PROGRAMMING THE UNIVERSAL REMOTE CONTROL

The universal remote control has four programmable source buttons (TV, **AUX**, Cable and Game). You can program these buttons to control your TV, cable/satellite box, DVD or Blu-ray Disc™ player, game system, DVR or other auxiliary source by entering the code for your source's brand. There may be several codes for your source. You may need to perform this procedure multiple times to locate the correct code.

Locate the code

1. Power on your source.
2. Locate the code for your source's brand in the appropriate section of the Universal Remote Control Device Codes list (located in the back of the guide).

Enter the code

1. On the remote control, press and hold the appropriate source button (TV, **AUX**, Cable or Game) until all six source buttons glow, then release. For example, to program your TV, press and hold TV until all six source buttons glow, then release.

The appropriate source button continues to glow.

2. On the number keypad, enter the code for your source's brand and press **vol.**

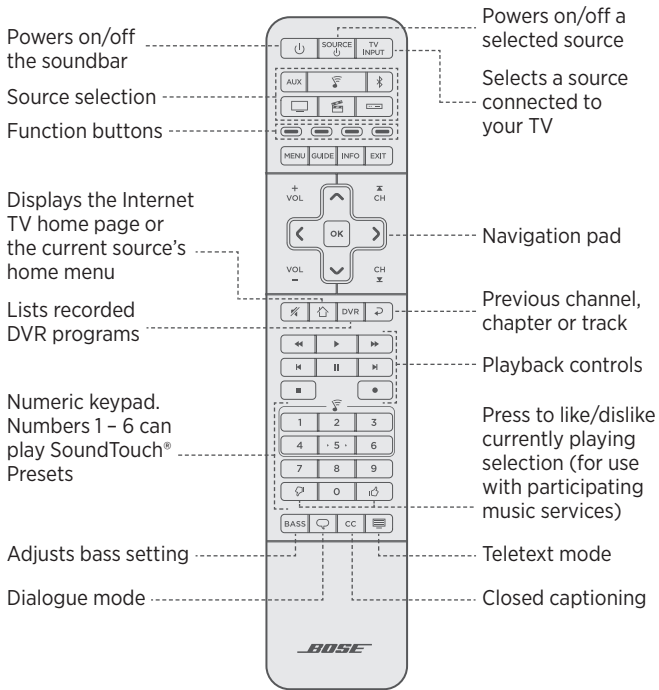

Test the code

1. Test the source for basic functions by following the instructions for your source:
 - **TV**: press the channel buttons. Press **MENU**. The settings menu appears. Press **◀** and **▶** to navigate.
 - **Cable/satellite box**: press **GUIDE**. The programming guide appears. Press **◀** and **▶** to navigate.
 - **DVD or Blu-ray Disc™ player**: press **GUIDE**. The settings menu appears. Press **◀** and **▶** to navigate.
 - **Game system**: press **◀** and **▶** to navigate through the menu.
2. Based on your source's response to basic functions:
 - **Remote responds accurately**: press **EXIT** to exit programming and save your settings.
 - **Remote does not respond or does not respond accurately**:
 - **If your source button glows**: press **vol.** to move to the next code. Repeat steps 1 and 2 in "Test the code." You may need to repeat this procedure 30 or more times. If all six buttons blink three times, you have cycled through all codes for your source.
 - **If your source button is off**: your remote exited programming mode. Repeat steps 1 and 2 in "Enter the code" and steps 1 and 2 in "Test the code."

Note: Your source may not be compatible with universal remote controls or may not accept IR (infrared) signals. Refer to your source owner's guide for more information.

USING THE REMOTE CONTROL

Universal remote control buttons

Source selection

After programming the remote control, you can switch between sources by selecting different inputs on your TV using the remote control.

Notes:

- To use the *Bluetooth*® source, you must pair a mobile device to the soundbar (see page 5).
- Pressing , **AUX**, or on the remote control does not switch the source. It turns on the soundbar and changes the mode of the remote so that the remote can control your source's functions.

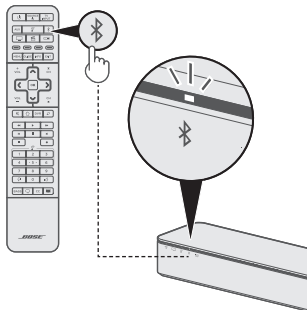

- Press the button for the source you want to control.
The source button glows.
- Press .
The source powers on.
- If the source is connected to your TV, press and select the correct input on your TV.

To stream music from your *Bluetooth*® phone or other mobile device, you must pair your mobile device with the soundbar.

Note: For more information on using *Bluetooth*® functions, refer to the owner's guide at global.Bose.com/Support/ST300

Pairing a mobile device

1. On the remote control, press and hold the *Bluetooth*® button  until the *Bluetooth*® indicator  on the soundbar blinks blue.

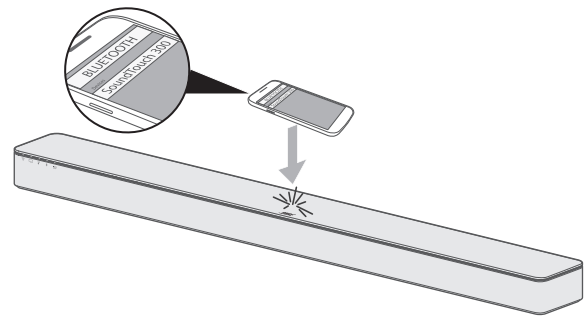

2. On your mobile device, turn on the *Bluetooth*® feature.
3. Select your SoundTouch® 300 soundbar from the device list.
Once paired, the soundbar emits a tone.

Pairing a mobile device with NFC

1. With the soundbar powered on, unlock your mobile device and turn on the *Bluetooth*® and NFC features.
2. Gently tap the NFC touchpoint on your mobile device to the top of the soundbar behind the Bose® logo.

Your mobile device may prompt you to accept pairing.

Once paired, the soundbar emits a tone.
