

# Measurement one step further

Newest flue gas analyzer EUROLYZER® S1

## Robust housing

for high-protection combined with a slim silhouette.

## Large high-resolution display

offers best readability and clearly structured menu navigation. Optimal protection through scratch-resistant armored glass.

## Leading "dual-mode concept":

Instinctive one-hand operation via scroll wheel or touch display - sensitive even when operating with gloves.

## CAPBs® compatible

Expandable with over 35 sensor units and sets from the CAPBs® system.

## Hands-free work

thanks to strong holding magnets or using the holding eyelet.

## EuroSoft® connect

## LED ring

for visual status feedback.

## Tightness test

connection for commissioning pipes, suitable for pressure test valve.
