Subject: Product label placement for BKR9000 FCC ID# K95BKR9000-2

To Whom It May Concern:

In accordance with section 3 of the KDB Publication 784748 D01 BK Technologies acknowledges that the *Physical FCC ID labels must be located on the surface of the product, or within a user-accessible non-detachable compartment (such as the battery compartment). The label shall be permanently affixed, permitting the device to be positively identified. The font needs to be readily legible, consistent with dimensions of the equipment and its label area.*

With the size and placement opportunities on the external surfaces of the BKR9000, there is no room for the proper FCC ID label and as such we will be placing it in the battery compartment area as indicated in our label exhibit.

Please contact me if there is any information you may need.

Sincerely,

MAY 24, 2023

Lorenzo Cruger Jr.
VP of Engineering
BK Technologies
