

# AURABEAT

## Air Purifier With Wireless Speaker - AB-S1

### User Manual

# Before Using This Product

➤ Check if the package includes the following:

1. AB-S1 air purifier with wireless speaker
2. AB-S1 Air Filter (inside the machine)
3. Fast-charging micro USB cable

If there is any issue regarding the product, please bring the receipt to the retail shop for exchange.

- When using this product, please place it horizontally. Do not block or obstruct the air inlet or outlet.
- You are now ready to use AB-S1.

## Operation

### 1) Controls and Functions

AB-S1 air purifier with wireless speaker has 3 operation modes:

1. Wireless speaker: Connect with devices using Bluetooth to play music
2. Air purification mode: Turn on to enjoy clean air

Air purification Quiet Mode: We recommend

user to switch to quiet mode before sleep, or when you wish to enjoy better sound quality.

3. Enjoy both music and clean air: By operating both modes 1 and 2

**1.1) Machine On/Off, Pause, Play Button:** Press for 5 seconds to turn on/off the machine. Bluetooth turns on with the machine as default. When the music is playing, press to pause/play. After 5 minutes of idling,

Bluetooth will be turned off, while air purification will continue if it is turned on.

**Volume Up Button:** Press to increase speaker volume, press for a few seconds to maximize speaker volume

**Volume Down Button:** Press to decrease speaker volume, press for a few seconds to mute

**Previous Music:** Press to play the previous music

**Next Music:** Press to play the next music

**1.2) Air Purifier On/Off Button:** Press to turn on/off the air purifier, press for 3 seconds for quiet mode.

**1.3) ①** The touch button panel has a blue LED indicator light. This indicator light turns on when Bluetooth is turned on. The blue LED indicator light blinks around once per second when no Bluetooth device is connected. After 5 minutes with no Bluetooth connection, the blue LED indicator light will turn off.

**②** When the machine is turned on and operating, the blue LED light on the on/off button is turned on. During charging, the red LED light on the on/off button is turned on. When the battery power is lower than 15%, this red LED light will blink, please charge the

machine (Refer to 3. Charging the Machine).

③ On the Air Purifier On/Off Button, there are a blue LED light and a green LED light. The blue LED light turns on when the air purifier is turned on. After turned on, you can press this button for 3 seconds for quiet mode. Both blue and green LED lights turn off when air purifier is turned off.

## 2) Filter Replacement

**When the filter is covered with dust and turned from white to gray/black, the filter must be replaced.**

**Under normal circumstances, the filter needs to be replaced in every three to six months, depending on the air purifier usage.**

2.1) The filter has an AuraBeat logo sticker on one side.

When replacing, first open the back cover of the machine (indicated in the circle).

2.2) Pull out the old filter using the semicircle under the AuraBeat logo sticker.

2.3) Remove the new filter from its plastic package, make sure the side with the AuraBeat logo sticker is facing you. (The logo letters shall head upside,

as shown in figure 2.3) ◦

2.4) Push the new filter entirely into the space for the air filter, and then close the back cover of the machine. Filter replacement is completed.

Please dispose the old filter properly.

2.4

### 3) Charging the Machine

The charging port located at the back side of the machine (indicated in the circle), it is a micro-USB port.

3.1) Please use micro USB charging cable to connect to the charging port for charging.

3.2) We recommend to use charger with a current of

2A or above.

## Maintenance

**Caution: When performing maintenance, please turn off the machine and unplug the charging cable. To avoid electric shock or injury, please do not remove the power plug with wet hand.**

- Please clean the machine surface with soft cloth. You can slightly moisturize the cloth to clean the machine, but do not apply water on the machine directly. Also, do not use solvent or detergent on the machine (such as oil, solvent, alcohol, etc.) to avoid damaging the surface.
- Do not splash water on the air inlet and outlet of the air purifier.
- The air filter is not washable.

# Important Safety Matters

## Warning - to prevent electric shock, fire or other hazards

- Please read all precautions before using the air purifier.
- When using this machine in vehicle compartment, please fix the machine to prevent slippage.
- Please replace the charging cable if it is damaged.
- If your charger is damaged, replace it immediately.
- Do not insert fingers or foreign objects into the air outlet or inlet of the air purifier.
- When unplugging the charging cable, you must hold the plug and pull it out. Pulling the cable may damage it and cause danger.
- Do not touch the charger or power plug when your hand is wet.
- Unplug the charging cable when you clean the machine.
- Unless under supervision by adult, this machine should not be used by children.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
