PYS High-Tech Co., LTD

2022/02/21

To: Federal Communications Commission 7435 Oakland Mills Road Columbia, MD

FCC ID: 2AU7DFL048624

To Whom It May Concern:

This letter is to ascertain that, Product: **4-in-1 Power Station M/N: FL048624**, **PYS-WPC21039-01** has been the units used for conducting FCC compliance testing, and it meets 680106 D01 RF Exposure Wireless Charging App v03 Clause 5(b) all 6 conditions.

1	Power transfer frequency is less that 1 MHz
Reply:	Yes, Power transfer frequency is less that 1 MHz ; Ans : The maximum
	operating frequency of EUT is 326.5KHz.
2	Output power from each primary coil is less than or equal to 15 watts.
Reply:	Yes, Output power from each primary coil is equal to 15 watts. The max output power is 15W.
3	The transfer system includes only single primary and secondary coils. This
	includes charging systems that may have multiple primary coils and clients
	that are able to detect and allow coupling only between individual pairs of
	coils.
Reply:	Yes, EUT has three primary coils, but each coil can only correspond to one
	client
4	Client device is placed directly in contact with the transmitter.
Reply:	Yes, The client device needs to be in contact with the transmitter base, and
	the contact distance is less than 10mm.
5	Mobile exposure conditions only (portable exposure conditions are not
	covered by this exclusion).
Reply:	No, EUT is mobile device.
6	The aggregate H-field strengths at 15 cm surrounding the device and 20 cm
	above the top surface from all simultaneous transmitting coils are
	demonstrated to be less than 50% of the MPE limit.
Reply:	Yes, RF Exposure Evaluation report test result meets this Limt. Please refer
1.7	to the RF exposure Evaluation report.

If you have any question or concerns, pls. contact us.

Sincerely,

Jack, zheng
