Re: FCC ID OMLGDL-002

Applicant: GE Harris Aviation Information Solutions, LLC
Correspondence Reference Number: 9912
731 Confirmation Number: EA94792
Date of Original E-Mail: 10/1/1999

Subject:

1. This application is for what amounts to two different devices, from a Part 15 perspective: one is mounted on an aircraft, the other is not. As such, 2 FCC ID's are required, one for each device. A second application must be filed, with a different FCC ID. It should include all of the information included in this application, but its label, of course, must be different, reflecting the new FCC ID. You should also make clear which device is getting the new FCC ID, and which will retain this FCC ID. Please also amend this application with this clarification.

If you send me an e-mail, at GCZUMAK@FCC.GOV telling me when you have filed the new application, and providing me with the new FCC ID and confirmation (EA) number, I will "pull it out of line" and process it immediately.

2. How was the output power measured? The report states that the Aironet module was set for a 100 mW output, yet the numbers which you present indicate an output nearly twice that level. Please address. (The response to this question should also be included in the new application).

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 60 days of the original e-mail date may result in application dismissal pursuant to Section 2.917(c) and forfeiture of the filing fee pursuant to Section 1.1108

DO NOT Reply to this email by using the Reply button. In order for your response to be processed expeditiously, you must upload your response via the Internet at www.fcc.gov, E-Filing, OET Equipment Authorization Electronic Filing. If the response is submitted through Add Attachments, a message which informs the processing staff that a new exhibit has been submitted must also be submitted via Submit Correspondence. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
