Ovens & Compact Appliances

Style your kitchen with Bosch Series 8 premium appliances.

For optimum design co-ordination, choose appliances belonging to the same Series. Create seamless lines in your kitchen, as panels and sizes are suited for stacking appliances or placing them side by side – made perfect for any kitchen look.

Your favourite café is now open 24/7.

Latte, cappuccino or espresso? With the Series 8 built-in coffee machine, you can treat yourself and your guests to any beverage at the touch of a button. Bosch barista technology guarantees a full-bodied aroma and perfect crema – for coffees as delicious as those brewed by your favourite café.

SensoFlow System for a perfect aroma

The optimal brewing temperature for an espresso is between 90°C and 95°C. If the temperature is any higher or lower, the flavour of the beans is only partially released or the coffee is bitter. Our smart SensoFlow System heats the water to just the right temperature for a full-bodied espresso aroma from the first to the last cup.

Your choice of coffee at the touch of a button

With the MyCoffee function, save your 8 favourite beverages with individual names. Innovative technology regulates the release of coffee, hot milk and foam to deliver the beverage of your choice at the touch of a button.

Automatic cleaning of the milk system

Now you can clean your coffee maker as easily as you prepare your morning pick-me-up. Each time you make a coffee drink with milk, the milk system is automatically rinsed out with a blast of steam. The coffee machine takes total charge of the milk system's daily maintenance, so that you can concentrate on enjoying your cappuccino or latte macchiato instead of cleaning.

Warming drawers

Our Series 8 warming drawers can do much more than just keep food and plates warm; they're also perfect for slow-cooking meat, defrosting frozen foods and proving dough.

The warming drawers from Bosch can be installed either separately or in combination with Series 8 ovens, compact ovens and our built-in automatic coffee machine. The practical 'push and pull' technology ensures they are always easy to open, even when you have both hands full. They are measured at 14cm height with 20 usable litres (net). Available in black or stainless steel.

Bosch Assist

Bosch sensor technology. The oven that cooks by itself.

Bosch Assist

Series 8 Ovens with graphic displays come with advanced sensor technology found in PerfectRoast and PerfectBake functions. They offer an extensive menu of food categories that help create your perfect meal. Simply select the desired dish, press start and your oven automatically sets the ideal heating mode, temperature and length of time, monitoring and modifying the cooking as required for the best results. Of course, you can also select these settings yourself just as easily.

PerfectBake

Baking has never been easier, thanks to the unique PerfectBake sensor. This function constantly measures the precise moisture level of your dishes and automatically adjusts the entire baking process. This means you'll never have to set the heating mode, length of time or temperature ever again. Simply choose the type of dish, press start and let your Bosch oven bake your food to perfection*.

AutoPilot

PerfectRoast meat probe

Achieve the perfect roast lamb, turkey, meats and fish. The PerfectRoast meat probe features three sensitive measuring points and uses the lowest temperature reading to determine the core temperature before calculating the cooking time required. The results are simply perfect. Used manually or with Bosch Assist, you can modify the core temperature (within a recommended range) and combine with steam cooking functions.

AutoPilot automatic programs

Thanks to our selection of AutoPilot programs, meal time is now easier than ever. Our pre-set automatic programs allow you simply to select the relevant dish with confidence that you'll get perfect cooking results every time. AutoPilot determines the cooking mode, temperature and duration. It even switches off the program towards the end of the cooking time. Cooking couldn't be simpler.

Features may vary depending on models. Please check individual product specifications.

*Only works from a cold start. Do not open the door during the cooking process or you will have to continue manually.

Add a new spin to your kitchen design with the Series 8 Black Glass Oven range.

Combining a sleek premium design with intuitive features. Bosch Series 8 cooking appliances use the highest quality stainless steel and black glass to deliver a timeless, elegant and stylish finish to any kitchen. With just a turn of the simplistic control ring, you can navigate through the entire cooking menu with ease.

Series 8 TFT Touch Graphic Display

The iconic control ring and clear TFT screen display, combined with the DirectSelect TouchControl buttons, make operating the Series 8 ovens simpler than ever before. Food images and helpful prompts guide you through each step, giving you total flexibility and control of cooking functions.

Series 8 TFT Touch Symbol Display

The intuitive control ring and clear TFT display with DirectSelect icons make it easy to operate your oven. Shortcuts to the two most commonly used heating functions, helpful icons and clear descriptions inside the control ring provide all the information you need to keep track of your cooking.

Healthier enjoyment with Bosch steam ovens.

Food prepared with steam not only tastes wonderful, it's also a healthier alternative to other cooking methods. With steam, food retains its original vitamins and aromas while releasing the full natural flavour. For added peace of mind, Bosch steam ovens have integrated water tanks, so no direct water connection is needed.

Combination steam oven

The best of both worlds, the Series 8 built-in oven (HSG656XB6A) has the power to use pure steam or add bursts of steam alongside conventional heating methods. Use the full steam function for gentle, healthy food preparation; perfect for fish, vegetables and even some desserts.

Compact ovens with steam

Bosch steam compacts come equipped with full steam and added steam functions. Having the ability to cook entirely with steam allows you to bring out the maximum nutrients from healthy ingredients. Small but great, these appliances come with everything you need.

Functions available with Full Steam

Steaming

Steaming at 30°C–100°C for succulent dishes and preservation of colour, taste, vitamins and minerals.

Reheating

Reduce food waste by reheating at 80°C–180°C, resulting in greater moisture and regeneration.

Dough proving

Whilst proving at approximately 40°C, dough will rise considerably faster than at room temperature.

Defrost

Low temperature steaming at 30°C–60°C is ideal for defrosting delicate food such as cakes.

Sous-vide cooking

Vacuum-seal your food for slow cooking with steam, at a consistent low temperature ranging from 50°C–95°C to enjoy maximum flavour. Intensify the taste with added herbs and oils. Suitable for meat, fish and vegetables.

Add bursts of steam for food that's crispy on the outside and juicy on the inside.

Say goodbye to the stress of using too much or too little water at the wrong stage of the cooking process. Thanks to the Bosch Added Steam function, dishes such as breads and roasts turn out crispy on the outside and juicy on the inside; vegetables stay crisp, poultry and fish become juicy and tender.

Did you know?

For fast, efficient and even steam distribution throughout the cavity, the steam is released from the back panel right next to the ventilation fan.

The water tank can be accessed without opening the oven door - making it easy to refill and empty the water tank.

Added steam function

Enhance your cooking results by adding the perfect amount of moisture to your dishes, thanks to the added steam function. With the option of three intensity levels: low, medium or high. Create succulent roasts and perfectly browned bread crusts with ease. Steam is introduced into the cooking compartment at varying intervals and degrees of intensity depending on the dish.

Ovens with added steam

Cooking results improve when moisture is added to the process. The Series 8 oven range with added steam function does exactly that. Through the combination of circulated hot air cooking and added moisture, you can achieve perfect cooking results.

Ovens with hot air steam

For deliciously crispy crusts and fluffy breads, simply fill the water in the removable dishwasher-safe water bowl which sits in the bottom of the oven, then set the heating mode to 'HotAir Steam'.

PerfectRoast

Bosch Microwaves and Microwave Ovens. Full enjoyment in just a short time.

Combination Microwave Ovens

Heat, defrost or roast your dishes using the Bosch combi microwave, with a choice of five power levels up to 900 watts for maximum performance. Additionally, these microwaves allow for grilling with up to 2800 watts. The AutoPilot program helps achieve the best possible results with very little effort. Just insert your roast, select the AutoPilot program, enter the roast's weight, then press start and the oven does the rest.

Built-In Microwaves

The 38cm niche built-in microwave can be used for thawing, heating and perfect preparation of food. With the AutoPilot 8, every dish is a perfect success thanks to the 8 preset automatic programs.

Freestanding Microwave

For time saving preparation of food by thawing, heating and grilling. Every dish is a perfect success thanks to 8 preset automatic programs.

Gourmet results even when you're in a hurry.

The compact combination microwave oven enables you to achieve perfect baking and roasting results very quickly. Whether you want to bake, roast or simply heat up something tasty, the intelligent combination of convection heating and on-demand microwave gives you perfect results in less time.

Features and functions for everyday use.

Half Trays

The Series 6 and 4 slim-sized universal pans are ideal for preparing two versions of the same dish. They're also perfect for smaller quantities. For example, cook potato wedges on one slim tray and stuffed tomatoes on a second one. Because the trays are separated, the liquid from the tomatoes won't flow into the potatoes. When dishes need to be refrigerated before or after cooking, they also fit inside Bosch refrigerators – as well as our dishwashers for cleaning.

CoolTouch doors

Bosch ovens meet the highest safety standards: the best Bosch CoolTouch oven doors reach a maximum temperature of only 30°C*. This means that curious children are even better protected against burns. The extra measure of safety is made possible by 30% better ventilation.

Precise temperature control

Electronic thermostats monitor the oven cavity temperature to maintain temperature consistency during the cooking process.

SoftMove and SoftClose

SoftMove on Series 8 and SoftClose on Series 6 models is a special damping mechanism. Oven doors open and close more softly and more quietly than ever. This convenient feature not only offers a premium finish, it also protects the oven and door during the life of the oven.

Lighting

Depending on the model, Bosch ovens and compact appliances offer our classic halogen lighting, LED ceiling light or the multi-level LED lighting.

Energy-efficient LED lighting offers vibrant illumination and longevity. The multi-level LED lighting offers illumination on each level, which is exceptionally convenient when baking on multiple levels.

Integrated halogen lighting ensures the interior cavity is brightly lit. More efficient than standard lights, they are durable and designed to last longer.

Telescopic rail system

The Bosch telescopic rails are fully or partially extendable (depending on model) and are ideal for loading and removing trays with ease. Whether you choose a single or double rail option, all shelves are pyrolytic proof and compatible with microwave and steam cooking. Trays are also interchangeable between Series 8 full-sized ovens and compact appliances.

ClipRail telescopic rails

Standard shelf systems provide no more than three positions for telescopic rails. Bosch is now offering one telescopic rail system for all levels. These rails can be installed on any level – including the grill level for more convenient toasting. The level-independent rails are easy to install and uninstall, therefore they can be easily clicked on a different level.

*Measured at the centre of the window after 1 hour with a 180°C oven temperature / top and bottom heat.

Features explained

Perfect baking and roasting not only requires the right temperature, but also the appropriate heating function. From 4D HotAir to slow cooking, Bosch ovens offer heating functions that deliver everything from haute cuisine to everyday feasts.

4D HotAir*

Thanks to 4D HotAir, you can place your food on any shelf from level one to four, and the results will be consistently perfect. The rotating fan alternates its direction during cooking to distribute heat evenly on every level. For reliable results 'top to bottom', you can also bake and roast on up to four different levels simultaneously.^

3D HotAir

3D HotAir distributes the heat quickly and evenly throughout the entire oven cavity, allowing you to cook on up to three levels simultaneously. It's especially convenient when you need to cook both sweet and savoury dishes simultaneously without intermingling the flavours.

HotAir Eco/Gentle

HotAir Eco/Gentle uses less energy by using a single tray. This energy-efficient function distributes less heat into the oven and uses residual heat to maintain the set temperature.

Top and bottom heating*

Uses both the upper and lower heating elements. Heat travels to the centre of the oven which is the best position to obtain the selected temperature. Suitable for traditional baking and roasting and offers best results for cakes with moist toppings.

Top and bottom heat Eco

In addition to the top and bottom heat function, selected Series 8 ovens feature an eco-friendly mode, which supports cooking on a single shelf for energy-efficient cooking. Prepare perfect sponges, pound cakes, delicate pastries and bread rolls while saving valuable energy.

Bottom heating

For cooking in a bain-marie and for the final baking stage. The heat is emitted from the lower heating element.

Intensive heating

Combines the top element with a more powerful bottom heating element that is perfect for crispy bases and baking in tins.

Hot air grilling*

Achieve rotisserie-style cooking for meat and poultry. The grill and fan alternate which produces even and crisp cooking results.

Grill, small area or large area

For grilling flat items, such as steaks and sausages, for making toast and for cooking au gratin.

Pizza setting

Create crispy pizzas or give any dish that extra heat that's needed from underneath by using a combination of heating elements.

Keep warm*

A feature that keeps cooked food warm.

Slow cooking

For gentle and slow cooking of seared, tender pieces of meat in ovenware without a lid.

Preheat ovenware

A feature that is useful for preheating ovenware and even dinnerware.

Drying

A function for drying fruits, vegetables and herbs with maximum flavour. This function can also be used for drying out the oven cavity after the added steam function has been used.

Rapid heating

With rapid heating you can shorten the heat-up time for selected heating functions, including 4D HotAir and top and bottom heating.

Fan forced hot air

A fan disperses heat evenly for cakes and pastries baked on two levels.

Fan assisted top and bottom heating

Uses both upper and lower heating elements while a fan disperses heat evenly.

Defrost

Perfect for gentle defrosting of meat, poultry, bread and much more.

Reheating*

For plated meals and baked items. Cooked food is gently reheated. The steam ensures the food does not dry out.

Dough proving*

For yeast dough and sourdough, dough will rise considerably more quickly than at room temperature. The surface of the dough does not dry out.

Sous Vide

Cooks vacuum-sealed food at low temperatures and 100% steam, retaining nutrients and flavours.

Added Steam

Steam is introduced into the cooking compartment at varying intervals and degrees of intensity depending on the dish.

HotAir Steam

Use with steam bowl for delicious baking and roasting results.

At last, someone in the house who enjoys cleaning up.

Anyone who has ever cleaned an oven by hand knows how exhausting and time-consuming it can be. This chore is now a thing of the past, thanks to pyrolytic self-cleaning and EcoClean Direct.

Pyrolytic self-cleaning: the oven that cleans itself

During the pyrolytic cleaning function, the oven heats up to 480°C to burn off grease and food residue*. This achieves thorough cleaning results with minimal effort.

Simply follow these 3 steps:

1. Activate the pyrolytic cleaning function.
2. Choose from three different cleaning levels, depending on the degree of residue that has accumulated.
3. Once the program is finished, wipe off the thin layer of ash in the base of the oven.

Cleaning Assist (hydrolyse)

The cleaning assistance program is a quick alternative for occasionally cleaning the cooking compartment. The cleaning assistance softens dirt by vaporising the soapy water, making it easier to remove.

1. Mix 0.4 litres water with a drop of washing-up liquid and pour into the centre of the cooking compartment floor.
2. Select the bottom heat function at 80°C for 4 minutes.
3. Switch the appliance off and leave the cooking compartment to cool for approx. 20 minutes.
4. Once cool, remove the remaining water with an absorbent sponge cloth and clean the smooth surfaces in the cooking compartment with a dish cloth or a soft brush.
5. In order to dry the cooking compartment, leave the appliance door open at approx. 30° angle for one hour.

EcoClean Direct: makes cleaning easier

While your dishes bake or roast, the special direct coating of microfine ceramic particles on the oven cavity walls absorbs grease and residue and breaks them down through oxidation.

Simply follow the below steps and reduce your cleaning time significantly*:

1. Activate the EcoClean Direct cleaning program.
2. Once completed, clean remaining surfaces that don't have the special coating.
3. Wipe the base of the oven and inside of the glass door.

Universal pan and baking tray with ceramic non-stick coating

In addition to the classic universal pan, Bosch offers a universal pan and baking tray with a ceramic non-stick coating. This special non-stick coating makes the surface easy to clean. The ceramic coating has another advantage: you no longer need to use baking paper or to grease the tray, which makes baking, roasting and cleaning much easier.

*Please remove all accessories when activating the specific EcoClean Direct program.

#Metal racks may show slight discolouration after prolonged use of the pyrolytic function. To prevent this, you may choose to remove the wire racks during the pyrolytic cycle. Features may vary depending on models. Please check individual product specifications.

Plug&Play oven.

The built-in 10 amp oven is made for easy installation – simply plug into a power point and start cooking.

Large capacity ovens.
More room for your favourite dishes.

With up to 112 usable litres of oven capacity, you have even more space for roasting and baking your favourite dishes. The larger capacity, combined with Bosch HotAir even heat distribution, means you can cook simultaneously on all levels. The wider trays provide more surface area for roasting big batches of potatoes and vegetables. This makes our 90cm ovens perfect for entertaining your friends and family.

90cm ovens

XXL Cavity – 112 usable litres

The full-size 90cm oven offers 112 usable litres of cooking space and larger baking trays. The increased cavity creates uniform baking results on up to five levels due to the improved heat circulation between the racks.

XL Cavity – 85 usable litres

The compact 90cm oven models have an interior capacity of 85 usable litres. It also comes with the large baking trays which can be used on up to four levels.

Double ovens

Enjoy the convenience of cooking multiple dishes at the same time with our double ovens. Perfect for entertainers or large families.

Choosing a double oven can also be a great way to save energy; if you would like to cook a small meal, you have the flexibility of just using the smaller cavity oven.

Freestanding cookers from Bosch let you plan your kitchen the way you want.

With a Bosch freestanding cooker, you can be totally flexible in your kitchen layout and in the way you cook. Our models combine the latest ovens and cooktops in one appliance with perfect precision. Induction cooktops allow for faster and more flexible cooking, electric cooktops ensure maximum convenience and our gas cooktops let you cook like a professional.

Freestanding cookers with gas cooktops

Professionally fired up

High-power wok burner

The powerful wok burner provides up to 14 MJ/h. It is suitable for use with flat-based pans or with a wok using the wok ring provided.

Cast-iron supports

Cast-iron pan supports are both stylish and highly durable, providing solid and robust support for your cooking pans.

Freestanding cooker with induction cooktop

Flexible on the outside, intelligent on the inside

CombiZone

With CombiZone, you have the freedom to use your biggest pans and trays for more adventurous cooking. Switching from small to large pans is as simple as a single touch that merges two standard zones into one large cooking zone.

MoveMode

When your recipe requires you to switch from boil to simmer at just the right moment, MoveMode is perfect for you. Switch from level 9 to level 1 by simply sliding your pot. MoveMode lets you move seamlessly from your first high-powered cooking task to the next. You are always in control.

Practical drawer for more storage space for your kitchen utensils.

Our oven features

Fit every kitchen and every need

3D HotAir

3D HotAir distributes the heat quickly and evenly throughout the entire oven cavity, allowing you to cook on up to three levels simultaneously.

AutoPilot with up to 30 automatic programs

The AutoPilot program helps achieve the best possible results with very little effort. Just insert your dish, enter its weight and select the desired program from the menu.

Rotary spit

The rotary spit is ideal for grilling large roasts, such as rolled roasting joints or poultry. The meat becomes crispy, well-browned and cooked evenly. Uniform grilling from all sides – easily done in your kitchen.

CoolTouch door and child lock

For added safety, selected Bosch freestanding cookers are fitted with quadruple-glazed CoolTouch doors. The reflective inner glass is designed to keep heat in, while providing a safe-to-touch door on the outside. Child lock doors and displays make the cookers even safer.

Pyrolytic self-cleaning: the oven that cleans itself.

During the pyrolytic cleaning function, the oven heats up to 480°C to burn off grease and food residue. Once the program is finished, simply wipe off the thin layer of ash in the base of the oven.

Cooktops

Cooktops | Induction

The best cooking needs just one ingredient: Bosch.

Modern cooking offers so many wonderful new tastes and textures – you need a cooktop that's flexible enough to keep up.

Serie | **8**
PXE875DC1E

"Easy to clean and temperature control is almost instant."

Incentivised review.

**Average rating for PXE875DC1E is 4.6 stars.*

Bosch FlexInduction

The ultimate Bosch Induction experience. Unique technology provides even heating across the entire FlexZone. The FlexZone can be used as two separate zones or combined into a single 'super-zone' where the entire zone becomes your cooking canvas.

Bosch CombiInduction

Experience the magic of CombiZone – two cooking zones can be linked, making the switch from small to large pans effortless. Plus, the MoveMode function automatically switches from boil to simmer with a simple slide of the saucepan.

Bosch Induction

Bosch's benchmark Induction cooktops put you in control with 17 power levels plus PowerBoost for each zone, dual function timer with automatic switch-off, residual heat indicators, child lock and more.

Induction speeds up your cooking

Induction cooktops offer the most efficient way of cooking at lower temperatures, ie. melting chocolate, etc.

Old pots, new technology

Most of your home pots will also work with induction if they have a magnetic base. All pots and pans with ferromagnetic bases are suitable for induction. As a quick way to determine if your pots and pans are compatible (induction-ready), a fridge magnet should stick to the base. In general, special stainless steel, iron and enamel are all suitable.

The 2-in-1 cooktops with integrated ventilation

For some, it's a **cooktop** that ventilates perfectly.

For others, it's a **rangehood** that also cooks perfectly.

CombiZone

If you need more space for a long piece of cookware, such as a roaster or Teppan Yaki plate, Bosch has the answer. With CombiZone you can combine two individual cooking zones into one at the touch of a button.

DirectSelect 1.0 touch control

Easy to understand and even easier to use, the intuitive operation allows you to select cooking zones with ease and directly set the desired temperature for each zone. You can also adjust the ventilation level manually or set it to automatic.

MoveMode

When your recipe requires you to switch from boil to simmer at just the right moment, MoveMode is there when you need it. Switch from level 9 to level 1 by simply sliding your pot. MoveMode lets you move seamlessly from your first high-powered cooking task to the next in an instant.

The perfect kitchen should allow you to plan as you like, have unrestricted cooking space and easily entertain guests. For greater freedom and flexibility in your ideal kitchen, Bosch offers 2-in-1 cooktops with integrated ventilation, combining the latest technologies of our **induction cooktops** and **rangehoods** into a **single appliance**.

AutoOn

Air extraction automatically begins on a medium level once a cooking zone is turned on.

Superior technology

Strong speed air extraction is generated directly at the ventilation module and also above the cooktop. As a result, any steam generated will reduce the grease and odour particles on kitchen surfaces. The highest speed setting creates an approx. 65cm high suction bell, perfect when cooking with high pots.

The EcoSilence Drive motor

For quiet and efficient operation. With the brushless EcoSilence Drive, friction and wear do not occur as it is driven by a permanent magnet. This means your ventilation module has an extraordinarily long service life, extreme efficiency, and low noise. Optimised air flow inside the ventilation module reduces operating noise – even at full power.

Installation

Design your kitchen just how you like.

The new cooktops with integrated ventilation know no limits. Whether it's a functional, space-saving wall planning or an open-plan living concept with an island design, they fit in seamlessly.

All cooktops with integrated ventilation are available in both ducted and recirculation extraction configurations. This means that no matter how you'd like to plan your kitchen design, there is an installation solution to suit your needs.

Wall design

Just like a regular cooktop, they are installed in your benchtop in accordance with the usual specifications. Whether installed beneath a window or slanted ceiling, the 2-in-1 cooktops with integrated ventilation from Bosch, offer you brand new options when planning your kitchen. Thanks to the ventilation module's compact size, you can add drawers or a cabinet below for additional storage space.

Island bench design

Scan the QR code to watch the video of the various installation options*.

Experience a new level of freedom in your home when planning your kitchen and enjoy the convenience of preparing your favourite dishes while facing and chatting with your guests. Install your cooktop directly into the benchtop for a unique island design. Unducted recirculation configuration is recommended for this option.

PXV975DV1E

"Flex zones great for big pans and grills."

Incentivised review.

*Average rating for PXV975DV1E is 4.8 stars.

Ideal for pots, pans and casserole dishes of all shapes and sizes. Thanks to the unique coil shapes you get the ultimate flexibility and heat distribution. At the touch of a button, two induction zones become one large FlexInduction surface.

**MoveMode**

Pre-set 3 different power levels and move from boil to simmer in just seconds.

1. Perfect for rapid boiling (Power level 9 – Front FlexZone)
2. Medium heat cooking (Power level 5 – Middle FlexZone)
3. Ideal for simmering (Power level 1 – Back FlexZone)

**PerfectFry sensor – for a steak that is just right**

With up to 5 automatic settings, the pan is heated to just the right temperature. Sensors inside the cooktop continuously measure the temperature and maintain it for perfect results. Works with Bosch PerfectFry sensor pan, see page 109 for details.

Cooktops | CombiInduction

CombiInduction cooktops

Bosch CombiInduction lets you switch from small to large and oversized pans, like Teppan Yaki, simply and easily. So now there's no limit to the tastes you can create.

**CombiZone**

With Bosch CombiInduction, you have the freedom to use your biggest pans and baking trays for more adventurous cooking. Switching from small to large pans is as simple as a single touch that merges two standard cooking zones into one large cooking zone.

**MoveMode**

When your recipe requires you to switch from boil to simmer at just the right moment, MoveMode is there when you need it. Switch from level 9 to level 1 by simply sliding your pot. MoveMode lets you move seamlessly from your first high-powered cooking task to the next without a hiccup – you are always in control.

Safety & Cleaning

WipeProtection

Stay in complete cooking control even when you've had a spill or boil-over. Bosch WipeProtection locks the control panel for 20 seconds so you can clean the surface of the control panel easily, without losing your cooking settings.

2-stage residual heat indicators

Provides clear indication of when a zone is still hot after use. Two levels: 'H' means residual heat sufficient to finish off cooking or to keep items warm; 'h' – residual heat insufficient to cook, but zone is still hot enough to advocate caution.

Child lock

Maximum safety for tiny hands. Lock your cooktop's control panel and prevent accidental little chefs from 'helping out' and hurting themselves. Enjoy the reassurance of maximum safety for both you and your loved ones.

Automatic safety switch-off

Never worry again if you have forgotten to turn off the cooktop. If you've stopped using it, your Bosch Induction cooktop will automatically shut down.

Convenience

Dual function timer including automatic switch-off for each zone

Use the independent audible timer to set the length of cooking time or set the cooking zone at a specific temperature (eg. level 5.5) for up to 99 minutes – ideal for busy households. Once the selected time has been reached, the cooking zone is switched off automatically.

QuickStart

Start cooking more quickly. Bosch QuickStart functionality automatically detects the location of your pot and displays the cooking zone on the control panel. Just select the power level and you're away.

ReStart

Things happen quickly in the kitchen – spilling something on the control panel or accidentally switching off the cooktop, ReStart will store your last selected settings. Those settings can be instantly recalled by simply pressing the main power switch within 4 seconds.

Energy consumption display

Each time you finish cooking, your energy consumption display shows exactly how much power you've used. So if you wish, you can adapt your cooking style to save energy and money. (For example, placing a lid on a pot can help reduce your energy consumption.)

Automatic pot detection

Bosch Induction cooktops feature automatic pot detection which recognises the diameter of the cookware and determines the size of the cooking zone accordingly. If the pot is removed, the control panel indicator will flash and remain inactive until the pot is detected.

Keep warm

At the touch of a button, this is the ideal setting for keeping food warm before serving.

Performance

DirectSelect Premium

Taking easy-to-use, intuitive controls to the next level, DirectSelect Premium gives you complete cooking control with intermediate levels and unsurpassed accuracy.

DirectSelect 1.0

Enjoy total convenience with DirectSelect 1.0. Simply select the required power level from the power settings laid out on the cooktop, without the need to press +/- repeatedly.

TouchSelect

With this control panel, you can regulate the desired cooking zone easily. Select your cooking zone and use the +/- keys to choose the power level you need.

17 power levels

Enjoy total control on every recipe with 17 power levels. This function allows cooking zones to be set in increments of 0.5 (eg. 0.5, 1, 1.5, 2...9).

PowerBoost – now with even more power!

PowerBoost channels increased power to a selected zone to turbocharge the cooking process. With PowerBoost, you can boil 2 litres of water almost three times faster than on a conventional glass-ceramic cooktop.

ShortBoost

Reduce the time to heat up pans – this boost function heats up the pan for 30 seconds at high power before automatically reducing the heat to the correct power setting.

Cooktops | FlameSelect

We didn't discover fire, but we've taken it to a new level. Nine, to be precise.

The FlameSelect gas cooktops from Bosch are packed with innovative technology. They offer you a completely new level of precision when it comes to adjusting the flame by selecting pre-defined power levels. But that's not all. Thanks to our timeless design and carefully selected materials, Bosch gas cooktops are also a true feast for the eyes.

Stop cooking with intuition. Start cooking with perfection.

At Bosch, we want to make your cooking with gas as easy, safe and enjoyable as possible. That's why we developed FlameSelect for you. Unlike conventional gas cooktops with inaccurate power settings, FlameSelect and its patented valve technology offer you incremental heat regulation within nine precisely defined power levels. So now, gas cooktops with FlameSelect offer you all the benefits of gas cooking combined with the comfort and precision of an electric cooktop.

Nine levels of precise power selection

Easy to use. Easy to clean. Easy to love.

Our pan supports

When it comes to design you have the choice between single pan supports for easy handling and cleaning, or continuous pan supports for high stability of cookware. Both variants are available in cast iron and are extremely robust.

Our gas cooktop surfaces

Our cooktops are available in black tempered glass and stainless steel to perfectly match your kitchen and individual taste.

Cooktops | Gas features and functions

Features and functions for everyday use.

Efficiency

One-hand ignition

Push and turn the ergonomically designed control knobs and the gas ignites automatically. As well as offering the convenience of only using one hand, there is also no separate ignition button to clean.

Easy clean tempered glass

Premium models with a tempered glass base are easy to clean for total convenience with a frameless finish for a stylish and sleek look.

Cleaning rounded off to perfection

The rounded edges of our gas cooktops ensure effortless cleaning – dirt simply doesn't have anywhere to collect.

Simplicity

FlameSelect

FlameSelect and its patented valve technology offer you incremental heat regulation within nine precisely defined power levels, making your cooking with gas as easy, safe and enjoyable as possible.

Flame failure device

For added safety, all Bosch gas cooktops feature a flame failure device. This feature stops the supply of gas to the burners if the flame is extinguished.

Cast-iron supports

Cast-iron pan supports are both stylish and highly durable, providing solid and robust support for your cooking pans.

Performance

High-power wok-style burner

Selected gas cooktop models feature a powerful wok-style burner which provides up to 19.5 MJ/h. Suitable for use with flat-based pans or with a wok using the wok ring provided.

Flexible burners

All our gas cooktops feature different burner combinations for greater flexibility. With wok, high-speed, standard and economy burners, you can cook more efficiently with the burner most suited to the size of your pan.

Features may vary depending on models.
Please check individual product specifications.

Convenience

Dual circuit cooking zone

Available on selected ceramic cooktops, this energy-saving feature allows you to select a smaller cooking zone for small pans, and a larger zone for larger pans.

ReStart

Things happen quickly in the kitchen – if you spill something on the control panel or accidentally switch off the cooktop, ReStart will store your last selected settings. Those settings can be instantly recalled by simply pressing the main power switch within 4 seconds.

Extendable zone

Selected cooking zones can be extended giving you a much larger area to accommodate big saucepans, casseroles and other large cooking dishes.

Automatic electronic boil start

The automatic electronic boil start heats the hotplate using the highest heat setting and then reverts down to the simmer setting you have previously selected, reducing the risk of boil overs.

Keep warm

At the touch of a button, this is the ideal setting for keeping food warm before serving.

Performance

Taking easy to use, intuitive controls to the next level, DirectSelect Premium gives you complete cooking control with intermediate levels and unsurpassed accuracy.

TouchSelect

With this control panel, you can regulate the desired cooking zone easily. Select your cooking zone and use the +/- keys to choose the power level you need.

QuickTherm technology

For improved control and flexibility, heat is delivered to the cooking zone in approximately three seconds. This feature is quicker than standard ceramic zones or electric-sealed plates.

17 power levels

Enjoy total control on every recipe with 17 power levels. This function allows cooking zones to be set in increments of 0.5 (eg. 0.5, 1, 1.5, 2...9).

PowerBoost

PowerBoost now on selected Bosch ceramic cooktops lets you heat up large volumes of water even faster than on the highest power level.

Ceramic cooktops

With electronic touch-controls and extendable cooking zones, Bosch ceramic cooktops combine great looks with smart function and design. The smooth ceramic glass cooktop surface is tough and durable as well as practical and easy-to-clean.

Rangehoods

Rangehoods

A breath of fresh air in hood design.

The right rangehood can reduce odours and steam and leave your kitchen feeling fresh and clean. And a Bosch hood will do it all with silent efficiency.

Ducted extraction

Ducting out is the most effective method of extraction. Ideally, the rangehood should be sited on an outside wall, or an outside wall can be reached via ducting. All Bosch extractors are now standardised to facilitate a 150mm diameter outlet for maximum performance, although smaller ducting can be used if required. Please refer to the installation guide for further advice on best practice installation.

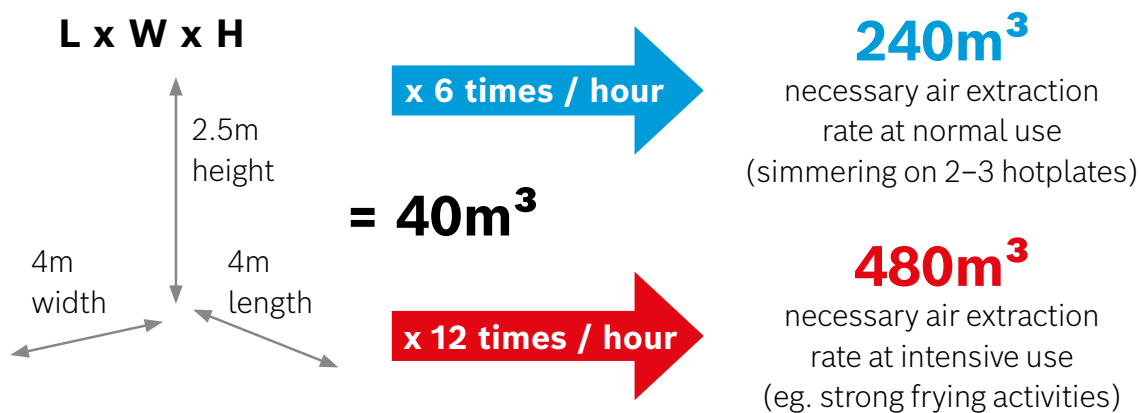

Recirculation kit

Odours are extracted and filtered, then purified air is returned to the room. The kit comprises a carbon filter and all components needed to ensure that odour free air is returned into the kitchen. To maintain performance, the carbon filter should be replaced on a regular basis. A recirculation kit needs to be purchased as a separate accessory.

What extraction rate do I need?

It is recommended that air be extracted (or exchanged) in a room depending on your type of cooking: a minimum of 6 times per hour; and a maximum of 12 times per hour.

Air extraction is measured using room volume. This is calculated by multiplying Length x Width x Height.

Bosch extraction rates are tested in line with EU standards. See pages 106–107 for more information.

Rangehoods

Relax in a quieter kitchen with family and friends.

A few decibels can make the difference between harmful, loud and pleasant. Operating at 40dB(A)*, our quietest rangehood means you can have it on while listening to music, enjoying a conversation or while your baby rests.

Silence

Noise is measured in numeric decibels or dB(A). It is important to note that a few decibels can make a huge difference.

EcoSilence Drive brushless motor

The EcoSilence Drive brushless motor operates without carbon brushes, eliminating the disadvantages of conventional motors. Instead of energy loss, wear and noise, you get efficiency, durability, and smooth operation. The result: low noise levels with high power.

*Average rating for DWB97LM50A is 4.5 stars.

Features and functions for everyday use.

Performance

Automatic power revert

When the intensive setting is selected, it can be set to automatically revert to a pre-defined setting after a short period of time.

LED lighting

The LED lights offer a longer lifetime and use less energy than conventional halogen lighting. Additional convenience is offered with SoftLight which gently fades lighting in and out with dimmer function.

Variable power settings

All Bosch rangehoods feature variable power settings which can be set to effectively remove odours, smoke and moisture caused by cooking. Many models also feature an intensive extraction setting which gives an extra boost to the performance when required.

PerfectAir sensor

PerfectAir continuously monitors the air and automatically adapts the extraction rate to the amount of odour present. At the same time, it reduces the noise level because it only activates the lowest extraction rate necessary.

Convenience

Cook to Hood

Control your rangehood via your cooktop with cooktop-based hood control. If preferred, the rangehood can be controlled manually.

Electronic filter saturation indicator

For maximum extraction efficiency, an illuminated light indicates when the filter needs cleaning. For hassle-free cleaning, the one-piece filter can be loaded into your Bosch dishwasher.

Electronic control

3 power levels + 2 additional intensive settings, automatic run-on, filter saturation indicator, automatic power revert and SoftLight with dimmer function; control at your fingertips.

Electronic button control

This control provides you with 3 power levels + 1 intensive setting. There's also a push-button for turning the lights on and off. And to make operation even easier, the buttons are back-lit.

Rocker switch control

It doesn't get any easier: one switch with 3 power levels and one for turning the lights on and off.

Cleaning

Dishwasher-safe metal grease filters

For easy cleaning, all Bosch metal grease filters can be safely loaded into any Bosch dishwasher for sparkling clean results. Metal grease filters are required for ducted and recirculating systems to filter grease and other solid particles out of the extracted air. To make sure these filters operate at maximum efficiency, they should be cleaned about twice a month.

Stainless steel filter

The stainless steel filter provides an exceptionally high level of grease absorption. It is concealed behind an elegant stainless steel cover with a stainless steel handle.

Rim ventilation filter

With its smooth uninterrupted surface and grease separation of 80–92%,* the rim ventilation filter from Bosch has a multi-patented filter sealing system and flow-optimised filter system.

Extraction rates

Air extraction is measured using room volume. This is calculated by multiplying Length x Width x Height. Bosch rangehoods offer powerful maximum extraction rates for when you are cooking up a storm in the kitchen, while the variable power settings allow you to navigate just the extraction power you need for each meal.

No space for a rangehood? See our 2-in-1 cooktops with integrated ventilation on pages 52–55.

Integrated GlassVisor Rangehoods

With our new integrated design hood you can finally gain more room beside and on the hood – and not just for spices. The hood with the T-shaped body itself serves as storage space and can hold up to 10kg on each side. Thanks to its optimised design, additional shelving can be installed in the upper cabinet to the left and right of the chimney, providing you with even more storage space – for example, for cookbooks and cooking utensils.

Where premium design meets ultimate performance and space efficiency.

The black rangehood has an elegant appearance thanks to the flush installation, making it almost invisible in an upper cabinet when folded away. When in use, the dark finish combines different materials and colours for a sleek and modern kitchen design.

Retractable slideout rangehoods

To operate, the slideout section is pulled out, enlarging the extraction surface. The pelmet front can be matched to your kitchen units,* making this rangehood almost invisible in your kitchen.

Rangehood extraction options

There are two ways to clean the air in your kitchen: ducting or recirculation. Both methods remove odours effectively. Choose the best extraction option for your kitchen:

Ducted extraction

- ✓ Ducting is the most effective way to clear the air in your kitchen.
- ✓ A ducted rangehood directs air from the kitchen to the outside through a metal duct.
- ✓ The rangehood needs to be situated on or close to an outside wall, so the outside can be reached via ducting.

Recirculation kit

- ✓ Odours are extracted and filtered through a carbon filter, then purified air is returned to the room.
- ✓ Can be installed anywhere – without the need to install a duct pipe through the wall or ceiling.
- ✓ To maintain performance, the carbon filter needs to be replaced on a regular basis.

DID YOU KNOW?

There are different types of air extraction measurements.

At Bosch, we adopt a stringent method in accordance with the European measurement standard EN 61591.

Bosch Air Extraction Measurement

Measurement of net fan power at air outlet above motor in appliance **with connection to ducting system**

Other Hood Performance Measurements

Measurement of net fan power at air outlet above motor in appliance **without connection to ducting system**

Calculate the extraction power you need

When choosing a rangehood, always match its air extraction power to the size of your kitchen. An effective rangehood should be able to replace the air in your kitchen up to 12 times per hour.

Height: 2.5m

Length: 4m

Width: 4m

Extraction rate needed for your hood

Kitchen size	Volume of kitchen (L x W x H) (m³)	x 12 =	Max. Extraction rate needed
Small	3 x 4 x 2.5m	x 12 =	360m³/h
Medium	4 x 4 x 2.5m	x 12 =	480m³/h
Large	4 x 5 x 2.5m	x 12 =	600m³/h
Open plan*	4 x 8 x 2.5m	x 12 =	720m³/h

Calculate yourself

x 12 =

* For open plan kitchens 50% of the adjacent room to the kitchen is added to the extraction rate calculations.
Above example:
Open plan room size: 4m x 8m x 2.5m
Actual kitchen size: 4m x 4m x 2.5m
Extraction rate calculations: 4m x 6m x 2.5m
