

DYNABOOK EXPANDS AFFORDABLE SATELLITE PRO RANGE WITH NEW C40 AND UPDATED C50 MODELS

- **New 14" Satellite Pro C40-H delivers optimum mobility functionality for the budget-conscious professional or student**
- **Refreshed 15" Satellite Pro C50-H equipped with updated performance and usability-enhancing features**
 - **Lowest priced notebooks in dynabook's portfolio**

17 November 2020, Dubai, United Arab Emirates– Today, Dynabook Europe GmbH reveals two additions to its Satellite Pro range – the new 14" C40-H, which expertly combines affordability and mobility, and an updated 15" model, the C50-H, with new processor, display, and memory and storage options. Both devices offer users all the tools for a productive work or study day in an easily portable package, without draining the IT budget. The pair feature powerful 10th Gen Intel® Core™ processors, DDR4 RAM memory up to 16GB* and fast SSD storage options up to 512GB.

Designed for life on the move

The C40-H has been designed with pure mobility and style in mind. Weighing just 1.55kg with a 18.9mm compact form factor, it is easily transportable and its battery life¹ of up to 10 hours makes it a reliable companion for professionals and students on the move. Featuring a narrow bezel design around a non-glare 14" LCD HD or FHD screen, the device offers an immersive viewing experience but in a compact footprint, while its sister 15" device boasts up to 9.5 hours battery life¹ and screen options including a new 250 NIT FHD screen for improved brightness. Both devices are equipped with a large keyboard and ClickPad, with supporting Precision TouchPad for comfortable typing and navigation all day long, while the 15" C50 adds a numeric keypad. Both devices also offer an optional SecurePad with fingerprint reader.

Despite being budget-friendly laptops, the new models' distinguished dark blue exterior design means the devices don't compromise on a contemporary look and feel. What's more, painted surfaces on both Satellite Pro devices have also been treated with a special anti-bacterial paint to protect users from the growth of bacteria. Tested² at a level of 99.9%, users can trust that these surfaces will not be a breeding ground for bacteria.

"We know that IT budgets are limited, especially with the current crisis unfolding, but the pressure's still on for workers and students to stay productive," said Damian Jaume, President, Dynabook Europe GmbH. "That's exactly why we've launched the Satellite Pro C40-H and updated the Satellite Pro C50 we launched earlier this year - to ensure that everyone can get access to the technology they need to get their work done, at an affordable price point."

Connect to collaborate

The C40-H and C50-H are built with a range of ports and connectivity options so users can work or learn wherever they choose to be. A USB Type-C port provides charge, connect, display and transfer data functions via one port, while two further USB 3.0 ports, a full-size HDMI port and Gigabit-LAN port provide further peripheral connectivity. In addition, a micro SD card slot accommodates portable storage needs. For further connectivity, an optional USB-C dock allows a single click connection to minimise cable clutter and quickly connect a user's favourite peripherals. When it comes to wireless, the C40-H and C50-H are equipped with WiFi 802.11 AC and Bluetooth connectivity.

The C40-H and C50-H empower users to stay in touch with customers, colleagues and peers. Meeting all of today's users' video conferencing needs, the devices are both equipped with an HD Webcam, stereo speakers and in-built Cortana-enabled microphone. They also gives users the option to pair their own headphones via Bluetooth or through the mic/headphone combo slot.

Device-level security

Defence against increasingly sophisticated cybercriminals is an ongoing challenge for every business and one that should be tackled with secure and manageable devices that incorporate advanced security features. The C40-H and C50-H are equipped with the firmware-based Trusted Platform Module (TPM) 2.0 meaning information is encrypted on the device to remove the risk of it being tampered with. In addition, user and admin password capabilities prevent unsolicited access, while an optional Kensington lock slot helps prevent physical theft.

The Satellite Pro C50-H and C40-H will be available in the Middle East and Africa from November 2020 and December 2020 respectively, pending certification. For more information about the dynamabook range please visit:
