Subject: Class II Permissive Change for Class B Computing Device Peripheral
FCC ID: A3KM095 / 15" LCD Monitor, Dell Model 1501FP

Gentlemen:

Enclosed, please find Philips Electronics Industries (Taiwan) Ltd.'s application for equipment authorization dated December 3, 1999. The subject device was originally granted on October 13, 1999 in compliance with Part 15, Subpart B of the FCC Rules.

This device was originally reported as a 15" LCD Monitor that supported 30-61 kHz horizontal and 56-75 Hz vertical sync frequencies with maximum resolution up to 1024x768, Non-Interlaced. Also, this monitor was reported as provided with such features as: (1) 15" TFT Color Flat LCD Panel type LQ150X1DG12; (2) base stand with permanently attached interface cable with one bonded ferrite core and no USB interface ports; (3) detachable non-shielded power supply cord (4) analog and digital video input ports; and (5) detachable shielded 15-Pin and 24-Pin D-Sub connector signal cable with two bonded ferrite cores.

This Class II Change is to report alternate LCD Panel and re-layout of main control board. Refer to attached photographs for details. Other items such as FCC ID Label, Block Diagram and User Manual remains unchanged.

This modified monitor was system tested in accordance with C63.4-1992 to show compliance to FCC Part 15 limits. Compliance tests were performed in representative worst-case video modes 1024x768 @ 60 kHz with both 15-Pin D-Sub connector for analog and 24-Pin D-Sub connector for digital connection.

Should you have any questions or comments, please contact the undersigned. Thank you for your attention and cooperation in this matter.

Sincerely yours,

Richard Mullen
