

Bosch 100 Series Dishwashers

Feature Highlights

SHE3AR7(2/5/6)UC
SHX3AR(2/5/6)UC – Bar

24/7 Overflow Protection

Watches over your kitchen even when the dishwasher is not running. If the water level is too high, the tub pumps out the water and closes the inlet valve.

PrecisionWash™

Equipped with intelligent sensors and powerful precision spray arms, we ensure your dishes are beautifully clean.

Quietest Dishwasher Brand in the U.S.

With 18 unique sound-reducing technologies, and starting at 50dBA, Bosch leads the way in quiet.

SHEM3AY5(2/5/6)N

Anti Fingerprint Stainless Steel

Providing the ultimate exterior protection against fingerprints, dirt, and smudges.

Utility Rack

Making space for those hard to place items and opening up precious space in the upper rack for all your washing needs.

Specialized Cycles & Options

Providing you even more cycles and options for every kind of clean – introducing Speed60™ with a 1 hour wash and dry.

SHXM4AY5(2/5/6)N

3rd Rack

Our 3rd rack provides 30% more loading area while its V-shape leaves room below for tall items in the upper rack.

3-Level RackMatic

Easily adjust to three heights and nine rack positions, allowing taller items to fit in the middle or larger pieces in the lower rack.

Infolight®

Quiet you can see – Infolight projects a red beam on the floor to signal that a cycle is running, and turns off when your dishes are done.
