Inquiry on 04/09/2014 :

Inquiry:

Dear Sir/Madam,

We have a limited module application.

As the module is too small to bear a label even a FCC ID.

so our client must prints it on the PCB board (not on the BT module but near the BT mod

Attached the label location.

If it is ok if the label is printed on that location ?

This is a very urgent question .So hope you can reply to ASAP.

Thanks a lot

Best regards.

---Reply from Customer on 04/09/2014---

Dear Sir/Madam,

Wish you have a good day.

This question is really very urgent ,as the TCB has mentioned this comment.

I need your answer to prove if the label location mentioned by our client is OK.

The size of module is $21 \pm 0.5 \text{mm}$ x $13.5 \pm 0.5 \text{ mm}$ x $2.35 \pm 0.5 \text{mm}$.

This is too small to paste a label.

That's the main reason why our client donot show the label on the module.

---Reply from Customer on 04/09/2014---

Dear Sir/Madam,

Wish you have a good day.

We also upload the module spec and label location.

Please see the attachement.

We will be very appreciated if you can reply to me.

Best regards.

FCC response on 04/10/2014

You would have to file in your application an attestation demonstrating your proposed a make sure that the labeling is clearly associated with the module. The module must not your OEM installation instructions would make it a condition of use by the host. The ho but a label that it contains FCC ID. As the Grantee you would be responsible that any h comply with your proposed alternative labeling.
