## Aerosols, Contact Cleaners

## 3M ${ }^{\mathbf{T M}}$ General Purpose Contact Cleaner 16-101

Clean and remove contaminants from electrical equipment with this alcohol based solvent. Sprays on and quickly dries. Noncorrosive and ideal for cleaning electrical connections and terminals such as contacts, relays, switches, instruments and sensors. This general-purpose cleaner removes light oils and other contaminants, then evaporates quickly without leaving residue. No CFC's.

| UPC Number | Size | Case <br> Qty | Units |
| :--- | :--- | :--- | :--- |

## $\mathbf{3 M}^{\mathbf{T M}}$ Quick Drying Contact Cleaner 16102

This aerosol contact cleaner is great where a very rapidly drying solvent is needed. It is perfect for precision cleaning jobs such as sensors, relays, motor switches, generators, elecromechanical assemblies and terminals. Removes soil and other contaminants, then evaporates very quickly without leaving residue. Petroleum distillate alcohol based. No CFC's.

## Aerosols, Insulating Sprays

## Scotch ${ }^{\circledR}$ Insulating Sprays

Protects surfaces against weather, moisture, corrosion, oil, alkalis and acids. Use it over insulation on wire and cable splices. Also touch up insulation on motor windings and frames makes a great general purpose sealer.

great general purpose sealer.

## 3M ${ }^{\text {TM }}$ Scotchcast ${ }^{\text {TM }}$ Wet-Niche Potting Kit

## 2135

2135 provides protection against corrosion and possible deteriorating effects of pool water by reliably encapsulating the 8 AWG ground connection in a wet-niche shell. The wet-niche forming shell is a corrosion-
 resistant metal housing for underwater fixtures in permanently installed pools.

## $\mathbf{3 M}^{\mathbf{T M}}$ Weather Resistant Cable Ties - Mini

Designed to meet a wide range of temperatures from $-40^{\circ} \mathrm{F}\left(-40^{\circ} \mathrm{C}\right)$ to $185^{\circ} \mathrm{F}$
$\left(85^{\circ} \mathrm{C}\right)$. Molded of one-piece nylon for durability with the locking head designed with a double tooth pawl for maximum security. Accommodates bundle diameters from $1 / 8^{\prime \prime}$ to $4^{\prime \prime}$ and has a tensile strength of 18 lb .

## Heat Shrinkable Products, Thin-Wall Tubings

## 3M ${ }^{\text {™ }}$ Heat Shrink Thin Wall Tubing EPS-300

Thin walled tubing offering the advantages of integral, dual wall construction. The tubing is made from flame retardant, flexible, polyolefin lined with an internal layer of special thermoplastic adhesive. The heat shrinkable outer wall is selectively irradiation cross-linked, while the
 adhesive maintains high flow and excellent adhesion characteristics. This tubing is an environmental protection sleeve and insulation. It offers superb environmental protection for electronic components, twisted pigtail and inline wire splices, crimp splices, wire bundles and wire harness breakouts in automotive, truck, fleet, marine and industrial applications. Applications specifications: MIL-I-23053/4, Class 3. A 3:1 shrink ratio polyolefin heat shrinkable tubing that is widely used in a variety of electronic and electrical applications.

3M ${ }^{\text {TM }}$ Heat Shrink Tubing Kit FP-301
$3 M^{\text {TM }}$ FP-301 is a heat shrinkable flexible polyolefin tubing that offers an outstanding balance of electrical, physical and chemical properties for a wide variety of industrial and military applications. Rated for $275^{\circ} \mathrm{F}\left(135^{\circ} \mathrm{C}\right)$ continuous operation. FP-301 tubing is typically used as a
 shrink-fit electrical insulation over cable splices and terminations. It is also used for lightweight wire harness covering, wire marking, wire bundling, component packaging and fire resistant covering. FP-301 clear tubing provides excellent visibility for component packing. All FP-301 tubing is split resistant, mechanically tough, easily marked and resists cold flow.

## Lubricants and Coatings, Lubricants

## Scotch® Wire Pulling Lubricant Gel

Not only does $3 \mathrm{M}^{\text {™ }}$ Wire Pulling Lubricant Gel make wire pulling jobs smoother and safer, it also wipes off the cable quickly and cleanly before terminating or splicing. The consistent gel does not liquefy, or separate with hot or cold aging. It stays thick, smooth and ready to apply. Temperatue use range is $20^{\circ} \mathrm{F}$ to $110^{\circ} \mathrm{F}$.

| $\mathbf{0 0 - 0 5 4 0 0 7 - 5 0 6 2 5 - 6}$ | WL-55 | 55 gal | 1 | PA |

## Scotch® Wire Pulling Lubricant Wax

The thick, consistent lubricant does not liquefy or separate with hot aging; it scoops and applies easily to wire and cable without runs or drips in hot temperatures; and it will not evaporate too soon after pulls. The lubricant's low friction coefficient lessens the chance of wire damage from high pulling forces, wipes off the cable quickly and cleanly and leaves less residue in the conduit to block future pulls or prevent removal. Because Wire Pulling Lubricant Wax can be immersed in water for 30 min utes with minimal weight loss, it is also the choice for wet weather applications.

Tapes, Insulating and Splicing Tapes

## 3M ${ }^{\mathbf{T M}} \mathbf{2 2 4 2}$ Linerless Electrical Rubber Splicing Tape

General, multi-purpose electrical rubber splicing tape. Securely splice all voltages or use for jacketing and general insulation. Terminate wires and cable ends or insulate connections. Highly conformable rubber tape provides quality moisture seal and lengthens cable life. Economical tape to create splices that last. Rated up to $194^{\circ} \mathrm{F}$. 7 mil thick.

| UPC Number | Size | Case <br> Qty | Units |
| :--- | :--- | :--- | :--- |

## Scotch ${ }^{\circledR}$ Premium Vinyl Electrical Tape Super 88

Scotch® Super 88 Premium Vinyl Electrical Tape offers better mechanical/abrasion resistance, and is thicker for quicker buildup. For professional use, this 8.5 mil tape combines the flexibility of a PVC backing with excellent electrical insulating properties to provide primary electrical insulation for splices up to 600 V and protective jacketing. UL Listed and CSA Certified. Excellent resistance to UV rays, abrasion, moisture, copper corrosion, alkalis and acids. Excellent all-weather performance in cold to $0^{\circ} \mathrm{F}\left(-18^{\circ} \mathrm{C}\right)$ or hot to $220^{\circ} \mathrm{F}$ $\left(105^{\circ} \mathrm{C}\right)$.

## Tapes, Vinyl Electrical Tapes, cont'd

## Scotch® Vinyl Electrical Tape 35

Identify wires, leads, splices and terminations. Abrasion and weather resistant 7 mil tape. Excellent mechanical and electrical insulation properties. Wraps smoothly and holds tightly over a wide range of temperatures. Mark safety areas. UL listed. CSA approved.

## Scotch® Vinyl Electrical Tape Super 33+

Scotch® Super 33+ Electrical Tape a black, 7 mil tape, on a $1^{\prime \prime}$ core, combines the flexibility of a PVC backing with excellent electrical insulating properties to provide primary electrical insulation for splices up to 600 V . Abrasion-, corrosion-, and UV-resistant, it makes an excellent protective jacketing for high-voltage cables and wire harnessing. UL Listed and CSA Certified, it resists alkalis and acids, and is flame-retardant. Excellent all-weather performance in cold to $0^{\circ} \mathrm{F}\left(-18^{\circ} \mathrm{C}\right)$ or hot to $220^{\circ} \mathrm{F}\left(105^{\circ} \mathrm{C}\right)$.

## Tapes, Vinyl Electrical Tapes, Dispensers

## Scotch® Super Vinyl Electrical Tape 33+D Dispenser Pack

A premium grade vinyl electrical insulating tape, its aggressive adhesive and elastic backing ensure easy, water-resistant conformation to irregular surfaces in low temperatures, yet will not ooze or melt in high temperatures.

## Terminals, Tools

## 3M ${ }^{\text {TM }}$ Crimping Tool Ratchet TR-482

A compact, high quality tool designed to perform the six most common electrical wiring functions. Made of $1.125^{\prime \prime}$ heattreated carbon steel for maximum durability. It handles a variety of terminal and con-
 nector styles, insulated and non-insulated, over a range of 22-10 AWG.

| UPC Number | Case <br> Qty | Units | Wire <br> Range |
| :--- | :--- | :--- | :--- |
| $\mathbf{0 0 - 0 5 4 0 0 7 - 1 1 9 0 2 - 9}$ | 1 | EA | $22-10$ <br> AWG |

3M ${ }^{\text {TM }}$ Crimping Tool Ratchet TR-490
Crimps barrel and insulation grip independently on No. 22-10 AWG insulated and non-insulated terminals and connectors: nylon or vinyl insulated, butted or brazed seam.

## Terminals, Tools, cont'd

## 3M ${ }^{\text {TM }}$ Crimping Tool Scissors TH-450

Made of $1.40^{\prime \prime}$ high strength, heat-treated carbon steel. Lightweight without sacrificing strength. It handles a variety of terminal and conductor styles, including flags, closed end connectors, crimp sleeves and standard parts, insulated and non-insulated, over a broad range of 26-6 AWG.

| UPC Number | Case <br> Qty | Units | Wire <br> Range |
| :--- | :--- | :--- | :--- |
| $\mathbf{0 0 - 0 5 4 0 0 7 - 1 3 7 6 0 - 3}$ | 1 | EA | $26-6$ <br> AWG |

## 3M ${ }^{\text {TM }}$ Scotchlok ${ }^{\text {TM }}$ Crimping Tool TH-440

High carbon heat-treated steel and unique design provide a high strength/weight ratio, durability, reliability and wide range of applications. Crimps a broad range of terminals and connectors.

| UPC Number | Case <br> Qty | Units | Wire <br> Range |
| :--- | :--- | :--- | :--- |

[^2]Wire Connectors, Spring Connectors and Tools

## 3M ${ }^{\text {M }}$ "Performance Plus" Wire Connectors

Because of their increased wire range, just four "Performance Plus" Wire Connectors handle the work of seven standard connectors. T/R+ replaces the yellow, tan and red connectors in the majority of field applications. $\mathrm{O} / \mathrm{B}+$ replaces the orange, blue and gray wire nut style connectors, as well as $70 \%$ of
 the yellow wire nut and wing style connectors. $\mathrm{R} / \mathrm{Y}+$ replaces both red and yellow wing style connectors. B/G+ covers both the large blue and gray connectors. This simplifies selection of the right connector for a wide range of wiring jobs. There's also less inventory to manage, and a better chance you'll have the connector you need to do every job.

| UPC Number | Color | Case Qty | Units |
| :--- | :--- | :--- | :--- | :--- |
| $\mathbf{0 0 - 0 5 4 0 0 7 - 4 3 1 5 0 - 3}$ | Blue/Gray | 100 | CONN |

## 3M ${ }^{\mathbf{T M}}$ Electrical Spring and Grounding Connectors

The quick-spin, wing-torgue design of Electrical Spring and Grounding Connectors 312,412 and 512 is easy on your fingers. The day's last connection
 will feel almost as good as the first.
Generous expansion room accomodates a wide range of solid or stranded wire. Use the 312 (yellow) connector for wire combinations from 3 \#20 to 3 \#12 AWG, the 412 (tan) connector for 2 \#20 to 3 \#10 AWG and the 512 (red) connector for 2 \#18 to 5 \#12 AWG. The 512G (green) is used for grounding connections.

Wire Marking and Identifying Products,
Dispensers

## 3M ${ }^{\text {TM }}$ ScotchCode ${ }^{\text {TM }}$ Refill for Write-On Wire Marker Tape Dispenser SWD

Offer three marker sizes to fill your needs. Each of these durable, lightweight dispensers provides a flat, stable surface for writing on the marker. Dispenser is factory loaded and re-enterable, providing clean storage for the die-cut markers. The markers are transparent vinyl tape with acrylic, self-laminating, pressure sensitive adhesive that resists flagging, dirt, oil and heat. Write on tape markers are for use on $0.09^{\prime \prime}$ to $0.315^{\prime \prime}$ O.D. wire and cable and any other marking uses from control panels to golf clubs.

## GB Electrical

UF Splice Kit - For waterproof splicing of UF cables minimum No. 14/ 3, No. 12/2, maximum No. 8. Kit includes set screw splice connector and $8^{\prime \prime} \times 1.3^{\prime \prime}$ diameter heavy wall heat-shrink tubing with water-tight adhesive liner. Simply strip outside jacket and insulation from conductors, insert cable thru tubing, install conductors into connectors and
 tighten set screws. Center heat-shrink tubing over connector and heat tubing until it
assumes the connector configuration. Comes in polybag with header.

Plastic Staple - Plastic insulated staples are used to attach Romex®, UF, and other type NM cable up to 3 -conductor (No. $10)$. Use the $1 / 2^{\prime \prime}$ for 2 -conductor Romex® and other type No. 12 and No. 14 NM cable conductors. Use the $3 / 4$ " for 3 -conductor Romex® and other type No. 10 and No. 12 NM cable conductors. Fast and easy-to-install, both of the zinc-plated nails can be driven together without splitting wood. Nail heads recess into the staple for minimum exposure. Made of high-grade UV-resistant polyethylene, they will resist rot, rust, and resist the effects of temperature extremes and the degradation of the ultraviolet rays of
 sunlight.

## GB Electrical

Wire Connector - The Hex-Loc® connector has a hex head design that allows for automatic or manual driven installations with a $7 / 16$ " socket. These multi-range, copper-to-copper connectors cover most everyday electrical applications. The square wire spring grabs and holds the wires for a secure connection. The long skirt covers stripped wires and the streamlined design provides for compact installations. These connectors are rated at 600 V maximum with a 1000 V maximum in lighting fixtures, luminares, and signs. Grey. Joins No. 14AWG thru No. 6AWG.
Minimum combination: 3 No. 14. Maximum

combination: 1 No. 6 with 1 No. 8 . UL listed. 50 per box.

## King Innovation

Underground Wire Connector - Applications for all wet locations. Includes outdoor and inground splices, no junction box needed. UL 50 tested as raintight/watertight. Eliminates unwanted maintenance call backs. No on-sight assembly, no need for multi-piece kits. Custom silicone locks out moisture and air. Useable in approved direct bury applications. Enhances all NEMA-rated enclosures. Meets NEC 110-11 requirements. Color coded to industry standards. 1 -step operation saves money, time, and effort. Spring ensures safe, tight grip with improved continuity. Sealant never leaks or hardens. Lifetime guarantee. Temperature rating of $167^{\circ} \mathrm{F} . / 75^{\circ} \mathrm{C}$. Splices copper-to-copper.

## 

Plastic Reusable Spool - Constructed of tough nylon, this product is built to last. The Reel Easy fits all Southwire coils. This reusable spool was designed to withstand physical and environmental abuse. It eases the wire pulling process by eliminating kinks and the need for additional people to walk out the wire before pulling. Tested in job environments, this product proves to be contractor durable and a time saving product.

## WIRE/CABLE

Southwire
Underground Service Entrance Cable - Mobile home feeder consists of 4 quadruplexed type RHH or RHW-2 or USE-2 AlumaFlex A-8000 series aluminum alloy compacted conductors. The cable contains a triple extruded white striped neutral conductor and
 a solid green jacketed grounding conductor. Insulation is sunlight-resistant. Mobile home feeder is intended for the connection of mobile homes to a supply of electricity where permanent wiring is required as specified in the National Electrical Code. It is suitable for direct burial at temperatures not to exceed $90^{\circ} \mathrm{C}$. Voltage rating is 600V. UL listed. 500' reel.

## W. Wiremold

Wire Channel - Rigid PVC nonmetallic raceway system. Smooth finish. Packaged in easy-to-handle 5' lengths. Running wires through the channel is no problem with the Sure-Snap ${ }^{\text {TM }}$ System. The snap together base and cover make it safe and simple, positive locking feature deters children from opening. Just drill and screw the channel
 base to the wall in desired location, lay the wires in and affix wire holders. Snap the cover on, no need to fish wires. UL listed. Wire capacity. Ten model No. 14 THHN wires, seven model No. 12 THHN wires, 5 model No. 10 THHN wires; or up to 12/2 with ground NM wire. Use a model No. NM 910 or NMW910 accessory kit for every 5' of wire channel.

## AFC Cable

Nonmetallic Whip - Nonmetallic prewired liquidtight flexible conduit system. Convenient labor and material saving assemblies used for connecting air conditioners, pumps, swimming pool motors, and compressors. The prewired lengths include nonmetallic connectors for quick and trouble-free installations. Won't rust, crack, or conduct electricity, providing the best protection for extreme applications. UL listed, CSA approved.

## AFC Cable

Liquidtight Nonmetallic Conduit - AMERI-TITE® takes the place of metallic liquidtight conduit and is for machinery, air conditioning and heating applications, and outdoor lighting. Safe and easy-to-use. Nonconductive, noncorrosive, abrasion-resistant and consistant diameter. Highly flexible, won't fracture or separate. Cuts easily and smoothly. Resistant to Ozone, Alkaline, Acid, and Oil. Conduit and fittings provide complete nonmetallic, nonconductive system. Ground integrity never compromised. UL listed for direct buriel.

## AFC Cable

RWS Flexible Conduit - Flexible reduced wall steel conduit. Fits regular armored cable or flexible conduit connectors.
Designed for electrical wiring where UL listing is required. Made from hot dipped galvanized steel with heavy zinc coating. Medium weight conduit. UL listed.

## AFC Cable

Aluminum Flexible Conduit - Reduced wall flexible aluminum conduit. Maintains all the strength and durability of steel, but is $2 / 3$ lighter in weight. Designed to meet industry specifications for use with standard conduit connectors and device boxes. Meets UL Standard 1, NEC Article 350, and Federal Specification WW-C 566C.

## AFC Cable

MC Cable - McTuff® MC lightweight steel cable is blue-tipped color-coded. $30 \%$ lighter than steel AC. Flexible-no special bending, easier to work with in limited space. Rounded profile pulls easily through studs. Prewired, has full size insulated green ground included. Copper conductors are type THHN $90^{\circ} \mathrm{C}$ wire, anti-short
 bushings, marker tape. May be exposed or concealed, in cable trays, approved raceways or as an open run of cable. Dry locations only. UL listed.

## Allied Tube

IMC Conduit - IMC (Intermediate Metal Conduit) is the lighter-weight rigid-type steel conduit. Made of
high-performance steel, given extra strength
by a special electro-weld forming process. Has lighter steel wall yet in many instances is more rigid than Rigid conduit. UL listed, recognized by the 1978 NEC for all uses, including hazardous locations. Comes in 10' lengths with threaded ends.

Split Bolt Connector - For copper-to-copper connections. Bolt and nut made of high-strength, corrosion-resistant silicon bronze alloy. For making pigtail, tap or straight splice with larger conductors, solid or stranded. Split bolts slip over continuous wire. The end of the other wire is then placed over the continuous wire inside the unit and the nut is tightened. Connections must be completely insulated. UL listed.

## Cooper Wiring

Commercial Grade Connector - High visibiity nylon connector for use with power tools, lawn and yard equipment, and commercial cleaning. Nylon construction provides a high level of resistance to most chemicals and solvents found on commercial and industrial job sites. Designed with rounded edges and back to prevent the connector from snagging on cables and other objects. Individual wiring pockets guide each wire into the appropriate wire clamp assembly. 15A/12V, 2-pole, 3 -wire grounding. Cord range: No. 16-3 to No. 12-3. NEMA 5-15R. CSA and UL listed. 1 per card.

## Cooper Wiring

Watertight Plug - Thermoplastic elastomeric exteriors, multipoint moisture seals, corrosion-resistant metal components, and glass reinforced nylon interior construction provide excellent watertight operation. Can withstand temperatures from $-81^{\circ} \mathrm{F}$. ( $-62^{\circ} \mathrm{C}$.) to $275^{\circ} \mathrm{F}$. ( $135^{\circ} \mathrm{C}$.). Can be used in wet locations and hosedown areas,
 computer equipment that requires a secure power connection, locations where vibration, dust, or metal chips are present, wherever physical abuse may occur and a secure connection is required. 15A/125V, NEMA 5-15P. CSA and UL listed. 1 per bag.

## GB Electrical

Circuit Breaker Finder - Circuit tracker - circuit locator. Locates circuits without turning off breakers. Works with a 120 V AC outlet. Audible and visual indicators, built-in battery strength indicator. Easy-to-use with transmitter plugged into a live 120 V AC outlet, run receiver probe over bank of breakers or fuses in a panel to identify breaker tied to the test circuit. Install a standard screwdriver in the adapter to identify light bulb sockets. Heavy-duty magnet on back to attach to metal. Requires a 9V battery (not included). 5 year limited warranty. UL listed. 1 per card.

## LEVITON

Media Center - Enclosure accomodates up to 2 full-width pre-configured cabling panels, delivering audio/video, voice, and data to any room of the home or office. Positive stops on the housing prevents enclosure from falling through studs during installation. 1-piece 18-gauge steel unit with cover can be surface mounted or recessed, cover features a $3 / 4^{\prime \prime}$ overlap. Mounting guides on cover align screw-holes and reduce chances
 of dropping during attachment. Combine 2 or more enclosures for larger installation or future expansion. Multiple knockouts on top and bottom facilitate cable entry and routing. UL listed. White.

| Product <br> No. | Mfg. <br> No. | Description | Order <br> Mult. | Weight | Unit <br> Cost |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $558109-C$ | $155-47605-140$ | Media Center Enclosure | $1 / 0 / 2$ | 11.781 | 49.99 EA |

## LEVITON

Wiring Box - Shallow $1.45^{\prime \prime}$ box can be used with any flush mount single gang communications outlet. Knockouts for rear and side cable entry. Mounting options include installer-supplied screws or double-sided tape. UL listed. White. 1 per bag.

| Product <br> No. | Mfg. <br> No. | Description | Order <br> Mult. | Weight | Unit <br> Cost |

Meter Breaker Panel - Combines meter mounting and a circuit breaker distribution section in a rainproof enclosure. In addition to residential installations, the panel can also be used for rural service entrance, mobile homes, and for temporary power on construction sites. Main breaker factory installed. Single phase, 3-wire, flush or surface mount. Solid neutral bar and cover included. 120/240V, 10,000 AIC, NEMA 3R, rainproof, with RH hub provisions. Overhead or underground service. Raintight. UL listed.

## Cutler Hammer

Feed-Thru Load Center - 200A enclosure. For use in mobile homes or modular housing requiring feed-through type application. Both neutral and phase conductors are wired into the top of the load center and feed up to 8 full-size circuits (or 16 half-size circuits) and then continue through the bottom to be wired to the distribution panel inside the home. Ideal for adding outside circuits such as exterior lights, water pumps, sheds and hot tubs. Twin neutral and straight-in wiring design.
