ProximVision® Advanced

Advanced Cloud Enabled Carrier Management System + WLAN Controller

Control, Provision and Manage

Comprised of a wide variety of powerful tools, ProximVision® Advanced unifies management of the entire Proxim infrastructure. From monitoring network performance to remote device configuration and management. All the tools needed for effective network management.

CLOUD ENABLED

ProximVision® Advanced is ideally suited to operate in the cloud on AWS. This has the advantage of providing a high availability, while also reducing operational cost.

Be the first to know

- Identify faults and troubleshoot remotely
- Set push-notifications on events that require immediate notification
- Quickly identify and isolate faults via the alert filtering tool
- Add threshold alarms with advanced threshold crossing rules
- Access and manage your network from any location via web based access

Increase Productivity

ProximVision® Advanced streamlines, automates, and monitors networks tasks, off loading the day to day tasks allowing network managers to focus on higher level activities such as network expansion.

- Instantly deploy devices with configuration templates
- Perform network-wide software updates in a single keystroke
- Pre-schedule or automate day to day maintenance tasks
- Build custom reports and set email subscriptions of vital network statistics

Try for Free

ProximVision® Advanced starter kit will support 100 nodes during the first month and then switch to 4 nodes without time restriction.

About Proxim Wireless

Proxim Wireless is a global leader in advanced wireless broadband and WiFi solutions that deliver high performance and high availability communications.

Celebrating 40 years of pioneering wireless solutions, Proxim is recognized for unparalleled reliability, superior performance, and drive for innovation.

Specifications

CLIENT SERVER ARCHITECTURE	
	Server application running within the IT department Web and Java based client for remote access available in English, French, Spanish and Chinese
ADMINISTRATION	
	Customized User Access levels (unique profile per user) with Advanced password management Remote User Authentication based on TACACS+ or LDAP services Connected user information and operation audit trail with Syslog forwarding Up to 50 concurrent sessions with auto log off
DATABASE MANAGEMENT	
	Backup, restore, Compaction, Device Suppression
REDUNDANCY (Windows Server)	
	Active and Standby server with shared floating IP address Database mirroring between Active and standby server
NORTHBOUND INTERFACE	
	Alarm forwarding group via SNMP v2c/v3 REST API
CUSTOM LAYOUT	
	Adapt PV Advanced display to supervisor needs Managed two customized layout with easy toggle
BASIC CONTROLLER	
	Auto Discovery, Configuration and Firmware Update of devices with controller mode enabled MAC address based device control with IP address assignment Collect, store and display clients information RF Channel View
ADVANCED CONTROLLER (ORINOCO)	
	Access Point RF management: Auto Channeling (including Auto Power), Rogue AP report. Network Status (Availability, Airtime Load, CRC Errors, Cumulated Traffic) Network Statistics (top/bottom 10 APs for various criteria) Client Management: Load Balancing and Band steering Client Positioning and Tracking
ADVANCED CONTROLLER (TSUNAMI AND EDGE)	
	Base Station RF management: Auto Channeling Network Status (Availability, Airtime Load, CRC Errors, Cumulated Traffic) Network and QoS Statistics (top/bottom 10 devices for various criteria)
TOPOLOGY MANAGEMENT	
	Tree Architecture with Subnet Group organization Automatic device association (MP SU to BSU or QB EPA to EPB) Device Context Menu and Label selection
NETWORK MAPS	
	Static maps based on imported drawing (area view, building plan ...) Dynamic Maps directly retrieved from Open Street Map (requires Internet connection) Dynamic Map functionality supports device placement at configured GPS Co-ordinates Dynamic Map functionality allows real time tracking of Tsunami 10200 and Edge 1000 device equiped with GPS module Use color coded icons to display devices and links over the map
CONFIGURATION	
	Direct Access to managed device WEB GUI Devices profile management to propagate one device configuration to many
RADIUS AUTHENTICATION	
	Simplified Tsunami 820/8200/10100/10200 and Edge 1000 Radius Authentication settings
SCHEDULED TASK	
	Scheduled performance email reports Periodic device configuration and logs backup Multiple device license management Multiple device, SNMP object ID setting, Firmware upgrade or Automatic Reboot
FAULT MANAGEMENT	
	Color coded Event and alarms display with acknowledgement Dual alarms group help isolate important device for quicker visualization Event selection in predefined list with severity selection Comprehensive Alarms threshold creation with multiple triggering criteria Visual, Audible and email alerts

NETWORK THROUBLESHOOTING	
	ICMP ping, Traceroute and SNMP ping, even for non managed devices Radio Link Test to measure performance and optimize RF configuration
DASHBOARD	
	View Current and History Chart Print, Save or Export to Excel file
SNMP VERSIONS	
	SNMPv1, SNMPv2 and SNMPv3
OPERATING SYSTEMS	
	Server: Windows 2012 (and R2) / Windows 2016 / Windows 2019 Ubuntu 18.04 LTS or 20.04 LTS / CentOS 7 or 8 Client: Windows and Linux
