Sports Camera Usual Manual

Forward

Thank you for purchasing this camera. Please carefully read the manual before using, and keep it at a safe place for future reference.

The information covered in this use manual is based on the latest information at the time of its preparation. The screens, illustrations, etc. used in this manual are intended to provide a more detailed and intuitive explanation of the operation of the camera. Due to the differences in technology development and production batches, they may differ slightly from your actual digital video camera.

1. User Notice

This camera is required to use a TF high speed card (multimedia memory card) of U3 or higher.

Memory card instructions

- If you are using a memory card for the first time, be sure to format the memory card before using it.
- Please turn off camera before inserting or removing the memory card.
- After using the memory card many times, its performance will be reduced. If the performance of the memory card is reduced, you need to buy a new memory card. When the memory card is not in use, please put it in the card sleeve.

- How to use the memory card: Push the SD card into the card slot until the card is fully inserted, as indicated by the battery on the bottom of the camera. To remove the SD card, gently press the end of the memory card inward and the memory card will pop up.
 - If the memory card is in one of the following conditions, the recorded data may be damaged:
 - The memory card is not used properly.
 - When recording, deleting (formatting) or reading, turn off the power or remove the memory card.
- Note: The memory card gets hot after long use. This situation is perfectly normal.

2.Product Features

- >Provides a waterproof case with waterproof function for you to shoot wonderful water sports.
- > Shooting function
- > Ultra HD display to show and play back the great video shots
- > Battery removable, easy to replace the battery to extend the use time
- > Available to recording videos while charging
- > HD wide-angle lens
- > Support up to 128G memory card

- > Supports a variety of video recording formats, such as: 4K30FPS、108060FPS、720P60FPS.....
- > Multiple shooting modes, support single shot or automatic shooting
- > Super mini appearance, many colors available

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
