Re: Application dated 5/20/2016
Applicant Name: Motorola Mobility LLC
Equipment Class: PCE-PCS Licensed Transmitter held to ear
FCC ID: IHDT56VA5

Dear Sir or Madam:

Under the authority of Section 1.113 of the Commission's Rules, the above referenced Grant of Equipment Authorization is hereby SET ASIDE.

Review of the information in this filing indicates that TCB processing may not conform with 47 CFR 2.962 (f)(1) and (c)(4) requirements to apply rules and uniform policies and procedures and/or obtain interpretations where appropriate.[47 CFR 2.962(f)(11)]

The Form-731 includes for example the following lines:

22H 814.7 - 848.3 0.07 0.01 PPM 1M10W7D

22H 816.5 - 846.5 0.112 0.01 PPM 4M48G7D

22H (part 22 subpart H) is not allocated nor licensable below 824 MHz, thus cannot be listed for equipment authorization; see KDB Pub. 634817 for policies and procedures on Form-731 listings AND selection of test frequencies. See also Apr. 2016 FCC-TCB conference notes about application processing for ESMR bands.

In the event that this filing can be corrected, FCC will reissue the grant at a later date. (Other information about set aside, etc., is given in KDB Pub. 161357.)

The result of this action today reverts the Grant of Equipment Authorization to a pending application status with all rights for amendment, dismissal or denial. As another result of this action, authorization for marketing has been withdrawn. If importation or marketing has begun, these actions should cease immediately.

Questions concerning this matter may be directed to Tim Harrington at the above address.

Sincerely,

Rashmi Doshi
Chief, Laboratory Division
