(GB)

Thank you for choosing the Yale Standard Alarm System. This simple to install system has been design with the user in mind, just follow these simple steps:

- A) Read the manual carefully to have a good understanding of the required steps.
- B) Make a good plan, work out the best places to locate the devices (up to a total of 20 devices can be paired into the system, devices in the Alarm kit are pre-paired).
- C) Test the devices in these locations before fitting to make sure you have good wireless performance.
- D) After activation, the tamper protection will be switched off for 3h to give you a comfortable installation. Tamper can be switched off for additional 3h intervals if needed or for battery change.

(IT)

Grazie per aver scelto l'impianto di allarme wireless Yale Standard Alarm. Questo impianto, semplice da installare, è stato progettato con l'attenzione rivolta all'utente. Attenersi solo a tre semplici procedure:

- A) leggere attentamente il manuale in modo da comprendere correttamente le fasi da eseguire.
- B) preparare un piano adeguato di montaggio e individuare i punti migliori nei quali posizionare i dispositivi (è possibile associare fino ad un massimo di 20 dispositivi pre-associati).
- C) testare i dispositivi in questa posizione prima dell'installazione per accertarsi di avere una buona prestazione wireless.
- D) Dopo l'attivazione, la protezione anti-effrazione verrà disattivata per 3 ore in modo da permettere una comoda installazione. Se necessario o per la sostituzione delle batterie, la protezione anti-effrazione potrà essere disattivata per altre 3 ore.

(DE)

Vielen Dank, dass Sie sich für ein wireless Yale Standard Alarmsystem entschieden haben. Dieses einfach zu installierende System wurde für den Kunden entwickelt. Folgen Sie einfach den wenigen Schritten:

- A) Lesen Sie die Bedienungsanleitung sorgfältig, um die einzelnen Schritte einfach nachzuvollziehen.
- B) Erstellen Sie sich einen Plan, um zu sehen, wo die Geräte am besten angebracht werden können (Bis zu 20 weitere Geräte können angebunden werden. Die Geräte im Set sind bereits verbunden).
- C) Testen Sie die Geräte in dem angedachten Bereich, bevor Sie diese fest anbringen, um eine einwandfreie kabellose Funktion zu gewährleisten.
- D) Nach der Aktivierung, ist der Sabotagealarm 3 Stunden deaktiviert, so das Sie die Geräte installieren können. Falls notwendig oder bei einem Batteriewechsel kann dies um weitere 3 Stunden verlängert werden.

(NO) (SE) (DK)**(NO)**

Takk for at du valgte et Yale Standard alarmsystem. Denne installasjonsmanualen er utformet for å forenkle monteringen mest mulig. Det anbefales derfor at du følger den foreslåtte rekkefølgen på monteringen.

A) Les grundig gjennom manualen.

B) Legg en god plan for plassering av sensorer. (Komponentene i denne pakken er alle ferdigprogrammerte til systemet og klare til montering. Systemet kan imidlertid utvides med opp til 20 ekstra komponenter.)

C) Test den trådløse forbindelsen på alle stedene du har tenkt å plassere komponenter, før endelig montering.

D) For å forenkle installasjonen vil sabotasjefunksjonen være deaktivert i 3 timer etter første oppstart av alarmsentralen. Ved behov kan sabotasjealarmen når som helst deaktiveres i 3-timers intervaller. Dette kan for eksempel være nyttig ved batteriskifte av sabotasjesikrede komponenter.

(SE)

Tack för att du valt Yale Standard larmsystem. Detta system är enkelt att installera och har konstruerats med användaren i åtanke, bara följ dessa enkla steg:

A) Läs manualen för att få en god överblick över stegen.

B) Gör upp en plan hur du vill placera sensorerna. (Upp till totalt 20 sensorer kan paras in till systemet. Sensorer i kittet är redan in-parade)

C) Testa trådlösa förbindelsen till sensorerna på tilltänkta platserna innan de monteras fast.

D) Efter aktivering av Larmet (ON på Sirenen), så kommer Manipuleringslarm vara urkopplat i 3h för smidig installation. Detta kan stängas av för ytterligare 3h perioder om det skulle behövas, eller för batteri byte.

(DK)

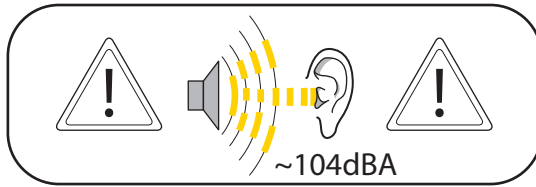

Tak for dit valg af Yale Standard Alarm System. Både system og manual er udformet på en måde, som sigter på at forenkle montering og dagligt brug. Det anbefales at følge den angivne monterings-rækkefølge:

A) Læs manualen grundigt igennem.

B) Forbered en god plan for placering af sensorer. (Komponenter i denne pakkeløsning er alle leveret programmeret til systemet og klar til montage. Systemet kan udvides, op til max 20 komponenter.)

C) Test trådløs forbindelse for ønsket placering af de enkelte komponenter før fastgørelse.

D) For at lette montering vil destruktions alarm, efter aktivering af sirenen, være deaktiveret i en periode af 3 timer. Perioden kan forlænges yderligere med 3 timer ved at slå destruktions alarm fra. Samme procedure ved batteriskift.
