2014

A Better Life, A Better World

At Panasonic, we're dedicated to improving peoples' lives and making the world a better place—one customer, one business, one technological leap forward at a time. Nowhere is this guiding principle better exemplified than in our 2014 line-up of feature-rich, easy-to-use telephones. As the lines blur between home-based and mobile communications, Panasonic makes it easy to stay in touch with groundbreaking phones that let you answer landline calls on a smartphone or tablet. Or choose from our acclaimed Link2Cell line which lets you answer incoming cell phone calls on any of your home phone handsets. We even have phones that will not only charge your smartphone but also tell you when you've received a text message.

Ultimately, we engineer everything we make with a singular goal in mind: to complement the way you live your life. And that means keeping you connected.

Telephone Glossary	38-39
Specification Charts	40-45
Handset Compatibility Chart	46

Still missing cell phone calls and texts while at home? Like most people, you probably don't like carrying your cell phone with you around the house. Now you can have the functionality of your cell or smartphone and the convenience of a multi-handset cordless phone system. With Panasonic Link2Cell¹, you can simply park your cell phone in its charger and forget it. Link2Cell is a home phone that syncs with your cell phone via Bluetooth so you can make or receive cell phone calls using any of the cordless handsets throughout your home. Select Link2Cell models include a USB port for charging your cell phone and will even tell you when you've received a text. Use the Phonebook Transfer feature, and transfer up to 600 names and numbers from your cell phone to the built-in handset directory via Bluetooth. You can even register a second cell phone to the system and assign it a distinctive ring

so you'll know who the call is for. And of course, Link2Cell functions as a normal home phone and includes all the convenient features you'd expect from Panasonic.

Talking Text Sender Alert

When a call comes in through your linked cell or smartphone (Link2Cell), the handset will announce the name or phone number of the sender using the text-to-speech function. (Select models only)

Locates Cell

Simply press the "Locates Cell" button on the base unit if you've misplaced your cell or smartphone. This feature will locate your cell or smartphone by causing it to ring*.

**Cellphone cannot be in vibration or silence mode.*

Smartphone Connect

Select models feature Smartphone Connect which allows your tablet or smartphone to double as an additional handset to your home phone. So you can make or receive landline phone calls with your tablet or smartphone when it's connected to the same wifi network as your home phone. Up to 4 tablets* or smartphones can be registered.

**Android or iOS only.*

Smart Function Key

New 2014 models equipped with the Smart Function Key button on the handset and the base unit offer a single-click solution to accessing other features, such as retrieving voice messages, viewing missed calls, receiving calls or turning alarms off.

Advanced Silent Mode

Select 2014 models feature Advanced Silent Mode which allows you to selectively silence phone calls from a specified group. So you won't be disturbed in the evening by unwanted callers but know the phone will still ring if the kids call from college.

Enhanced Noise Reduction

The Enhanced Noise Reduction feature available on select 2014 models lets you suppress background noise around the caller while simultaneously enhancing their voice making it easier to hear them. So a parent getting a call from their teenager at a concert can hear what time to pick them up or when a friend calls from a noisy ballgame, you can hear where to meet afterwards.

Baby Monitor

Handsets equipped with the Baby Monitor feature will notify you via an additional handset*, a tablet or smartphone in another room when the baby starts crying.

**Sold separately.*

Key Detector

Attach the optional Key Detector to your car key ring or other easily misplaced items and forget about ever losing them ever again. Using any of your telephone handsets, you can activate the Key Detector's beeping alarm and quickly track down your lost keys. Key Detector's powerful range finds objects up to 200 yards away so you'll find whatever's lost whether it's upstairs, in your car or in the yard. You can register up to four Key Detectors and give each a distinctive name, like Dave's keys, Sharon's keys, etc.

Smartphone Charge

No convenient electrical outlet for charging your cell phone or smartphone? No problem. Select models feature a convenient USB charging port. The new KX-PRL262 has a docking station that will charge your iPhone via a built-in Lightning Connector*

**Compatible with iPhone5 and iPod touch with Lightning connector.*

Text Message Alert

Never miss an important text because you don't have your cell phone with you. Models equipped with Text Message Alert signal the home phone handsets when you receive a text on your cell phone.

Advanced TAD Functions

Panasonic keeps you in touch with Advanced Answering Device Functions on select models. Now you can be alerted to recorded messages whether you're at home or on the road. When a caller records a message, the base unit will beep alerting those in the house. Not at home? The phone will automatically send a message to a registered cell or office phone along with playback options.

Intelligent Eco Mode

This feature automatically lowers the power consumption when you're using the handset close to the base unit. Not only does it extend the available talk time, it's good for the environment. When less power is used by the handset to communicate with the base unit, battery life is prolonged which results in less frequent charging and can result in fewer batteries in landfills.

Power Back-Up Operation (Handset)

What happens to your phone when there's a power outage? Nothing, with select models featuring Power Back-Up Operation. A powerful battery backup system keeps you connected when the power goes out. Keep a charged handset in the base unit and you can still make and receive calls with the other cordless handsets.

Talking Caller ID

Now you can hear who's calling from across the room without having to get up. Using text-to-speech technology, Panasonic phones featuring Talking Caller ID announce caller ID information in between rings. What could be more convenient?

Tone Equalizer

Everyone hears differently. To maximize clarity or accommodate hearing loss, Panasonic added Tone Equalizer control to select models. This exclusive feature actually lets you adjust bass, mid-range or treble tones in a caller's voice for maximum clarity.

Call Block

Store the Caller ID info of any and all unwanted callers into your phone's Call Block list so that you can eliminate future pesky calls from them. After their information is stored, they'll get a busy signal.

KX-TCA60

Hands-Free Headset

- 2.5mm Connection
- Provides Hands-Free Usage
- Reversible for Use with Either Ear
- Adjustable Microphone
- 4-Foot Cord

KX-TCA94B

Clip-on Headset

- Adjustable, Flexible Microphone Provides Optimal Voice Clarity
- Convenient In-Cord Volume Control
- Mute Switch
- Reversible for Use with Either Ear
- Cord Clip

2-Way Paging/Automatic Intercom You can page and communicate between the handset and the base.

2-Way Radio Mode Use the expandable handsets away from the base unit to communicate from one handset to another.

2-Way Conversation Record Use 2-way recording to save a telephone conversation for later playback.

3-Color Light-Up Indicator with Ringer/VM Alert (4 Available Options) Select from blue, green, amber or multi-color options. The light-up indicator will flash quickly to show that you have an incoming call, and it will flash slowly to let you know that you have a new message in your voice mailbox.

5.8 GHz Frequency-Hopping Spread Spectrum (FHSS) Technology 5.8 GHz technology operates on a different wavelength with much less traffic than the 2.4 GHz technology while maintaining the great security, incredible clarity and long range you'd get with 2.4 GHz technology.

Advanced Silent Mode The Advanced Silent Mode allows you to selectively silence phone calls from a specified group when the phone is set in this mode.

Advanced TAD Functions Enhanced Telephone Answering Device functionality in which the unit beeps to alert those at home that a message has been recorded and also forwards recorded messages to a registered cell or office phone along with playback options.

All-Digital Answering System Messages are recorded on an advanced microchip for quiet operation and easy retrieval. The total recording time is 15 minutes for most models, but they vary up to 60 minutes of total recording time.

All-Digital Voice Mail System The digital voice mail system can contain up to 8 mailboxes, with a total recording time of up to 100 minutes. It features individual mailbox greetings, mailbox access from any cordless station, auto attendant, voice prompts, time/day stamps and much more.

Auto Message Delete You can program your mailbox to automatically delete all messages when they become one month old.

Baby Monitor The handset in baby's room will notify you via an additional handset, a tablet or smartphone in another room when the baby starts crying.

Bilingual Display The LCD language can be set to either English or Spanish.

Call Block Allows the user to block unwanted calls by entering Caller ID info into the phone's call block memory.

Caller ID The LCD readout can display the caller's name and number, so you can see at a glance who's calling. You can also enjoy the convenience of printing the list of Caller ID activity to review.

Caller ID Call Waiting Displays the name and number of incoming callers, even if you're on another call. Up to 50 names and numbers can be stored in the memory for easy retrieval and direct callback.

Call Screening A monitor speaker allows you to hear incoming messages as they're being recorded.

Call Transfer You can transfer an outside call from the base unit to a cordless handset or from one cordless handset to another.

Chain Dial Search your phone book and dial a number you previously programmed during a phone call. This feature can be useful for those who frequently use "calling cards."

Choice Mail Lets you view and retrieve recorded messages without having to listen to portions of others to find the one you want.

Contact Sync Feature that allows syncing of your telephone and Microsoft Outlook on a PC. Incoming calls trigger a pop-up window in Outlook that shows caller contact information. Also enables outbound calling by clicking contacts in Outlook.

Customized Ringer Use this feature for unlimited free recording of your favorite songs or sounds that you can set as your telephone ringer. All you need is the included audio cable and the music or sound. (Maximum recording time is 2 minutes, depending on the model).

Data Port A phone jack built into the base lets you easily hook up a computer, modem, fax or answering machine.

DECT 6.0 (Digital Enhanced Cordless Telecommunication) Operates on the 1.9GHz frequency and offers excellent sound quality reduced interference, long range and extended battery life.

DECT 6.0 Plus Technology Enhanced version of DECT 6.0 in which transmission quality and range are improved by increasing the frequency of error correction up to 80x.

Digital Duplex Speakerphone Delivers crisp, natural sound without dropouts or clipping. Use the speakerphone for hands-free operation or to allow others in the room to join in your conversation.

Digital Handset Speakerphone A digital duplex speakerphone on the back of the handset enables convenient, high-quality hands-free conversations.

Dual Keypads Lets you dial from the base so you can make calls without using the handset.

Enhanced Noise Reduction Suppresses background noise around the caller while simultaneously enhancing their voice making it easier to discern the caller's speech.

Expandable Up to seven additional handsets can be added to the phone system for a total of 8 handsets (depending on model) while using only one base unit and one phone jack.

GM Greeting Message.

Handset Locator To locate a misplaced handset, simply touch a button on the base and the handset will ring.

Handset Volume Control Lets you adjust the handset volume to your preference.

Headset Jack (and Belt Clip) A standard 2.5mm jack enables you to connect an optional headset to the unit for hands-free conversations (on the go).

High Resolution Amber-Glow Backlit LCD (1.4") Easy operation amber glow backlit LCD with icon menu.

ICM Incoming Message.

Icon Operation Phone operation is made easy by choosing from clearly defined icons in the menu to select and set your phone feature options.

Intelligent Eco Mode Automatically lowers power consumption when handset is used close to the base unit.

Key Detector Uses a transmitting fob that can be attached to car keys or other objects. When Key Detector is activated using a handset, the fob beeps loudly letting you easily find the missing article.

Lighted Handset Keypad The keypad is illuminated for easy dialing in darkened rooms.

Light-Up Indicator with Ringer/Message (or VM) Alert The indicator will flash quickly to show that you have an incoming call, and it will flash slowly to let you know that you have a new message.

Light-Up ID Choose a light-up indicator color to link to your pre-programmed phone book data. The pre-programmed indicator light will occur when the corresponding Caller ID information is received from an incoming call.

Line Status LED Indicators Lets you know in a glance which line is in use.

Link2Cell Feature that lets you sync your cell or smart phone to your Panasonic home phone handset. Cell phone calls can then be made or received using your Panasonic handset.

Locates Cell The "Locates Cell" button on the base unit will locate your cell or smartphone by causing it to ring.

Memo Recording Instead of leaving a note you can record memos for family or friends.

Memory Redial Use the memory redial button to recall, and dial, any one of the last five dialed phone numbers.

Multi-Line Operation with 3-Way Conferencing Several users can make separate calls simultaneously where multiple lines are installed. It also allows you to conference two outside calls together with one system handset, or to conference two system handsets together with one outside call.

Name/Number Caller ID Displays the name and phone number of incoming callers on the LCD readout. Also, when you listen to your messages, it will show the Caller ID data for each person who left a message as their message plays.

New Message Playback Touch a button and the unit will play only the messages you haven't heard before.

Ni-MH Battery Included Ni-MH batteries have an advantage over Ni-Cd batteries in that they do not have memory effect, and the absence of cadmium in the Ni-MH battery makes it more environmentally friendly than the Ni-Cd battery.

One-Touch Direct Dial Button Lets you store an important phone number in memory for dialing at the touch of a button.

One-Touch Intercom Buttons You can page and communicate between the base and each extension at the touch of a button.

Phone Directory and Dialer Up to 50 names and telephone numbers (30 on certain models) can be stored and quickly accessed for dialing using the phone's navigator key or jog dial.

Phone Book Sharing Once you have programmed all your names and phone numbers into one of your handsets you can then share that phone book with any other handset in the system.

Power Back-Up Operation A powerful battery back-up system keeps you connected when the power goes out. Keep a charged handset in the base unit and you can still make and receive calls with the other cordless handsets.

Range Boost Improved, built-in antenna which extends transmission range by up to 20% compared to models without Range Boost.

Range Extender Repeating device that extends the effective transmission distance between the base unit and cordless handsets.

Remote Operation with Tone Remote Control When checking your messages on a touch tone keypad while away from home, you can control the Greeting Message, All Message Playback and Individual Message Erase.

Reversible Handset Design Lets you place the handset in the base, for charging, with the keypad and LCD facing up or down.

Ringer ID Choose from a downloaded or selectable ringer to link to your preprogrammed phone book data. The preprogrammed ringer will occur when the corresponding Caller ID information is received from an incoming call.

Rubberized Grip Non-slip strip on the handset perimeter to allow easier cradling and help prevent dropping.

Selectable Ringtones Choose from up to 7 different options when selecting what you would like to hear when your phone rings.

Silent Mode Allows the user to program individual handsets to ring or remain silent for specified time periods without affecting other handsets.

Simultaneous Base/Handset Calling The base and handset can be used on separate phone lines for two different calls.

Skip and Repeat Function Lets you selectively review your messages.

Smart Function Key The Smart Function Key button on the handset offers a single click solution to other features, such as retrieving voice messages, viewing missed calls, receiving calls or turning off alarms.

Smartphone Connect The Smartphone Connect feature allows your tablet or smartphone to function as a handset to your home phone. You can make or receive a landline phone call with your tablet or smartphone when it's connected to the same Wi-Fi network as your home phone.

Smart Wall-Mount Combines a low-profile base unit with a reversible pedestal for counter/desktop use or easy wall mounting by simply rotating the pedestal.

SMS Alert Function which signals the Panasonic home phone handset when you receive a text or your cell on smart phone.

Station Speed Dialer Lets you store and quickly dial as many as 10 frequently called phone numbers, depending on the model. Each station can hold up to 32 digits, giving you enough room to include your favorite long-distance access code (i.e., 10-10-XXX).

Talking Alarm Uses text-to-speech technology to make pre-programmed announcements.

Talking Battery Uses text-to-speech technology to remind the user when the handset needs charging.

Talking Caller ID When a call comes in, the phone doesn't just let you see who's calling, it actually tells you who's calling. Using text-to-speech technology the caller's name is announced in between rings if name-and-number Caller ID information is available.

Telephone Directory Navigator Lets you save and quickly recall your most important phone numbers. Up to 122 numbers can be stored, depending on the model.

Text Message Alert Function which signals the Panasonic home phone handset when you receive a text or your cell phone or smartphone.

Toll saver When checking your messages from a remote location, the system will answer on the first ring if you have any new messages. If it doesn't, you can then hang up to avoid toll charges.

Tone Equalizer Allows user to customize the tone of incoming calls, increasing or decreasing bass, mid-range or treble tones per the user's preference.

USB Charge USB port on select Panasonic phone base units suitable for cell or smartphone charging.

Voice Menu and Time/Day Stamp Digital voice prompts clearly inform you of the time and day that each message was recorded.

Voice Prompts and Time/Day Stamp A voice synthesizer will prompt callers through the messaging system, and will stamp each incoming message with the time and day it was received.

Telephone Explanatory Notes

- 1 Cell phone must have Bluetooth® capability and must be compatible to this cordless phone system.
- 2 Requires optional Key Detector fob sold separately.
- 3 Requires subscription to name-and-number Caller ID, Call Waiting and/or Voice Mail services offered by certain local telephone companies for a fee.
- 4 May require optional accessory handset sold separately depending on the model.
- 5 Name pronunciation may vary. Name pronunciation quality is based on names most commonly used in the United States.

- 6 Requires name and number registration in phonebook function.
- 7 Requires number registration in the Call Block list.

- The Bluetooth word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Panasonic is under license.
- Other trademarks and trade names are those of their respective owners.
