any mood, genre or activity. Even better, the ALL Series lets different family members use their own Spotify accounts, with support for personalised Discover (based on your listening history) and Share (social media) features.

ALL SERIES: WHERE DESIGN MEETS CONVENIENCE

Qualcomm® AllPlay™: The new Panasonic ALL Series speakers take the pain out of wireless music by offering a simple end-to-end music solution incorporating AllPlay, a new smart media platform from Qualcomm that enables music to be streamed into multiple rooms with high-fidelity sound.

AllPlay offers three key benefits as a wireless music platform. First, it provides direct and full control of Native Music Subscription services and Internet radio. Second, it's exceptionally straightforward to set up, as you don't need either a 'bridging' product or a set-up app. That means products easily connect over an existing home Wi-Fi network. Finally, it's an open standard, meaning it can accommodate any brand of AllPlay-enabled product. So you are not restricted to using products from just one brand.

Party Mode and Multi-Zone support: AllPlay lets you enjoy your music wirelessly in either Party Mode or Multi-Zone. In Party Mode you can stream one source to several speakers, while with Multi-Zone playback and the Panasonic Music Streaming App you can play different sources to different speakers around your home. Also, AllPlay is a new smart media platform where mobile technology is concerned, making it compatible with whatever brand of smartphone and tablet computer you may have in your home.

Native Music Subscription/Internet radio app support: Play any music you've got stored on your mobile and networked devices via your existing home Wi-Fi network. The ALL Series product system also – unusual for the wireless music world – lets you use the original control apps of Music Subscription Services and Internet radio streaming services, rather than making you use an integrated product app. This means you can enjoy all the features those specially developed apps have to offer, for example, features such as Browse, Radio and Share of Spotify.

Qualcomm AllPlay is a product of Qualcomm Connected Experiences, Inc. Qualcomm is a trademark of Qualcomm Incorporated, registered in the United States and other countries, used with permission. AllPlay is a trademark of Qualcomm Connected Experiences, Inc., used with permission.

NO WIRES, NO WALLS ... JUST MUSIC

Thanks to the new Panasonic Multi-room Wireless Speaker System, your music collection is no longer confined to just one room. Now you can effortlessly fill your whole home with your favourite songs.

Party Mode

Play a single sound source simultaneously through multiple speakers.

Multi-Zone support

Play multiple songs within the same network to separate speakers.

MUSIC STREAMING MADE SIMPLE

For Panasonic, wireless audio streaming isn't just about getting rid of cables. It's also about making sure wireless audio products work seamlessly and don't compromise sound quality.

Take it easy

The Panasonic Music Streaming App brings all your music sources together for you, so you can access everything at the swipe of a finger.

Panasonic Music Streaming App

The intuitive graphical interface makes it incredibly easy to find and play your music, no matter where it's stored.

Travel in style

With its chic design, cover that doubles as a stand and up to 20 hours of music playback, the SC-NA10 can help long journeys fly by.

Close encounters

Thanks to NFC technology, playing music from your smartphone or tablet through the SC-NA30 speaker is no more complicated than simply holding the two products together.

Keeping things tidy

Equipping Panasonic Speakerbars with Bluetooth means your external music sources can enjoy the Speakerbar's power without cluttering up the area around your TV with cables and portable devices.

KEY WIRELESS MUSIC TECHNOLOGIES EXPLAINED

Qualcomm AllPlay: Audio streaming platform developed to make it easier for AllPlay-equipped multimedia devices to share files with each other, so that you can enjoy Party Mode and Multi-Zone.

AirPlay®: Apple's proprietary format for streaming content wirelessly from iPhone, iPad and iPod Touch.

Bluetooth: A technology for wireless communication between different devices over short distances. Common in mobile phones and tablet computers.

NFC – Near Field Communication: A feature that establishes a wireless Bluetooth connection simply by holding two NFC-capable devices together.¹

DLNA – Digital Living Network Alliance: An industry standard for sharing files – including multimedia – over a home network via a wired or wireless router.

TOTAL CONVENIENCE, STUNNING SOUND

Easy listening: While streaming audio without wires is convenient, it isn't always easy to achieve. This is because there are now so many different wireless technologies competing for your attention, including Bluetooth, Qualcomm AllPlay, AirPlay, DLNA and NFC (see above panel for more information on each of these formats). The Panasonic Music Streaming App, though, means you no longer have to worry about these various technologies. The app takes care of everything for you, communicating with your wireless music sources and playback devices so you can easily switch between them, and making sure that whatever music you select will simply play, regardless of where it's coming from and what format it's in.

One app fits all: The Panasonic Music Streaming App really doesn't care if your wireless music products and servers want to use AirPlay, Bluetooth or DLNA. It doesn't care what brand of tablet or smartphone you've got. Even different streaming services can be used through the Panasonic App without them losing any functionality. All you have to do is press Play and the Panasonic Music Streaming App takes care of the rest.

Bluetooth Re-Master: Wireless audio systems can suffer compromised sound quality due to the way music is compressed for easier distribution. So to counter this Panasonic has developed Bluetooth Re-Master: a processing technology that replaces the treble and bass audio information lost during the compression process to deliver music that sounds almost identical to the original recording quality.

FLAC – Free Lossless Audio Codec: The MP3 and AAC music files commonly used for digital music distribution use high levels of compression that reduce sound quality. To combat this, many new Panasonic wireless audio products support playback of FLAC: an audio compression format which delivers 'lossless' sound quality.

MUSIC TO YOUR EARS

RP-HD10

Premium Circumaural Headphones

RP-HD10E-K ○

High-Resolution Sound – handles frequencies from 4Hz to 50kHz so you can hear even the finest details
Premium build – 50mm high definition driver unit produces low bass sounds and extraordinarily clear treble
Optimum fit – ergonomic 3D-designed ear pads ensure you can listen in comfort by reducing external noise
Technology – visible multi-layer film diaphragm reproduces highly precise sound output

RP-BTD10

Premium Bluetooth Headphones with Advanced Sound Quality

RP-BTD10E-K ●

Premium build – with 40mm light driver for powerful, dynamic and clear bass
aptX – delivers advanced sound quality for a truly enjoyable digital audio listening experience
Bluetooth with Near Field Communication (NFC) – enables easy wireless connectivity on the go or at home
Touch buttons – for intuitive, easy operation directly on the right earcup

RP-HC800

High-performance, Active Noise-Cancelling Headphones

RP-HC800E-K ●

Premium design – with a 40mm neodymium driver for powerful, dynamic bass and clear stereo sound
High-performance noise cancelling – be surrounded by the sound while cancelling out distracting noise
Flat-foldable design – so you can easily take these headphones everywhere you go
Accessories included – like a convenient carrying case and an air plug adaptor for onboard entertainment

RP-HX550

Premium Circumaural Headphones for Dynamic Sound

RP-HX550E-K ●
RP-HX550E-W ○
RP-HX550E-N ○

Premium design – with a 40mm neodymium driver for powerful, dynamic bass and clear stereo sound
Soft earcups and headband – let you listen to music or movies for hours in pure comfort
Closed-type style – to perfectly block out surrounding noise
Modern colours – choose from black, white or gold to make a style statement

RP-HXS400

On-Ear Street Style Design Headphones

RP-HXS400E-K ●
RP-HXS400E-W ○
RP-HXS400E-G ●
RP-HXS400E-P ●

Tuned Sound – finely tuned 40mm neodymium driver units deliver clear, powerful and deep sound
Practical design – swivel mechanism lets the headphones be folded completely flat
Comfortable – cushioned head pad and soft earcups reduce surrounding noise
Style & Music – sleek design and rich-sounding music for the fashion-conscious

RP-HXS200

Stylish On-Ear Street Type Headphones

RP-HXS200E-K ●
RP-HXS200E-W ○
RP-HXS200E-A ●

Clear, Powerful Sound – tuned 30mm neodymium driver units deliver clear sound with powerful bass
Ultra-compact – easy to fold and stow thanks to the unique rotating folding system
Appealing Design – sleek design with hexagon-engraved panel in a variety of colours to choose from
Headset version* – with integrated microphone and controller for phone calls any time, anywhere

↑ Think big

The Miracast feature in some Panasonic Blu-ray recorders lets you mirror your tablet or smartphone screen on your TV.

Truly remote control

Set the timer for recordings on your Panasonic Blu-ray recorder even when you're away from home with the Remote Recording Service app. ↓

ULTIMATE DIGITAL LIFESAVERS

For the ultimate in recording quality for your home movies and favourite TV shows, nothing beats a Panasonic Blu-ray recorder.

4K
ULTRA HD
UPSCALING

SPECTACULAR PICTURES AND SOUND

4K Upscaling: The AV world is buzzing right now with talk of 4K Ultra HD: a picture resolution that provides four times as many pixels of video information as the usual HD format. And you can enjoy 4K quality from both your Blu-ray collection and your own home movies thanks to the high-quality 4K upscaling systems built into the new Panasonic Blu-ray recorders.

High-quality music playback: The high-quality audio formats FLAC, WMA and WAV can all be played by Panasonic Blu-ray recorders. In addition, the recorders feature a Pure Sound Mode which can be used when listening to music to stop all mechanical activity in the HDD and tuner areas – as well as minimise cooling fan movement – to enhance sound quality.

SMART NETWORKING

Take-out TV: The new TV Anywhere feature on the latest Panasonic Blu-ray Disc™ recorders lets you stream both live TV shows and recordings* to your smartphone or tablet wherever you are – be it in the next room or another country. All you need is an Internet connection and the Panasonic Media Access App so your smart devices can access your recorder.

Shared content: Ever wished you could share the content being shown on the small screen of your smartphone or tablet with the much bigger screen of your TV? Thanks to Panasonic Blu-ray recorders, you can. You can share on the TV what's showing on your smart device's Web browser, or with the new DMR-BWT740/745 (and BST/BCT940/845/745/740 models) you can use Miracast technology to set up a direct Wi-Fi connection over which you can mirror your smart device's screen on your TV.

SMART RECORDING

Remote Recording: The latest Panasonic Blu-ray recorders support Remote Recording, letting you schedule recordings by using your smartphone, tablet or PC. This provides two major benefits. First, it means you can browse channel listings and select programmes to record on your second screen, without interrupting your main TV viewing. Second, it allows you to set recordings remotely, no matter where you are – even if you're away from your home! With the DMR-BWT740/745, and BST/BCT940/845/745/740 models, you can even remotely schedule the recording of two programmes simultaneously. To enjoy Remote Recording on Panasonic Blu-ray recorders, all you need to do is download the DIGA Player App (or access rec.panasonic.com) to your browser-compatible device and register your details. It couldn't be easier.

SMART OPERATION

Keyword Recording: This new feature takes the tedium out of setting recordings by letting you simply input favourite keywords. For instance, type in 'Olympics' and your DMR-BST940/845, BCT940 or BCT845 DIGA recorder will search through the TV listings and automatically record any related programmes. You'll never miss another thing.

*This function may not be available with some content and pay-per-view programmes, or if your network is unstable. Access is possible for only one device at a time from outside the home.

MULTI-TALENTED
RECORDERS

*1 Discs recorded and finalized on recording devices. *2 Only Full-HD and SD 24p content can be up-converted for 4K2K resolution. For 4K Upscaling playback a TV with same resolution is required. *3 For BD-ROM/ BD-R and DVD-Video via HDMI. *4 This function is effective only when reproducing AVCHD data recorded with x.v.Colour technology. The function cannot be used with BD-ROM or DVD-ROM discs. HDMI connection is required. *5 Requires the device with the App installed and the home cinema to be connected to the same home network. *6 Download on the App Store. Download on Google Play¹⁶⁾. *7 Requires broadband Internet service. *8 To use NFC without downloading App, an OS Version 4.1 or later Android¹⁶⁾ device is required. The installation of the Panasonic Music Streaming App allows use of an Android smartphone or tablet with the NFC function and OS Version 4.1 or earlier. *9 Compatible with Android devices, Ver. 4.2 and above and Miracast certified. For information on whether the smartphone, etc. supports Miracast, contact the manufacturer of the device. *10 With the purchase of Wireless LAN Adaptor (W-LAN). *11 The external HDD with capacities of 2TB or less in processing NTFS/ FAT32 data is supported. Playback is not possible with some external hard disk drives. *12 To enjoy content, you will need to insert an SD card or a USB flash drive (1GB or more of free space / sold separately). Requires broadband Internet service. *13 When the other connected devices are turned off. *14 Full assembly with stand base. - Playability may vary depending on the content, disc and quality of the recording. For content-recorded disc for your personal use. *15 With the purchase of SH-FX82. *16 ARC compatible TV is required. - Specifications are subject to change without notice. Weight and dimensions are approximate.

*1 Discs recorded and finalized on recording devices. *2 It is compatible to a DVD-Video format after finalised. *3 The bit rates are approximate. Recording time of DR mode may vary depending on bit rate of broadcasting. *4 HDMI connection required. *5 For 4K Upscaling playback a TV with same resolution is required. *6 For BD-ROM / BD-R via HDMI. *7 Sampling frequency is set to 88.2kHz at CD playback. *8 Depending on the programme, it may not be possible to play back/decrypt after recording. *9 Requires browser in PC, smartphone or tablet. *10 Requires broadband internet service. *11 „Quick Start“ needs to be set to „ON“ and „Power Save for Network Standby“ needs to be set to „OFF“ to activate „Quick Start“. *12 Remote Viewing and Multi-room TV Streaming are not possible for some pay-per-view programs. *13 Requires browser in smartphone or tablet. *14 Access is possible for only one device at a time from outside the home. *15 Download on the App Store. Download on Google Play™. *16 It enables the use of Remote Viewing and Multi-room TV Streaming. *17 Recorder's web browser doesn't support flash & some characters set (e.g. Chinese etc.). Some features of websites may not be available on the web browser. *18 Compatible with Android™ devices, Ver.4.2 and above and Miracast certified. For information on whether the smartphone, etc. supports Miracast, contact the manufacturer of the device. *19 The LUMIX camera must support DLNA (DMR) function. *20 Compliant with CENELEC EN 50221: February, 1997. *21 Excluding the projecting parts. *22 With the purchase of Wireless LAN Adaptor DP-WLS. * Usable capacity will be less. - Specifications are subject to change without notice. Weight and dimensions are approximate.

*1 Discs recorded and finalised on recording devices. *2 HDMI connection required. *3 For 4K Upscaling playback a TV with same resolution is required. *4 Only Full HD and SD 24p content can be up-converted for 4K2K resolution. *5 This function is effective only when reproducing AVCHD data recorded with x.v.Colour technology. The function cannot be used with BD-ROM or DVD-ROM discs. HDMI connection is required. *6 CD sampling is done at 88.2kHz. MP3 data can be re-mastered only on CD. *7 Compatible with Android devices. Ver. 4.2 and above and Miracast certified. For information on whether the smartphone, etc. supports Miracast, contact the manufacturer of the device. *8 Requires broadband Internet service. *9 With the purchase of Wireless LAN Adaptor GH-WL5. *10 The external HDD with capacities of 2TB or less in processing NTFS / FAT32 data is supported. Playback is not possible with some external hard disk drives. *11 To enjoy content, you will need to insert a USB flash drive (1GB or more of free space, sold separately). Requires broadband Internet service. *12 Excluding the projecting parts and the pedestal. *13 To enjoy 4K / 60p images, high speed HDMI cables supporting 18 Gb/s bandwidth are required. - Playability may vary depending on the content, disc and quality of the recording. For content recorded for your personal use. - Specifications are subject to change without notice. Weight and dimensions are approximate.

AT A GLANCE: ICONS & LOGOS EXPLAINED

4K ULTRA HD TV

4K ULTRA HD: The new breed of Panasonic 4K Ultra HD TVs carry 3840x2160 pixels, which is four times as many as current Full HD. This means their pictures contain four times as much resolution, with an impact on picture quality that has to be seen to be believed.

4K Pure Direct: During 4K signal transmission to the TV via HDMI, colour information is slightly compromised, resulting in less-than-ideal colour shading and gradation. With 4K Pure Direct, all colour information and full resolution is transmitted to the TV, so the picture retains its crisp, rich colours as intended in 4K Ultra HD.

Web Browser 4K: As the name implies, the Web Browser lets you easily browse the Internet on the TV and enjoy user-friendly features. And with Web Browser 4K, you can enjoy online content in high 4K resolution, perfect for viewing maps on screen.

4K Studio Master Drive: To seamlessly complement your 4K viewing experience, several 4K Ultra HD VIERA TVs also feature 4K Studio Master Drive. It unites Super Chroma Drive and Black Gradation Drive to deliver accurate colour expression and smooth low-brightness gradation for vivid, intricate brightness and darks like never before.

4K Online Player: So you have superb images of online videos and websites in high 4K resolution, 4K Online Player directly streams 4K online content using a built-in 4K video decoder.

4K Media Player: The renowned Media Player is now available with VIERA 4K Ultra HD TVs. It lets you easily enjoy your personal multimedia entertainment stored on any USB memory device.

4K Swipe & Share: This free, updated iOS/Android Panasonic TV Remote 2 App lets you share photos stored on a compatible mobile device in full 4K resolution by 'swiping' them towards the TV.

4K ULTRA HD Upscaling: This digital video format boosts conventional Full HD media to the next generation of TV resolution, which is four times higher than Full HD – delivering breathtaking image and sound quality.

THX 4K Display: With VIERA panels featuring THX 4K Display, you can be sure of experiencing the original image quality of a movie just as the film-makers intended – in spectacular 4K. These VIERA TVs have cleared the high standards for 4K set by the THX® Certified Display Programme.

4K 50/60p Input: Based on HDMI 2.0 and Display Port™ 1.2a specifications, this input terminal accepts super-high-resolution 4K signals in outstanding high quality, with a higher frame rate capability.

Studio Master Colour: Experience more vivid viewing thanks to amazing colour gradations and brightness. It's possible with Studio Master Colour. The high-colour-space LED panel construction reproduces colours faithful to the original, for vividly colourful images from a wide colour gamut.

Up to 3000Hz BLS 4K IFC: This motion engine combines a powerful panel and Intelligent Frame Creation interpolation processing with backlight scanning to deliver cleaner, smoother and sharper 4K Ultra HD pictures from any source.

4K JPEG Playback: 4K JPEG Playback is essential for enjoying personal images on a large 4K screen in ultra-high 4K quality.

TECHNOLOGY

VIERA: The name for the Panasonic range of high-quality TVs, VIERA is known around the world for amazing picture quality and easy-to-use features that make your home entertainment experience better than ever.

IPS LED: Panasonic LED panels employ the latest liquid crystal material, with higher light output and a highly efficient LED backlight – resulting in super-low power consumption without compromising picture quality or features.

Full HD: Full High Definition (HD) offers an amazing resolution of 1920x1080 - in contrast, PAL offers 720x576 and NTSC 720x480. This means you can enjoy Full HD programmes and films with sharp, dynamic images and brilliant colour.

EASY OPERATION

my Home Screen: With the Panasonic my Home Screen feature, you can customise the start-up screen of your VIERA TV to suit your personal style and needs. Quickly access your favourite apps and functionalities – my Home Screen gives you an easy overview at a glance.

my Stream: A wide variety of media – such as TV programmes, video on demand and Internet content – is seamlessly and automatically recommended to you by this intuitive interface. Via the Favourite button on the Touch Pad Remote, the TV conveniently learns your entertainment preferences.

my Home Cloud: From downloading home screens and apps to storing data, the Panasonic my Home Cloud gives you access via the VIERA TV to a wide variety of content and apps as well as an online shop for purchasing TV accessories.

Panasonic TV Remote 2 App: With this app, it is easy and fun to share – simply swap multimedia or websites from your smartphone's display to the TV screen and vice versa. This newly enhanced VIERA app goes a step further, letting you swipe and store your media from your smartphone to the TV.

Swipe & Share: Unleash the full potential of your smartphone with the Panasonic TV Remote 2 App and Swipe & Share functions. Share and stream personal content like pictures, movies and music to your VIERA TV simply from Android™ or Apple-based smartphones.

Game Mode: VIERA TVs come equipped with Game Mode. This smart feature speeds up the TV's image processing on the screen so you have a clear, fast-moving picture with every game. Enjoy sharp real-time gaming – where what you play is what you see.

Info Bar: The Info Bar automatically displays useful information, quickly as you walk by the TV. A proximity sensor, coupled with Face Recognition via the built-in camera, instantly calls up handy information on the TV, such as the weather forecast, messages, notifications and a clock.

TV Anywhere: Enjoy your favourite multimedia content wherever you are. The VIERA TV streams live broadcasts or recorded content stored on a USB HDD to your mobile device.

Touch Pad Remote: The newest VIERA TVs come supplied with a stylish Touch Pad Remote. Intuitive and robust, it also enables Voice Interaction and Voice Print for logging into my Stream and gaining access to your personal content. At the press of the Favourite button, you can give your 'thumbs up' to the programme you like.

Voice Assistant: With Voice Assistant, voice operation is virtually just like talking. It enables you to quickly search through desired content. At the same time, Voiceprint Recognition makes the log-in procedure simple and fast

Voice Guidance: VIERA TVs with Voice Guidance will verbally inform you of programme information, recording and other settings, and more with clear pronunciation and tone. It provides easy-to-understand operating procedures for people with impaired vision or elderly people.

NFC (Near Field Communication): Enables easy pairing of the NFC-capable speaker and smartphone via Bluetooth – at a single touch of the smart device – making troublesome settings a thing of the past.

SMART NETWORKING

Twin HD Tuner: With the Twin HD Tuner - either for satellite, cable or antenna hook-up - you can watch a TV show and zap at the same time, watch one show while recording another, or swipe the show to your tablet and watch something else on the TV.

Internet Apps: Cloud-based, the new Internet Apps functionality gives you instant and easy access to the Internet as well as a wide range of apps, Video on Demand services, games and more.

Wireless LAN built-in: Many VIERA TVs can be wirelessly connected to your home network. So you can take advantage of Internet Apps and DLNA networking throughout your home.

Wi-Fi Built-in: Many Panasonic video products can be wirelessly connected to your home network. So you can take advantage of Internet Apps and DLNA networking throughout your home.

Web Browser: The Web Browser will soon become one of your favourite functions. That's because it lets you easily browse the Internet – on the TV. And it features the Bookmark Launcher, which lets you navigate through up to 27 bookmarked website thumbnails.

USB HDD Recording: Thanks to this function, available with many new cutting-edge VIERA TVs, you can hook up an external USB hard disk to record TV shows or films in excellent quality. It also supports Timer Recording, Direct TV Recording and Pause Live TV.

Built-In Camera: The ideal complement to premium and high-end VIERA TVs, the Built-In Camera conveniently and automatically pops up when you receive a Skype video call on the TV so you can immediately begin to talk. It also works with Face Recognition to enable Info Bar functionality.

SDXC: With the SDXC Memory Card up to 64GB, you can view high-resolution movies, photos and AVCHD files via your home cinema set-up or VIERA TV featuring an SD Memory Card slot.

3D Passive Eyewear: Invite a friend over for a movie night and enjoy Hollywood blockbusters in amazing 3D. High-quality VIERA TVs featuring passive 3D rendering come with two 3D Passive Eyewear products.

3D Active Eyewear: The range of cutting-edge VIERA TVs featuring active 3D rendering comes with two 3D Active Shutter Eyewear products.

Media Player: To give you the full range of sharing options, all VIERA TVs feature the must-have Media Player. Just slot your USB memory device into the TV's dedicated port and the Media Player automatically starts up - so you can easily play back and view your multimedia entertainment.

Bluetooth®: Bluetooth is a wireless technology standard for exchanging data over short distances from fixed and mobile devices. This means you can connect any Panasonic Bluetooth-enabled product with other Bluetooth-enabled devices without the cable clutter - and in high quality.

Qualcomm® AllPlay™: A smart media platform that enables seamless streaming of high-quality local and Cloud-based content – via high-performance Wi-Fi connectivity – across multiple product brands and platforms.

Twin HDMI: With Twin HDMI, one signal output is exclusively dedicated to audio, so your home cinema media sounds incredible.

Wi-Fi Certified: Panasonic products that are Wi-Fi Certified have been specially certified by the Wi-Fi Alliance for their ability to wirelessly connect to your home network.

Panasonic Music Streaming App: Available for all models that feature Bluetooth®, AirPlay or DLNA, this app controls wireless music streaming from any device, be it smartphone, tablet or PC, and recognises compatible wireless speakers.

DLNA: Access videos, pictures and music stored in other rooms and enjoy content throughout the home by connecting compatible devices via DLNA. The Panasonic TV Remote 2 App lets you transfer content from your iPhone/Android™ tablet or smartphone to your TV, or access your DLNA server from mobile devices.

Social Networking: Share your thoughts while watching television at the same time. When your VIERA is connected to the Internet, Social Networking TV lets you access programmes like talent shows and chat about them simultaneously on Facebook or Twitter, or video chat with your mate while watching a live match.

Miracast™ / Display Mirroring*: This functionality uses Wi-Fi Direct technology to transfer content from a Wi-Fi device for playing back on a TV – even without a Wi-Fi access point.

*Functionality support depending on Android hardware and operating system version.

HIGH-QUALITY PICTURE

3D: If you want to enjoy hassle-free 3D films at home, then Panasonic has the ideal solution for you. Opt for a high-grade VIERA LED TV featuring 3D rendering and you'll get brilliant 3D entertainment with HD image quality.

Advanced Colour Spectrum: With Advanced Colour Spectrum, you can enjoy a great viewing experience, with brilliant colour gradations. This is thanks to cutting-edge LED panel technology, which reproduces colours vividly over a larger colour spectrum.

THX Display: With VIERA panels featuring THX Display, you can be sure of experiencing the original image quality of a movie just as the film-makers intended. These VIERA TVs have cleared the high standards set by the THX® Certified Display Programme.

3D: Enjoy your favourite blockbusters in stunning 3D at home. Full HD 3D Blu-ray Disc™ Playback brilliantly reproduces images that leap off the screen, with enhanced depth, lustre and texture.

2D-3D Conversion: To turn any 2D content into exciting 3D entertainment, all models and Panasonic players and recorders feature the 2D-3D Conversion function, letting you enjoy your entire Blu-ray Disc™ or DVD movie collection, or even your favourite TV programmes, with the exciting feeling of 3D.

Local Dimming: To ensure robust blacks and delicate gradation with any film genre, a select range of VIERA TVs feature Local Dimming. Local Dimming PRO or Local Dimming ULTRA. Rich gradation is achieved by matching the backlight control and optimising the brightness level to each area. This enables deeper black expression and displays even tiny details in dark scenes with crisp clarity.

ICON GLOSSARY

Processing Engine	 Quad Core Pro5	Quad Core Pro5 : The most powerful processor found in the Panasonic TV line-up, Quad Core Pro5 features an advanced High Efficient Video Coding (HEVC) decoder for next-generation 4K entertainment. Images are smoother and more precise in detail, while operation of smart features is more seamless than ever.	 DUAL-CORE	Dual-Core : The Dual Core central processing unit (CPU) ensures the TV panel reproduces great picture quality and is equipped to handle Smart features, with seamless functionality.
	 HEXA-PROCESSING ENGINE PRO	Hexa-Processing Engine PRO : Ultra-fast and powerful, Hexa-Processing Engine PRO leverages a cutting-edge HEVC decoder to provide next-generation, high-efficiency video coding with improved compression. The result is a thrilling VIERA experience with absolutely breathtaking images.	 Vreal SMART	Vreal Smart PRO : A dedicated multimedia engine, advanced Vreal Smart PRO ensures fast processing of all your digital networking as well as high picture quality. It is the powerhouse for a full entertainment experience, providing added smart features for more versatile viewing.
	 HEXA-PROCESSING ENGINE	Hexa-Processing Engine : The high-speed Hexa-Processing Engine by Panasonic leverages a total of six processing units to deliver an amazing VIERA experience. You'll not only notice the vivid colours – you'll also become immersed in the on-screen action.	 Vreal PRO	Vreal PRO : Ensures state-of-the-art picture rendering at enormously fast speeds for brilliant, high-resolution entertainment.
Advanced Features	 STUDIO MASTER DRIVE	Studio Master Drive : To seamlessly complement your intense Full HD viewing experience, some high-end Full HD VIERA TVs also feature Studio Master Drive. It unites Super Chroma Drive and Black Gradation Drive to deliver accurate colour expression and smooth low-brightness gradation for vivid, intricate brightness and darks like never before.	 CONTENT OPTIMIZER	Content Optimizer : So you have beautiful pictures from virtually any source, VIERA TVs employ Content Optimizer. This high-performance engine leverages any number of enhancement features – refining a variety of images, broadcasts and websites as well as virtually all kinds of sources to provide excellent picture quality.
	 1080P PURE DIRECT	1080 Pure Direct : HDMI normally compresses the incoming broadcast signal and then the TV reproduces the picture, with less-than-ideal results. 1080P Pure Direct does not compress the colour signal, so the picture quality remains sharp and crisp.	 178°	Advanced Viewing Angle : Because not everyone can sit right in front of the TV at the same time, VIERA IPS LED TVs provide a 178° wide viewing angle so that friends and family sitting to the side can comfortably watch programmes and blockbuster films in all their vivid colour and brightness.
Contrast / Filter	 ULTIMATE CONTRAST	Ultimate Contrast : The cutting-edge VIERA AX900 series features Ultimate Contrast, delivering ultra-bright images and impressive black levels. To achieve this, it combines innovative direct LED backlight technology with local dimming and intelligent rendering drivers.	 BRILLIANT CONTRAST	Brilliant Contrast : To give you great contrast with bright images, deep black levels and low power consumption, many VIERA TVs feature Brilliant Contrast. It combines innovative panel and LED backlight technologies for an immersive home cinema viewing experience.
	 SUPREME CONTRAST	Supreme Contrast : Several high-end VIERA TVs feature Supreme Contrast, which delivers spectacular levels of deep black with bright, crisp images. It does this by combining cutting-edge Panasonic panel technology with innovative LED backlight featuring Local Dimming.	 HIGH CONTRAST	High Contrast : VIERA TVs with High Contrast deliver a genuine home cinema atmosphere. Deep blacks and bright whites make for more dynamic images, with great colour and crisp picture quality.
Motion (Hz)	 1800Hz BLS IFC	1800Hz BLS IFC : Excellent picture rendering is yours with 1800Hz BLS Intelligent Frame Creation (IFC), available with high-end VIERA TVs. This advanced LED technology features enhanced high-speed drive performance so you can enjoy smooth images of sports or action scenes.	 100Hz Back Light Blinking	100Hz BLB : VIERA TVs featuring 100Hz BLB motion technology ensure your favourite films, games and TV programmes boast great motion sharpness for clear moving images.
	 1200Hz BLS IFC	1200Hz BLS IFC : With a VIERA TV featuring 1200Hz BLS Intelligent Frame Creation (IFC), you are assured smooth, jitter-free reproduction of fast motion images. This drive technology combines intelligent scanning with enhanced high-speed drive performance to provide outstanding sports or action movies.		

HIGH-QUALITY SOUND

 VR-Audio MASTER SURROUND 2.1	VR-Audio Master Surround 2.1 / Pro Surround 2.1 : The innovative slim speaker system built into a host of cutting-edge VIERA TVs gives an outstanding boost to every film and music genre, with rich bass reproduction. Front firing technology, Digital Signal Processing and the Panasonic Sound Lifting Driver deliver a spatial sound impression.	 aptX[®] LOW LATENCY CSR	aptX[®] : Developed for video content and gaming, aptX Low Latency provides seamless audio-video synchronisation when transmitted via Bluetooth [®] AZDP, offering a latency time of 32 milliseconds.
 VR-Audio TRUE SURROUND	VR-Audio True Surround : The advanced VR-Audio True Surround system gives the effect of a multi-channel system from only two speakers – to completely envelope you in a surround sound sensation.	 FLAC	FLAC : FLAC stands for Free Lossless Audio Codec and is a High Definition audio compression technology without any loss in quality. Panasonic products with FLAC compatibility enable you to listen to compressed music files without compromising on high audio quality.
 V-Audio	V-Audio : Using an analogue-based algorithm, V-Audio achieves a left-right directional sound space for an excellent listening experience.	 Clear-mode Dialog	Clear-mode Dialog : Gives sound greater depth and makes voices sound like they're coming from the centre of the screen. The dialogue volume is adjustable to 4 levels, which is great for hearing clear dialogue over the surround sound.
 XBS Master	XBS Master : Short for Extra Bass System, XBS Master is a Panasonic-unique, high-quality sound technology for even more powerful bass sound without distortion.	 Lincs D-Amp	LincsD-Amp : Based on MASH noise-shaping technology, LincsD-Amp markedly reduces jitter and sound distortion that can affect audio clarity – producing pure, brilliant sound.
		 High Res SOUND	High-res Sound : A clear listening experience is yours with High-res Sound, available for Panasonic audio products which support a playback frequency range of at least 48kHz.

DESIGN

 SUPER NARROW BEZEL	Super narrow Bezel : So you can focus more on the film or programme you're watching, all Panasonic VIERA TVs feature a Super Narrow Bezel. Not only does it make your viewing experience more expansive, this design also perfectly harmonises with a premium home media centre.
---	---

ECO

 ECO NAVIGATION	Eco Navigation : Easily adjust a host of energy-saving functions, such as Intelligent Auto Standby and Eco Mode. Eco Navigation enables you to save even more energy while enjoying brilliant images.	 Eco Mode	Eco Mode : When Eco Mode is activated, a photo sensor measures the ambient light conditions in the room, and then the picture settings are automatically adjusted. As a result, the TV uses less power in dim lighting – without any deterioration in image quality.
