## MEGATOUCH MAXX ELITE™ QUICK SETUP

### UNPACKING & SETTING UP YOUR MEGATOUCH MAXX ELITE™ VIDEO GAME

1. Upon opening the carton and removing the packing materials, lift the game out of the box and remove it from the plastic bag. Place the game on a sturdy, level surface.
2. Locate and remove the vinyl pouch containing the manual, warranty card and keys (located on top of, or on the back of, the cabinet). Put the manual, warranty card and keys aside for future use. Clean any adhesive residue that may be left on the cabinet after removing the vinyl pouch.
3. Plug the power cord into a grounded AC outlet.

**NOTE: INSIDE THE POUCH ARE TWO SETS OF KEYS: ONE SET UNLOCKS THE REAR DOOR AND THE OTHER SET UNLOCKS THE COIN DRAWER.**

4. Locate the power switch on the back of the game and push the rocker switch to the "ON" position.
5. Turn on the game and wait for the game to go through its boot-up sequence. At the completion of the boot-up sequence, the game will display the main menu screen.

### ADJUSTING THE VOLUME AND MONITOR CONTROLS

**NOTE: THE VOLUME AND MONITOR CONTROLS ARE PRESET AT THE FACTORY AND, THEREFORE, MAY NOT NEED TO BE ADJUSTED.**

1. The volume control is accessed through the software; to access the volume control, press the SETUP button located on the connector board in the CPU section of the game, then touch the SYSTEM SETTINGS icon at the Setup Screen, then touch the VOLUME CONTROL icon.
2. Adjust the Monitor Controls, mounted to the back of the LCD screen in the CPU section of the game, as necessary to achieve the desired picture.

### Site Preparation

- Plug the game into a grounded electrical outlet.
- Plug the game into a separate circuit, if at all possible. If a separate circuit is not available, care should be taken to provide a clean and constant voltage.
- Place the game on a flat, level and stable surface.
- Place the game in a location that does not interfere with its proper ventilation.
- Make sure that all fans are operating correctly and that airflow is unobstructed. If any fans are not operating, it is important that they be replaced.
- Make sure nothing is placed on top of the cabinet or next to the fan vents that would inhibit the flow of air.

## Game Description

The base countertop model has 2 key-locked compartments: the rear door section and the coin drawer section. Each individual sidecar has its own key-locked compartment. Additional sidecars with bill acceptors are also available. This model also has couplers installed in the rear of the game. These are used for future hardware upgrades which include linking and modem capabilities.

### CPU Section

The CPU section is accessible from the rear of the unit in the countertop. The CPU section houses the monitor controls, the CPU and I/O board, the power supply, the main harness, coin meter and the connector board. The security key is located on the I/O board.

### Coin Drawer Section

The coin drawer section is accessible from the rear of the unit. This section is key-locked for security purposes. A sturdy metal box located within this section holds all coins deposited into the machine.

### Sidecar Installation

You can install a number of sidecar options onto your Megatouch MAXX Elite™ video game. To install a sidecar, you will need to remove an endcap, attach the desired sidecar and then reattach the endcap.

### Removing an Endcap

To remove an endcap from the game:

1. Unlock and open the rear door of the game (or the rear door of sidecar, if already attached) to gain access to the endcap latches.
2. Press firmly against the endcap, pull the bottom endcap latch out of its notch and push upward into the upper notch to unlock (see Figure 10 on page 14).
3. Repeat the above procedure for the top latch of the endcap (see Figure 10 on page 14).
4. Remove the endcap from the game.

### Attaching a Sidecar

After you have removed the endcap, you can now attach a sidecar.

To attach a sidecar:

1. Attach the sidecar spacer to the side of the game by lining up the holes on the spacer with the studs on the game chassis (see Figure 9 on page 14).
2. Next, attach the sidecar to the side of the game by lining up the holes on the sidecar with the studs on the game chassis (see Figure 9 on page 14).

**NOTE: BOTH THE SIDECAR SPACER AND THE SIDECAR ITSELF SHOULD BE FLUSH AGAINST THE FRONT OF THE GAME.**

3. Using Figure 11 as a reference, connect the sidecar connector harness to the connector board in the CPU section of the game.

### Replacing an Endcap

Once you have installed the sidecar, you will need to reattach the endcap to the game.

To replace the endcap:

1. Unlock and open the rear door of game (or the rear door of sidecar, if already attached).
2. Line up the studs on the endcap with the holes on the sidecar (See Figure 9 on page 14).

**NOTE: MAKE SURE THAT THE ENDCAP IS FLUSH AGAINST THE FRONT OF THE GAME BEFORE LOCKING INTO PLACE.**

3. Press firmly against the endcap, pull the bottom endcap latch out of the top notch and push downward into the lower notch to lock the sidecar into place (see Figure 10 on page 14).
4. Repeat the above procedure for the top latch of the endcap.
5. Close and lock the rear door of the game or sidecar.

## General Care and Maintenance

**NOTE: THIS GAME SHOULD ONLY BE SERVICED BY QUALIFIED SERVICE PERSONNEL.**

**CAUTION: THERE ARE HIGH VOLTAGE PARTS IN THIS GAME. BE CAREFUL WHEN SERVICING THE INSIDE OF THE GAME. GAME SHOULD ALWAYS BE UNPLUGGED BEFORE SERVICING.**

### Screen Calibration

The machine must be in the idle mode or game select mode to calibrate the touchscreen.

- Locate the black calibrate button on the connector board and press it to enter the screen calibration mode.
- Touch the center of the first circle that appears on the screen. Once you release your finger, a second circle will appear on the screen.

**NOTE: YOU MUST HOLD YOUR FINGER ON THE CIRCLE FOR APPROXIMATELY 2 SECONDS FOR THE CALIBRATION TO BE RECOGNIZED.**

- Touch the center of the second circle that appears on the screen.
- Once the second circle is touched and released, a crosshair will appear on the screen. To test the calibration of the screen, touch the crosshair with your finger and slowly drag your finger around the screen. The crosshair should follow your movement.
- Touch the "EXIT" icon.

### General Circuit Board Handling Information

Before handling any boards, observe the following procedures:

- Prevent Electro-Static Discharge by:
  1. Storing the boards in the anti-static bags in which they are shipped.

2. Removing any static charge from your body before handling the boards.
3. Using a ground strap when handling the boards.

- When plugging in connectors to the board, make sure the connector is inserted straight onto the header and that the connector covers all header pins.
- Do not connect any peripheral device to the board, if the power is still connected to the peripheral or if power is already applied to the board.

**CAUTION:** Be extremely careful when replacing the lithium battery on the motherboard. There is a danger of explosion if the battery on the motherboard is incorrectly replaced. Only replace the battery with the same type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions.

### Cleaning the Cabinet

- The cabinet should be cleaned with a damp cloth and mild detergent.

### Cleaning the Touchscreen Monitor

- The touchscreen glass should be cleaned with a damp cloth and isopropyl alcohol or a non-ammonia cleanser.

**NOTE: DO NOT USE ANY ABRASIVE OR VINEGAR-BASED CLEANSERS, AS THEY WILL DAMAGE THE TOUCHSCREEN.**

### Cleaning the Fans and Vents

- The fans and vents should be cleaned of any dust and grime on a regular basis to ensure proper ventilation of the game.

**NOTE: DO NOT USE ANY ABRASIVE SOLVENTS, ACID OR VINEGAR-BASED CLEANSERS WHEN CLEANING YOUR GAME. OVER TIME, SUCH CLEANSERS COULD HARM THE TOUCHSCREEN AND ERASE THE DECALS. BE CAREFUL NOT TO USE COMMERCIAL CLEANERS CONTAINING ANY OF THESE SUBSTANCES.**

\*NOTE: The soft DIP switch settings displayed on your game will depend on which games are selected as active in the Game Menu screen, as well as the program version used in your game. DIP controls for inactive games and games not included in your program will not be displayed.

1 Touching "TIMER" for the "ALLOW SEX?" setting allows the operator to set times during which adult-oriented categories and games are available to the players. Using the arrows, set the time at which the adult-oriented games and categories will be turned on and set the time at which they'll be turned off. The time is set using 24 hour, "military" time. The factory default settings are set to turn on at 22:00 (10:00 PM) and to turn off at 6:00 (6:00 AM).

2 When "ALLOW NUDITY" is set to "YES," a small box will appear to the right. Select from "R" or "X" rated nudity ("X-rated" = full frontal nudity).

3 These settings are only available if "ALLOW SEX?" is set to "TIMER" or "YES."

4 *"SET" is only shown if "Player Selectable Language" is set to "YES." When enabled, the operator can select which of the available languages will be displayed for the user to select. To enable the languages: at the Language Select screen, touch the desired language on the left, then select an open field on the right.*

5 When "AUTO CLEAR HIGH SCORES" is set to "YES," a small box will appear to the right. Touching this box allows the time period to be set from 1 to 4 weeks (from the time the player name is entered). The factory default setting is two (2) weeks.

6 These settings are only available if "6 STARS ENABLED?" is set to "YES." For more information on 6 stars, see System Settings.

7 This setting is only available if "SHOW DECK CARDS" is set to "YES."

8 Setting this to "YES" enables a bonus replay for all games, except Trivia Whiz, Pile On, Strip Poker, Double Solitaire and Mystery Phraze. The following table shows the scores needed to achieve a bonus replay (after a replay has been earned, the next player must beat the last replay score to earn another replay).

9 Easy Mode reduces the number of points needed to reach the bonus round for Hoop Jones (125/150 points), Eleven-Up (68,000/80,000 points), Tri-Towers (64,000/80,000 points), Royal Flash (180,000/200,000 points) and Quik Match (250,000/280,000 points).

10 Setting this to "YES" enables the Theft Deterrent. If you choose to enable this option, the game will automatically shut down at specified intervals and you will need to reactivate the game by entering a personal identification number. If you select "YES", the game will prompt you for a four to eight digit pin number. It will then prompt you to choose the intervals that you want the game to activate the Theft Deterrent mode. Select 1 week, 2 week, 3 week, or 4 week intervals. In order to avoid the system shutdown, you must turn off the Theft Deterrent and turn it back on again before the end of the time interval that you have selected.

11 Touchscreen mode offers 2 options for touchscreen settings. Mode 1 is standard (default). It is the recommended setting for most locations. This setting allows for normal play. Mode 2 is an added feature used for faster play and reaction time of the touchscreen. This mode is enhanced for intensive play. When set to mode 2, certain environmental conditions may cause slight touchscreen drift. If this occurs, return to Mode 1.

### Game Name and Score Needed for Initial Replay

To set the sequence in which the stars must be touched, go to the "System Settings" screen, touch the "Set Six Star PIN" icon and set the sequence.

**To Enter This Screen, Touch  
"Game Menu" At The Setup  
Screen**

Figure 3 - Game Menu Screen

The game list and prices are programmed using this screen. The left side of the screen shows the various game menu names. The fields to the right show the game positions available, with the price for each game. The list at the bottom shows all games available for that category. The lower buttons will reset the selected game menu to the default setting (DEFAULT), clear all of the games from the player's game menu (CLEAR), clear the selected item from the player's game menu (CLEAR 1), and reset all of the game menus to the default settings (DEFAULT ALL).

To program the player's game lists, first select the category in which you want the game to appear, by touching that category's name on the left side of the screen. Choose the menu position you want the game to occupy, by touching that position. Then, touch the desired game name, from the game list on the bottom of the screen. That game will now appear in the menu (a game cannot appear in a game list more than once). Games currently in the displayed category will appear shaded in the game list on the right. To adjust the price, touch the price in the game menu. Each touch will rotate the price from 25¢ (1CR), to 50¢ (2CR), to 75¢ (3CR), to \$1 (4CR) and back to 25¢ (1CR). Touch "EXIT" when done.

**NOTE: TOP GAMES** ALLOWS THE OPERATOR TO ENTER UP TO 6 GAMES IN THAT CATEGORY. SET THE TOP GAME THRESHOLD TO TELL THE GAME HOW MANY PLAYS QUALIFIES A GAME FOR THE TOP GAMES LIST. ONCE A GAME REACHES THAT NUMBER OF PLAYS, IT WILL AUTOMATICALLY BE ADDED TO THE TOP GAMES CATEGORY. THE DEFAULT THRESHOLD IS "10."

**\*Games currently in the displayed category will appear shaded in the game list on the right.**

## To Enter The Coin/Credit Setup Screen, Touch “Coin-In Menu” At The Setup Screen

Game cost can be controlled two ways: by changing the number of credits required to play a game or by changing the cost of a credit. The Coin-In Menu allows you to adjust the cost of a credit, as well as providing a way to give players “bonus” credits for depositing a higher amount of money.

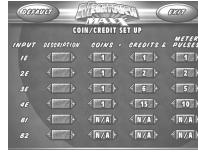

When programming the Coin-In Menu, E1 is set for the lowest value coin, E2 for the next highest value, etc. If all four coin inputs are not used, the unused inputs must be set “N/A.” Adjust the coin/credit/meter pulse settings by touching the “plus” and “minus” signs on the field you want to change.

COIN VALUE	INPUT	COINS	=	CREDITS	&	METER PULSES
10p	1E	3	=	1		3
20p	2E	3	=	2		6
50p	3E	1	=	2	player premium 25p/credit	5
1£	4E	1	=	5	player premium 20p/credit	10

In the above example (UK currency), each game costs one (1) credit and the cost for a single credit is 30p. This method is preferred if you want game cost to always be reflected as “1 credit.”

COIN VALUE	INPUT	COINS	=	CREDITS	&	METER PULSES
10p	1E	1	=	1		1
20p	2E	1	=	2		2
50p	3E	1	=	6	1 bonus credit	5
1£	4E	1	=	15	5 bonus credits	10

In the above example (UK currency), the cost of a credit is set to 10p and each game costs 3 credits (for a total of 30p). This method allows game cost to be increased by the smallest unit of currency used (e.g. increasing the cost of Solitaire to four (4) credits would increase the game cost by 10p).

In both examples, note that meter pulses are independent of credits and only track the unit of currency (10p in the examples). Players are given an incentive to deposit more money by giving them “bonus” credits for depositing 50p or £1. Coins may be deposited in any combination of values and the game will automatically register the highest number of credits for the total amount of coins deposited. Once a game is played, any remaining fractional credits are erased.

Generally, most countries have a factory default setting. This setting can be adjusted (as described above), but will return if the game memory is cleared. Some programs, depending on the key used, have a CURRENCY DEFAULT DISPLAY located to the left of the coin inputs. It shows the currency value for each of the coin inputs. This display is used as a guide and is not used in any calculations. Touch the CURRENCY DEFAULT DISPLAY to hide/show the display.

Touching a game name will display the current and lifetime credit totals, broken into 1 Player, 2 Player and Linked Games. It also shows the “shortest,” “longest” and “average” playing times for that game (only “link-only” games, like Pile-On, are included in time calculations; time calculations for games that can be played as link or amusement are only displayed for the amusement version).

## Megatouch MAXX™ Video Billboard Operating Instructions

The Megatouch MAXX™ Video Billboard allows for six, separate advertising screens. Two of the screens can only be accessed using "Six Stars" (and are intended for use by the location owner), the other four screens are accessed using the Video Billboard icon located on the System Settings screen.

The Video Billboard provides several font styles, sizes and colors, a choice of background colors and designs, as well as a variety of clip art. The basic Video Billboard screen is shown below, followed by the operating instructions. A maximum of 16 screen objects (a line of text or a piece of clip art) can be placed on any given screen.

The Video Billboard also allows you to add 3 advertising screens that you create on your personal computer. These screens are in addition to the 6 screens that can be created directly on the game. To create these new screens, you will need a personal computer with a PC card reader/writer, a graphics program to create graphics and two 8 MB PC cards. Complete instructions can be found on the Merit Industries website ([www.meritind.com](http://www.meritind.com)).

### To Enter This Screen, Enter The System Settings Screen and Touch Video Billboard

## Video Billboard Icon Functions:

Callout #	Screen Icon	Description
1	Timer	Allows the user to set the amount of time the given screen is displayed during the idle mode. The timer can be set from 0 to 20 seconds, in 5 second increments. (Setting the timer to zero (0) will prevent the screen from being displayed. This is helpful when designing a screen that you do not want to display immediately, but do want to store in the game's memory for use at a later date.)
2	Full Screen	Allows the user to view a full screen preview of the designed screen. While in "full screen", graphics and text can be repositioned by selecting them and then touching the new location.
3	Clear Ad	Allows the user to erase the entire design for the displayed screen. This icon changes to "DELETE" if any screen object is selected (when an object is selected, a box appears around the object).
4	Screen X	Touching this icon toggles through each of the video billboard screens (where "X" is the number of the screen).
5	Fonts	Touching this icon displays the font formatting icons on the bottom half of the screen. These icons allow the user to select from 4 styles of font, 3 font sizes and 8 colors. The screen also has controls for alignment: right, left and centered. To format the font, select the desired text and then touch the font style, size, color and/or alignment (if you have more than one line of text on the screen, you will need to repeat this action for each line of text). Touching the KEYBOARD icon will return you to the keyboard screen.
6	Background	This icon toggles the background design through each of the 20 preset backgrounds.
7	Clip Art	This icon displays the clip art selection windows on the bottom half of the screen. From here, the user can select clip art to be used on the displayed screen. Use the scroll bar at the bottom of the screen to move through the clip art. The clip art size can be adjusted by selecting the piece of clip art and then selecting "SMALL", "MEDIUM", or "LARGE" at the bottom of the screen. (If you have more than one piece of clip art on the screen, you will need to repeat this action for each piece of clip art.) Once the clip art is displayed on the screen, touching the desired clip art and sliding your finger to the location where you want it placed can move it. Touching the KEYBOARD icon will return you to the keyboard screen.
8	Exit	Exits the user to the System Settings screen.
9	Keyboard	The keyboard is used for entering all text onto the displayed screen. Once text is displayed on the screen, touching the text and sliding your finger to the location where you want the text can move it. The cursor can be moved to a new location by touching the desired location.

Merit assumes no responsibility for damages once the product has left its facilities and any disputes regarding transportation damage must be resolved with the shipping company(s).

Merit will repair or replace, at its option, any component, part or assembly that fails under warranty, provided that the failed item is returned, shipping charges prepaid, to Merit's repair facility and Merit is notified of the failure within the warranty period. Merit reserves the right to request the serial numbers of the item and/or game which has failed, and copies of sales invoices, bills of lading or other documents as required to determine the validity of the warranty coverage.
