High pressure sensor, low pressure sensor, over-voltage protection,

compressor over-current protection, current transformer, fan motor voltage

operational parameters

Compatibility

Only compatible with Samsung DVM S indoor units (AM****N***H***) and MCM-D211UN Universal Communication Kit.

Construction

The unit shall be galvanized steel with a baked on powder coated finish

Refrigerant pipe connections inside unit chassis with penetrations available on front, back, right, and bottom sides for versatile installation

Heat Exchanger

The heat exchanger shall be mechanically bonded fin to copper tube.

Salt spray test method: ASTM-B117-18 - the heat exchanger showed no unusual rust or corrosion development to 2,280 hours.

Controls

The unit shall be operated via NASA Protocol with controls provided by Samsung

Control wiring shall be 16 AWG X 2 shielded wire.

Refrigerant System

The compressors shall be Samsung hermetically sealed, inverter driven, twin BLDC Rotary type.

Refrigerant flow shall be controlled by EEV (electronic expansion valve) throughout the system.

A flat plate subcooler device will improve capacity at extreme system refrigerant pipe lengths and reduce refrigerant noise.

Other Features

Optional night quiet modes to reduce outdoor unit sound

Optional snow blowing logic to prevent snow drifting on idle outdoor units

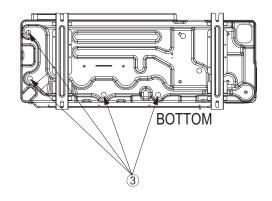

Protection

Devices

²Other pipe restrictions and requirements exist. Please consult installation manuals or technical data book for full details.

³ Vertical separation: 131' when outdoor unit is lower than the indoor units, 164' when the outdoor unit is higher than the indoor units.

 $^{^4}$ When cooling in outside temperatures between 0°F ~ 23°F, wind baffles are required. When outside temperature is between 0°F ~ 23°F, 50% operating capacity should be maintained to ensure reliability while in cooling mode.

FRONT

- (3) Condensate drain holes
- 2 Liquid refrigerant pipe opening

(1) Gas refrigerant pipe opening

4 Communication conduit opening (2 X Ø1 3/8")
